Board of Directors
Connecticut State Teachers' Retirement System
165 Capitol Ave
Hartford, CT 06106-1673

Members of the Board:

Presented in this report is information to assist the Connecticut State Teachers' Retirement System in meeting the requirements of the Governmental Accounting Standards Board (GASB) Statement No. 68 and to identify the information to be provided by the actuary, Cavanaugh Macdonald Consulting (CMC). The information is presented for the period ending June 30, 2023 (the Measurement Date).

GASB Statement Number 68 establishes accounting and financial reporting requirements for governmental employers that provide pension benefits to their employees through a trust.

The annual actuarial valuation used as a basis for much of the information presented in this report, including the Net Pension Liability, was performed as of June 30, 2023. The valuation was based upon data, furnished by the Retirement System staff, for active, inactive and retired members along with pertinent financial information. The schedules contained within this report for participating employers are based on the expected contribution effort as measured June 30, 2023, the date of the latest annual valuation.

In order to prepare the results in this report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

Board of Directors

The actuarial calculations were performed by qualified actuaries according to generally accepted actuarial procedures and methods. The calculations are based on the current provisions of the System, and on actuarial assumptions that are internally consistent and individually reasonable based on the actual experience of the System. In addition, the calculations were completed in compliance with the laws governing the System and, in our opinion, meet the requirements of GASB 68. The undersigned are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

These results are only for financial reporting and may not be appropriate for funding purposes or other types of analysis. Calculations for purposes other than satisfying the requirements of GASB 67 and GASB 68 may produce significantly different results. Future actuarial results may differ significantly from the current results presented in this report due to such factors as changes in plan experience or changes in economic or demographic assumptions.

Sincerely yours,

John J. Garrett ASA, FCA, MAAA Principal and Consulting Actuary

Ben Mobley ASA, FCA, MAAA

# REPORT OF THE ANNUAL GASB STATEMENT NO. 68 REQUIRED INFORMATION FOR THE EMPLOYERS PARTCIPATING IN THE CONNECTICUT STATE TEACHERS' RETIREMENT SYSTEM 

PREPARED AS OF JUNE 30, 2023

## SECTION I - INTRODUCTION

The Governmental Accounting Standards Board issued Statement No. 68 (GASB 68), "Accounting and Financial Reporting For Pensions" in June 2012. GASB 68's effective date is for an employer's fiscal year beginning after June 15, 2014. The Connecticut State Teachers' Retirement System (System) is a cost-sharing multiple employer defined benefit pension plan with a special funding situation.

This report, prepared as of June 30, 2023 (the Measurement Date), presents information to assist the employers participating in the System in meeting the requirements of GASB 68 for the fiscal year ending June 30, 2024 (Reporting Date). Much of the material provided in this report is based on the data, assumptions and results of the annual actuarial valuation of the System as of June 30, 2023. The results of that valuation were detailed in a report dated November 3, 2023.

The Net Pension Liability (NPL) shown in the GASB Statement No. 67 Report for the Connecticut State Teachers' Retirement System prepared as of June 30, 2023 is the collective NPL used for purposes of GASB 68. Please refer to that report for the derivation of the collective NPL.

Pension Expense (PE) includes amounts for service cost (the normal cost under the Entry Age Normal actuarial cost method for the year), interest on the Total Pension Liability (TPL), changes in benefit structure, amortization of increases/decreases in liability due to actuarial experience and actuarial assumption changes, and amortization of investment gains/losses. The actuarial experience and assumption change impacts are amortized over the average expected remaining service life of the Plan membership as of the Measurement Date, and investment gains/losses are amortized over five years. The development of the collective PE is shown in Section IV.

The unamortized portions of each year's experience, assumption changes and investment gains/losses are used to develop deferred inflows and outflows, which also must be included in the employer's and non-employer contributing entities' financial statements. The development of the collective deferred inflows and outflows is shown in Section III.

The State makes all contributions to the System on behalf of employees of the participating districts. Therefore, participating employers are considered to be in a special funding situation as defined by GASB 68 and the State is treated as a non-employer contributing entity in the System. Since the districts do not contribute directly to the System, there is no NPL or deferred inflows or outflows to report in the financial statements of the districts. However, the notes to the financial statements must disclose the portion of the non-employer contributing entities' total proportionate share of the collective NPL that is associated with the employer. In addition, each district must recognize the total PE associated with the district as well as revenue in an amount equal to the nonemployer contributing entities' total proportionate share of the collective PE associated with the district. The State, as a non-employer contributing entity, would report the entire collective amounts of the NPL, Deferred Inflows and Outflows and PE.

