

State of CT
FY26 4d-15 Projects

Agency	Name	Project Description
ADS	SSA POAM Remediation from 2022 Audit	Address 297 issues from SSA Audit in 2022
ADS	System 7 Migration to Libera GovCloud	Move System 7 from on-premise to GovCloud
CSL	Migration from Past Perfect to CT Collections	Migration from Past Perfect to CT Collections
CSL	Windows 11 upgrade	Upgrade to windows 11 requires hardware replacement.
CTECS	Hardware scrapping	All 17 school locations are getting new hardware for the new school year. The old hardware must be surplussed to make room at the schools and to properly dispose of the equipment.
CTECS	Internal Purchase Request approval Power App	CTECS has a complex set of approvals needed for specific types of purchases. CoreCT does not have the functionality to facilitate the extensive approvals required. A Power Platform app is being created to track and log the appropriate approvals before the purchase requisitions are entered into CoreCT.
CTECS	Windows 11 upgrade	CTECS' ~2000 staff need to be upgraded to Windows 11.
DAS	Assetworks-FacilityForce WMS	Enterprise Apps (Operate, Engage and Go-Mobile)
DAS	Autocene (CT Gateway) Business Outreach Site Visit	DAS offers trainings across Connecticut's communities to support small and minority-owned businesses interested in certification. Additionally, we engage in events hosted by municipalities, agencies, and business organizations. The Site visit module will collect data about site visits
DAS	Autocene (CT Gateway) - Federal Surplus	Replacement of current Federal Surplus App (process). This vendor app will allow to keep an inventory of what is being bought from the Feral Government
DAS	Autocene (CT Gateway) Business Outreach Communication	This application will provide the ability to provide a form to input outreach events
DAS	Common Payments Platform (CPP)	This project's goal is to create / develop a common payments processing platform that enables various payment solutions (Gateways, Processors, etc.) to easily allow payment processing (credit card, debit cards, ACH, etc.) methods integrate across agencies.
DAS	DCP Off Track Betting changes	OTB needs further automation of data ingestion for their daily/weekly/monthly reports. Data provider changed how data is delivered since the last work on this app
DAS	DGOE - Release Management	This project focuses on providing comprehensive support for existing digital products and services. The team will manage work orders and incident report tickets, ensuring timely resolution and continuous service uptime. By coordinating resources and facilitating collaboration across teams, the project will ensure seamless support and operational efficiency.
DAS	DGOE - Service Center MVP	The Service Center MVP Project marks the next step after the successful development of a working prototype, which was completed and presented on January 14, 2025. Using the prototype as a baseline, this project will focus on creating a minimum viable product (MVP) that facilitates integration between the Service Center and Opportunity Center for appointment scheduling and the Health.ct Pre-screener. Additionally, the project will enhance the notifications engine by incorporating SendGrid and Twilio for email and SMS communication.

State of CT
FY26 4d-15 Projects

DAS	DVA Security Reporting system enhancements	DVA Security Reporting system was built in BizNet platform in 2022. DVA has requestion the addition of several new pages, primarily for End-of-shift reporting.
DAS	eLicense Enhancement: Digital Wallet	Modify eLicense - Digital Wallet application feature
DAS	eLicense Enhancement: Online Delegation	Modify eLicense - online user delegation
DAS	eLicense Enhancement: Online Portal enhancements	eLicense Online Portal enhancements
DAS	eLicense Expansion: DEEP Forestry	Add new eLicense division and credentials for Forestry licensing
DAS	eLicense: New BOA ACH payment platform	Integrate new BOA payment service for ACH
DAS	eLicense-Nursys interface changes	DPH requested modification to the Nursys data export.
DAS	Enterprise Single-Sign On Initiative	Enterprise SSO related projects for ForgeRock application including: ID Proofing and Fraud Protection, Disaster Recovery (DR), MySQL Upgrade, DevOps Strategy, Business Persona Management, Application Integrations, and Operational Assistance. Extension (3/25 - 6/25): Scope of extension: Finalize ID Proofing (majority of the effort), DR enhancements, Power Page App Integration Pattern, AKS Upgrade, Inactive User Archival POC, App Integrations and Operations
DAS	Fuel Price Maintainece updates	New features for fuel price maintenance app hosted on the BizNet platform.
DAS	Jurisdiction Online Payment Service	Payment Service for the DAS Bureau of Boilers and Elevators
DAS	LMS - DCP Drug Control Division Onboarding	Drug Control Division is interested in using the LMS application for their training needs. Waiting for funding to be approved.
DAS	Smartforms integration: DEEP Pesticide division	Integrate the mobile enforcement app for the DEEP Pesticide division
DAS	SmartForms: Enhanced Start new case app upgrades	Introduction of new mobile app feature to allow for start and open of both inspections and complaint cases remotely
DAS	Time Reporter - Enhancements	Time Reporter application enhancements.
DAS	Traval Auth DoAG Onboarding	Onboarding DoAG to use the Travel Auth App (DAS is the Business Office)
DAS	Website Modernization Program	Website Modernization Program Level Tracking
DCF	Google Classroom and Internet Filtering for Chromebooks	DCF Unified School District 2 Google Workspace for Education, Chromebook and Unified Single-sign on with learning tool auto-rostering
DCF	RED Determination and Claiming for Family First	This project supports the rollout of the Family First Prevention Services Act (FFPSA), a federal initiative aimed at transforming child welfare by prioritizing family preservation and preventive services. The goal is to reduce reliance on foster care by investing in evidence-based programs that keep children safely with their families.
DCF	Route Genie	Provide a driver dispatch solution for the Central Transportation Unit to organize daily driver routes and assignments.
DCF	Windows 11 Rollout	Coordinate with WFE to upgrade agency desktops (both physical and VDI) to Windows 11.
DCP	eLicense - Case Creation for Non-License Holders in Mi-apps	Case creation against non-license holders in Mi-apps to allow DCP mobile inspectors to create cases for unlicensed individuals/businesses without workarounds.
DCP	eLicense - New ACH Process w/ BOA	eLicense will be able to process ACH payments from checking/savings accounts.
DCP	Gaming SFTP for Lottery	Create an automated process to securely receive application code files from lottery vendors via SFTP and store them long-term with auditability.

