

Getting Started

Your district subscribes to the TEAM Collaborative, which gives you access to a TEAM Module Workspace where you will be able to complete your TEAM work, communicate with your mentor, and access resources to assist you with completing the TEAM program. In order to access your TEAM Module Workspace you must have a user account.

New Participants: In order for you to participate in the TEAM Program, you must sign-up as a user on modules.ctteam.org to create an account. You will need your EIN. Your mentor also has an account and you will be linked to each other once the mentor match has been completed by the district facilitator. You will be able to access the Module Workspace and begin work on the Professional Growth Modules.

Continuing Participants: If you participated in the TEAM Program last year, your account is active and you do not need to sign-up again. You have access to your workspace and any previously created work products. **However, if you have changed your district, school, email or name,** please log in with your **old email and password**, and update your profile accordingly.