Schedule A of this report shows the total amount of employer contributions from the State as support provided to the districts for the year ending June 30, 2023. Schedule A also shows the proportionate share percentages that have been determined based on these contributions.

Based on these percentages we have determined the proportionate share amounts of the NPL associated with each participating employer and the employer PE and revenue for State support for each participating employer. These amounts are shown in Schedule B.

Section II of this report is a summary of the principal results of the collective amounts under GASB 68. Section III provides the results of all the necessary calculations, presented in the order laid out in GASB 68 for note disclosure and Section V shows the Required Supplementary Information (RSI).

## SECTION III -NOTES TO FINANCIAL STATEMENTS

The material presented herein will follow the order presented in GASB 68. Paragraph numbers are provided for ease of reference. Amounts are shown in aggregate. Please refer to Schedule B of this report for the proportionate share of certain pension amounts as required by GASB 68.

Paragraphs 77 and 78(a)-(f): These paragraphs require information to be disclosed regarding the actuarial assumptions used to measure the TPL. The actuarial assumptions used in the June 30, 2023 valuation were based on the results of an actuarial experience study for the period July 1, 2014 - June 30, 2019. The complete set of actuarial assumptions utilized in developing the TPL are outlined in Schedule D. The TPL was determined by an actuarial valuation as of June 30, 2023, using the following key actuarial assumptions:

| Inflation | 2.50 percent |
| :--- | :--- |
| Salary increases | $3.00-6.50$ percent, including inflation |
| Investment rate of return | 6.90 percent, net of pension plan investment <br> expense, including inflation |

Mortality rates were based on the PubT-2010 Healthy Retiree Table (adjusted $105 \%$ for males and $103 \%$ for females at ages 82 and above), projected generationally with MP-2019 for the period after service retirement. The PubT-2010 Disabled Retiree Table projected generationally with MP2019 was used for the period after disability retirement. The PubT-2010 Contingent Survivor Table projected generationally with MP-2019 and set forward 1 year for both males and females was used for survivors and beneficiaries. The PubT-2010 Employee Table projected generationally with MP-2019 was used for active members.

The long-term expected rate of return on pension plan investments was determined using a lognormal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

| Asset Class | Target Allocation | Long-Term Expected <br> Real Rate of Return |
| :--- | :---: | :---: |
| Global Equity | $37.0 \%$ | $6.8 \%$ |
| Public Credit | 2.0 | 2.9 |
| Core Fixed Income | 13.0 | 0.4 |
| Liquidity Fund | 1.0 | -0.4 |
| Risk Mitigation | 5.0 | 0.1 |
| Private Equity | 15.0 | 11.2 |
| Private Credit | 10.0 | 6.1 |
| Real Estate | 10.0 | 6.2 |
| Infrastructure and Natural Resources | 7.0 | 7.7 |

Discount rate. The discount rate used to measure the total pension liability was 6.90 percent. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that State contributions will be made at the actuarially determined rates in future years. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Paragraph $78(\mathbf{g})$ : This paragraph requires disclosure of the sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the System, calculated using the discount rate of 6.90 percent, as well as what the System's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower ( 5.90 percent) or 1-percentage-point higher (7.90 percent) than the current rate (\$ thousands):

|  | $\mathbf{1 \%}$ <br> Decrease <br> $\mathbf{( 5 . 9 0 \% )}$ | Current <br> Discount <br> Rate (6.90\%) | $\mathbf{1 \%}$ <br> Increase <br> $\mathbf{( 7 . 9 0 \% )}$ |
| :---: | :---: | :---: | :---: |
| Collective net pension liability | $\$ 22,219,023$ | $\$ 17,007,295$ | $\$ 12,680,931$ |

Paragraph 80(a): This paragraph requires disclosure of the employer's proportionate share of the collective NPL and if an employer has a special funding situation the portion of the non-employer contributing entities' proportional share of the collective NPL that is associated with the employer. These amounts are shown in Schedule B.

Paragraph 80(b): This paragraph requires disclosure of the employer's proportion (percentage) of the collective NPL and the changes in proportion since the prior measurement date. $100 \%$ of the collective NPL is allocated to the State.

