CONNECTICUT RESULTS FROM THE 2015 NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS (NAEP)

NAEP often is called the "Nation's Report Card." It is the only measure of student achievement in the United States where you can compare the performance of students in a state with the performance of students across the nation or in other states. NAEP, sponsored by the U.S. Department of Education, has been conducted for over 40 years. Beginning in 2009, the U.S. Department of Education required states to report state-level NAEP results in state and district report cards. This reporting requirement was designed to provide parents and the public with additional important information about the performance of the students in their state. However, there are important differences to consider when reviewing state-level NAEP results alongside results from the State's academic assessment, the Smarter Balanced assessment. Specifically, state assessments and NAEP are developed for different purposes and achievement standards (e.g., proficient) are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement our state assessment results. NAEP can be helpful in gauging the progress of Connecticut students over time and in reviewing our state performance relative to the performance of other states across the country.

The NAEP 2015 achievement data presented below are the percentages of Connecticut Grade 4 and 8 students in each of the NAEP performance levels for mathematics and reading.
