Application for USB Breath Switch Adaptor

The USB breath switch permits patrons to use Sip-and-Puff actions to control the Digital Talking Book Machine (DTBM). Using their breath, patrons may operate all buttons and functions with the exception of the Power on/off feature. This unit is intended for patrons who are unable to use the buttons on the DTBM. Please complete this application and submit it to your network librarian or reader advisor, who will email it to the NLS equipment control officer at NLS-ECO@loc.gov. Upon approval of the application, NLS/BPH will mail the item directly to you.

Part 1: Patron Information

Last name

First name

Middle initial

Street address

City

State

ZIP code

Telephone

Email

Network Library Where Patron is Registered

Part 2: (To be completed by certifying authority)

I certify that this patron is unable to operate the DTBM by hand and therefore has a justifiable need for use of a breath-switch unit.