Paragraph 80(c): June 30, 2023 is the actuarial valuation date upon which the TPL is based.

Paragraph 80(d): There were no changes in assumptions that affected the measurement of the TPL since the prior measurement date.

Paragraph 80(e): There were no changes in benefit provisions that affected the measurement of the TPL since the prior measurement date.

Paragraph 80(f): Not applicable.
Paragraph 80(g): Please see Section IV of this report for the development of the collective pension expense. The PE for each employer is shown in Schedule B.

Paragraph 80(h): Since certain expense items are amortized over closed periods each year, the deferred portions of these items must be tracked annually. If the amounts serve to reduce collective pension expense they are labeled deferred inflows. If they will increase collective pension expense they are labeled deferred outflows. The amortization of these amounts is accomplished on a level dollar basis, with no interest included in the deferred amounts. Experience gains/losses and the impact of changes in actuarial assumptions, if any, are amortized over the average expected remaining service life of the active and inactive Plan members at the beginning of the fiscal year. Investment gains and losses are amortized over a fixed five year period.

The table below provides a summary in the difference between projected and actual earnings on plan investments.

| Investment Earnings (Gain)/Loss as of June 30, 2023 (\$ thousands) |  |  |
| :---: | :---: | :---: |
| a | Expected asset return rate | 6.90\% |

Paragraph 80(j): The amount of revenue recognized for the support provided by non-employer contributing entities for the participating employers is provided in Schedule B.

## SECTION IV - COLLECTIVE PENSION EXPENSE

As noted earlier, the collective Pension Expense (PE) consists of a number of different items. GASB 68 refers to the first as Service Cost which is the Normal Cost using the Entry Age Normal actuarial funding method. The second item is interest on the beginning Total Pension Liability (TPL) and the cash flow during the year at the $6.90 \%$ rate of return in effect as of the previous measurement date. The next three items refer to any changes that occurred in the TPL due to:

- benefit changes, or
- actual versus expected experience, or
- changes in actuarial assumptions.

Benefit changes, which are reflected immediately in PE, can be positive, if there is a benefit improvement for existing Plan members, or negative if there is a benefit reduction. For the year ended June 30, 2023, there were no changes.

The next item to be recognized is the portion of current year changes in TPL due to actual versus expected Plan experience for the year. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire Plan membership determined at the beginning of the year. The average expected remaining service life of active members is the average number of years the active members are expected to remain active. For the year ended June 30, 2023 this number of years for the active members is 12.39 . The average expected remaining service life of the inactive members is, of course, zero. Therefore, the number of years to use for the amortization is the weighted average for all active and inactive members, or 6.29 years.

The last item under changes in TPL are changes in actuarial assumptions. There were no changes in assumptions since the last measurement date. If there was a change in TPL due to changes in actuarial assumptions, recognition of the change would also be spread over the average expected remaining service life of the plan membership.

Member contributions for the year and projected earnings on the Fiduciary Net Position (FNP), again at the discount rate used to calculate the liabilities, are subtracted from the amount determined thus far. One-fifth of current period differences between projected and actual investment earnings on the FNP are recognized in the pension expense.

The current year portions of previously determined experience, assumption and earnings amounts, recognized as deferred outflows and inflows (see Section III) are included also. Deferred outflows are added to the PE while deferred inflows are subtracted from the PE. Finally, administrative expenses and other miscellaneous items are included.

The calculation of the Collective Pension Expense determined as of the measurement date is shown in the following table:

| Collective Pension Expense Determined as of the Measurement Date (\$ thousands) |  |
| :---: | :---: |
| Service Cost at end of year | \$634,409 |
| Interest on the TPL and net cash flow | 2,668,940 |
| Current-period benefit changes | 0 |
| Expensed portion of current-period difference between expected and actual experience in the total pension liability | 11,665 |
| Expensed portion of current-period changes of assumptions | 0 |
| Member contributions | $(397,818)$ |
| Projected earnings on plan investments | $(1,473,587)$ |
| Expensed portion of current-period differences between projected and actual earnings on plan investments | $(81,031)$ |
| Administrative expense | 0 |
| Other | $(825,391)$ |
| Recognition of beginning deferred outflows of resources as pension expense | 1,201,831 |
| Recognition of beginning deferred inflows of resources as pension expense | $(110,668)$ |
| Collective Pension Expense | \$1,628,350 |

## SECTION V - REQUIRED SUPPLEMENTARY INFORMATION

Paragraphs 81(a)-(b): CMC was not required to supply this information.

