

This crosswalk has been designed to help educators understand the relationship between the College Board accommodation options in SSD Online (SSDOL) and accommodations for the digital Connecticut SAT School Day for students with an Individualized Education Program (IEP) or Section 504 Plan. It will be updated as new features are released and additional options are made available by the College Board. However, it is recommended that coordinators review the [Connecticut SAT School Day webpage](#) for information specific to Connecticut’s testing program.

Although the Connecticut SAT School Day is administered digitally, SSDOL is used for the SAT Suite of assessments & AP exams, which include digital and paper-based formats depending on the assessment. Educator teams should understand the functionality of the universal tools and accommodations available for digital testing to determine which accommodations may be appropriate depending on the student’s documented need. Although accommodations can be entered in SSDOL early in the school year, the Connecticut designated accommodations window is **November 12, 2024, through January 13, 2025**.

Educators are encouraged to arrange time for students to trial their accommodations and assistive technology (AT), if applicable, early in the year using the College Board’s digital [Practice Tests on Bluebook](#). This allows SSD Coordinators to make timely accommodation requests/changes within the SSDOL submission window, if applicable, to promote optimal test conditions on test day.
