

STATE OF CONNECTICUT
Department of Emergency Services and Public Protection
Dr. Dora B. Schriro, Commissioner

Home, School and Business Earthquake Preparedness

- ✓ Identify a safe place in every room – under a piece of sturdy furniture, or against an interior or load-bearing wall.
- ✓ Practice “drop, cover, and hold on” in each safe place.
- ✓ Bolt and brace water heaters and gas appliances, large bookcases and china cabinets, and other tall furniture to wall studs.
- ✓ Locate the gas and water valves in your home and learn how to shut them off.
- ✓ If you use propane gas, make sure it is securely anchored and the shut off valve can be easily reached. If you smell gas, do not turn on electrical appliances or lights, evacuate the home, and call the utility from a safe place.
- ✓ Keep and maintain an emergency supply kit that is easily accessible and includes basic supplies – including a portable radio, flashlight, fresh batteries, a first aid kit and bottled water.
- ✓ Check your home for structural damage or cracks, (including foundations, chimneys, and wood stove piping) on a regular basis. Contact your local building official if you notice any damage.
- ✓ To prepare for any incident, including an earthquake, have family and workplace emergency plans.
- ✓ Check your Carbon Monoxide and Smoke Detectors to ensure they are working properly.
- ✓ Sign up with www.CTAlert.gov to receive any emergency information sent out in your town.
- ✓ For additional preparedness information, go to www.redcross.org and www.211ct.org.