## Paragraph 82:

## Changes of benefit terms:

- 2022
- Legislation was passed restoring the $25 \%$ wear down of Plan N benefits to vested members as of June 30, 2019.
- 2019
- HB 7424 made the following provision changes:
- Beginning July 1, 2019, annual interest credited on mandatory contributions set at $4.0 \%$.
- For members retiring on or after July 1, 2019 with a partial refund option election (Plan N), if $50 \%$ of the benefits paid prior to death do not exceed the Member's mandatory contributions plus interest frozen at the date of the benefit commencement, the difference is paid to the Member's beneficiary.
- 2018
- Beginning January 1, 2018, member contributions increased from $6 \%$ to $7 \%$ of salary.

## Changes of assumptions:

- 2020
- The Board adopted new assumptions as the result of an experience study for the five-year period ending June 30, 2019. The changes in assumptions are summarized below:
- Decrease the annual rate of real wage increase assumption from $0.75 \%$ to $0.50 \%$.
- Decrease payroll growth assumption from $3.25 \%$ to $3.00 \%$.
- Rates of withdrawal, disability, retirement, mortality, and assumed rates of salary increase were adjusted to more closely reflect actual and anticipated experience.
- 2019
- The Board adopted new assumptions in conjunction with HB 7424. The changes in assumptions are summarized below:
- Reduce the inflation assumption from $2.75 \%$ to $2.50 \%$.
- Reduce the real rate of return assumption from $5.25 \%$ to $4.40 \%$ which, when combined with the inflation assumption change results in a decrease in the investment rate of return assumption from $8.00 \%$ to $6.90 \%$.
- Increase the annual rate of wage increase assumption from $0.50 \%$ to $0.75 \%$.
- Phase in to a level dollar amortization method for the June 30, 2024 valuation.
- 2016
- Rates of withdrawal, disability, retirement, mortality, and assumed rates of salary increase were adjusted to more closely reflect actual and anticipated experience. These assumptions were recommended as part of the Experience Study for the System for the five year period ended June 30, 2015.

Method and assumptions used in calculations of actuarially determined contributions. The actuarially determined contributions in the schedule of employer contributions are calculated as of June 30 each biennium for the fiscal years ending two and three years after the valuation date. The following actuarial methods and assumptions were used to determine the most recent contributions reported in that schedule:

Actuarial cost method<br>Amortization method<br>Remaining amortization period<br>Asset valuation method<br>Inflation<br>Salary increase<br>Investment rate of return

## SCHEDULE C

## SUMMARY OF BENEFIT PROVISIONS EVALUATED

## Covered Employees

Any teacher, principal, superintendent or supervisor engaged in service of public schools, plus professional employees at State schools of higher education if they choose to be covered.

## Annual Salary

Annual Salary rate for service as a Connecticut teacher during a school year excluding amounts paid for extra duty assignments, coaching, unused sick time, unused vacation or terminal pay.

## Average Annual Salary

Average of Annual Salary received during three years of highest salary.

## Credited Service

One month for each month of service as a teacher in Connecticut public schools, maximum 10 months for each school year. Ten months of credited service constitutes one year of Credited Service. Certain other types of teaching service, State employment, or war-time military service may be purchased prior to retirement, if the Member pays one-half the cost.

## Normal Retirement

Eligibility - Age 60 with 20 years of Credited Service in Connecticut, or 35 years of Credited Service including at least 25 years of service in Connecticut.

Benefit - 2\% of Average Annual Salary times years of Credited Service (maximum benefit is $75 \%$ of Average Annual Salary)

In addition, amounts derived from the accumulation of mandatory contributions made prior to July 1, 1989 and voluntary contributions by the teacher are payable.

Minimum Benefit: Effective January 1, 1999, Public Act 98-251 provides a minimum monthly retirement benefit of $\$ 1,200$ to teachers who retire under the Normal Retirement provisions and who have completed at least 25 years of full time Connecticut service at retirement.

## Early Retirement

Eligibility - 25 years of Credited Service including 20 years of Connecticut service, or age 55 with 20 years of Credited Service including 15 years of Connecticut service.

Benefit - Reduced normal retirement benefit. The early retirement factors currently in effect are $6 \%$ per year for the first five years by which early retirement precedes the minimum normal retirement age and $4 \%$ per year for the next five years by which early retirement precedes the minimum normal retirement age. Effective July 1,1999 , the reduction for individuals with 30 or more years of service is $3 \%$ for each year by which early retirement precedes the minimum retirement age.

## Proratable Retirement

Eligibility - Age 60 with 10 years of Credited Service.
Benefit - $2 \%$ less $0.1 \%$ for each year less than 20 years of Average Annual Salary times years of Credited Service in Connecticut, plus $1 \%$ of Average Annual Salary times years of additional Credited Service time.

## Disability Retirement

Eligibility - 5 years of Credited Service in Connecticut if not incurred in the performance of duty and no service requirement if incurred in the performance of duty.

Benefit - $2 \%$ of Average Annual Salary times Credited Service to date of disability, but not less than $15 \%$ of Average Annual Salary, nor more than $50 \%$ of Average Annual Salary. In addition, disability benefit under this plan (without regard to any cost-of-living adjustments) plus any initial award of Social Security benefits and workers' compensation cannot exceed Average Annual Salary.

## Termination of Employment

Less than 5 years of Credited Service - Return mandatory contributions with interest.
5 or more years of Credited Service - Return employee mandatory contributions with interest and $1 \%$ contributions made prior to July 1, 1989 without interest.

10 or more years of Credited Service - Member is $100 \%$ vested in the accrued benefit based on Credited Service and Average Annual Salary as of the date of termination of covered employment. Benefits are payable at age 60 and early retirement reductions are based on the number of years of service the member would have had if they had continued to work until age 60.

Member may elect return of all contributions plus interest on employee mandatory contributions in lieu of vested benefit.

## Pre-Retirement Death Benefits

A lump sum plus one of the following: survivor's benefit, return of all contributions with interest, or surviving spouse's benefit.

- Lump Sum: $\$ 1,000$ for the first 5 years of Connecticut service plus $\$ 200$ per year thereafter. Maximum benefit: $\$ 2,000$.
- Survivor's Benefit: For active teachers who die while in service, the family maximum benefit payable to survivors is $\$ 1,500$ per month. Each minor child is entitled to $\$ 300$ per month. The surviving spouse's benefit is $\$ 300$ per month if the member has 12 or less years of service. For each additional year of service, the surviving spouse's monthly benefit is increased $\$ 25$, up to a maximum of $\$ 600$.
- Accumulated contributions with interest plus dependent children's benefits as described in the "Survivor's Benefit" paragraph.
- Surviving Spouse's Benefit: An active member who is eligible for immediate retirement and who has named his or her spouse as primary beneficiary will be covered by a $100 \%$ Plan D co-participant option in the event of his or her death prior to retirement.

## Benefit Options

Normal form: Partial Refund Option - For any member who retires having earned 10 or more years of service prior to July $1,2019,75 \%$ of total benefit is paid as a life annuity. If $25 \%$ of the benefits paid prior to death do not exceed the Member's mandatory contributions plus interest frozen at the date of the benefit commencement, the difference is paid to the Member's beneficiary. For any member who retires having earned less than 10 years of service prior to July $1,2019,50 \%$ of total benefit is paid as a life annuity. If $50 \%$ of the benefits paid prior to death do not exceed the Member's mandatory contributions plus interest frozen at the date of the benefit commencement, the difference is paid to the Member's beneficiary.

Optional Forms: 5-, 10-, 20-, or $25-$ year certain and life and $33-1 / 3 \%, 50 \%, 66-2 / 3 \%, 75 \%$, or $100 \%$ coparticipant annuity (if co-participant dies first, benefit reverts to unreduced amount). Amounts payable under the optional forms are determined on an actuarially equivalent basis as set by the board.

## Cost-of-Living Allowance

For teachers who retired prior to September 1, 1992, pension benefit adjustments are made in accordance with increases in the Consumer Price Index, with a minimum of $3 \%$ and a maximum of $5 \%$ per annum.

For teachers who were members of the Teachers' Retirement System before July 1, 2007, and retire on or after September 1, 1992, pension benefit adjustments are made that are consistent with those provided for Social Security benefits on January 1 of the year granted, with a maximum of $6 \%$ per annum. If the return on assets in the previous year was less than $8.5 \%$, the maximum increase is $1.5 \%$.

For teachers who were members of the Teachers' Retirement System after July 1, 2007, pension benefit adjustments are made that are consistent with those provided for Social Security benefits on January 1 of the year granted, with a maximum of $5 \%$ per annum. If the return on assets in the previous year was less than $11.5 \%$, the maximum increase is $3 \%$, and if the return on the assets in the previous year was less than $8.5 \%$, the maximum increase is $1.0 \%$

## Teachers' Mandatory Contribution

Effective July 1, 1992, each teacher is required to contribute $6 \%$ of annual salary for the pension benefit. Beginning January 1, 2018, each teacher is required to contribute $7 \%$ of annual salary. Beginning July 1, 2019, annual interest credited on mandatory contributions set at $4.0 \%$.

## State Contribution

The State's contribution requirement is determined in accordance with Section 10-183z (as amended by Section 88 of Public Act 19-117).

## Early Retirement Incentive

A local or regional board of education may establish a retirement incentive plan. The plan shall provide for purchase of additional credited service by a board of education and a member of the system who chooses to participate in the plan, of additional credited service for such member and for payment by the board of education of not less than fifty per cent of the entire cost of such total cost. Any such plan shall specify a maximum number of years to be purchased, not to exceed five. Members must have attained age 50 and be eligible for retirement with the additional purchased service. The amount of service purchased cannot exceed the lesser of five years and one-fifth of the member's credited service.

| :---: | :---: | :---: |

* Rates shown are for 2010, the base year of the table.

## Post-Retirement Mortality

The PubT-2010 Healthy Retiree Table (adjusted 105\% for males and $103 \%$ for females at ages 82 and above) projected generationally with MP-2019 is used for the period after service retirement. The PubT-2010 Disabled Retiree Table projected generationally with MP-2019 is used for the period after disability retirement. The PubT-2010 Contingent Survivor Table projected generationally with MP-2019 and set forward 1 year for both males and females is used for survivors and beneficiaries. ## Asset Valuation Method

Market value of assets is used for GASB 68 disclosure purposes.

## Actuarial Cost Method

The Entry Age Normal actuarial cost method allocates the plan's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of payroll necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

The unfunded accrued liability is determined by subtracting the actuarial value of assets from the actuarial accrued liability. The UAAL as of June 30, 2018 is amortized as a level percent of pay and will grade to a level dollar method beginning with the June 30, 2024 valuation. Future changes to the UAAL will be amortized utilizing layered 25-year closed amortization bases established at the end of each plan year.

## Payroll Growth Rate

This assumption only applies to the level percent of pay amortization method. The total annual payroll of active members is assumed to increase at an annual rate of $3.00 \%$. This rate does not anticipate increases in the number of members. This rate will grade to $0 \%$ in the following steps: $2.40 \%$ for the FY 2022 payment, $1.80 \%$ for the FY 2023 payment, $1.20 \%$ for the FY 2024 payments, $0.60 \%$ for the FY 2025 payment and $0 \%$ for fiscal years thereafter.

## Future Cost-of-living Increases

Members who retired prior to September 1, 1992 are assumed to receive an annual Cost-of-Living Adjustment (COLA) of $3.0 \%$. Members who retired on or after September 1, 1992 and were hired prior to July 1, 2007 are assumed to receive an annual Cost-of-Living Adjustment (COLA) of $2.0 \%$. Members who retired on or after September 1, 1992 and were hired on or after July 1, 2007 are assumed to receive an annual Cost-of-Living Adjustment (COLA) of $1.75 \%$.

## Marriage Assumption

$85 \%$ of males and $75 \%$ of females assumed to be married, with female spouses 3 years younger than males.

## Plan N Partial Refund Option (Normal Form of Payment):

For any member who retires having earned 10 or more years of service prior to July 1,2019 , upon death, the member's beneficiary will receive a lump sum payment of the member's contributions with interest to the member's date of retirement less $25 \%$ of the total payments received to the member's date of death. A 12-year Certain and Life payment form is used to approximate the Plan N option where available data does not allow liabilities to be calculated directly.

For any member who retires having earned less than 10 years of service prior to July 1, 2019, upon death, the member's beneficiary will receive a lump sum payment of the member's contributions with interest to the member's date of retirement less $50 \%$ of the total payments received to the member's date of death. A 9-year Certain and Life payment form is used to approximate the Plan N option where available data does not allow liabilities to be calculated directly.