State of CT
FY26 4d-15 Projects

DCP	Technology Refresh	Replacing a wave of laptops as they've aged out, with attention to Windows 11 compatibility as well.
DDS	Emergency Management	Automated Teams creation for Emergency Management and incidents
DDS	EVV Bulk upload	Give providers ability to upload visit information via CSV or via API
DECD	Frontier fiber network upgrade to multiple locations (museums & Visitor centers)	DECD is upgrading networks to fiber for all remote locations (museums & Visitor Centers)
DECD	Implementation of Salesforce (CRM)	DECD is implementing Salesforce as a CRM for the office of manufacturing. Once implemented, it will be rolled out to the rest of the departments at DECD.
DECD	Office of Manufacturing website upgrade to new Sitecore platform	DECD's Office of Manufacturing (OOM) acquired funding to build out and update their website. We hired a contractor (Heidi Reischuck) to work with Tom Marciniak and Michelle Hall.
DECD	Upgrade all PC's & laptops to Windows 11	Windows 11 Upgrade
DEEP	Intranet Migration	Moving of Azure site to Sharepoint
DEEP	REACT	Implement the Salesforce Licensing, Permitting, and Inspections (LPI) platform for DEEP REACT - an online and internal application used to receive and track site information submitted by the public and facilitate agency case management tasks utilizing workflows on the Salesforce platform
DEEP	SIP- Stormwater Industrial Permit	Stormwater Industrial Permit application process
DEEP	Solid Waste Management Tracking	Solid Waste Reporting and Tracking System for external users to submit data and internal users have ability to add, edit and run reports on the data.
DESPP	Clean Slate	The Connecticut legislature passed, and the governor of the State of Connecticut, in June 2021, signed into law Substitute Senate Bill No. 1019, Public Act No. 21-32 (subsequently amended in P.A. 23-169). The Clean Slate moniker is descriptive of key new components of Section 54-142a of the Connecticut general statutes. Section 54-142a in prior forms has specified requirements for the management, dissemination, and erasure (non-disclosure) rules applicable to criminal justice data custodians. Clean Slate P.A. 23-169 (section 54-142a) pertains to erasure of criminal justice records, either initiated by individual petition, or by operation of law. Operation of law is construed as Automated Erasure in the context of systems specifications used to develop and support technology components that implement the Clean Slate statute.
DMHAS	Bridgeport Camera, Panic Alarms and Visitor SYstem	Installation of cameras and panic alarms on the patient units and a visitor system at the front desk
DMHAS	Centralize ETL and EDW - IT Initiative	Centralized ETL process and Enterprise Data Warehousing with SQL 2022 and new security model per HIPAA requirement
DMHAS	DMHAS Enterprise Wifi Project Board: Middletown Campus	This effort is focused on the delivery of Enterprise WIFI for DMHAS on the Middletown Campus. The work consists of wiring and switch gear to support 30 Buildings and 897 AP's with Ligature covers
DMHAS	DOTS - O/T Scheduling Stop Gap Solution – Prebook	Create New Web App to replace the Current OT Prebook Access App(s) with more secure and user friendly application across facilities (Web App w/ SQL backend)

State of CT
FY26 4d-15 Projects

DMHAS	Employee Directory	Will allow DMHAS users to update their phone number in Active Directory. TCOs can then use as a DMHAS wide contact list
DMHAS	Enterprise WiFi	Installation of WiFi at all DMHAS locations
DMHAS	MCT - Clinician assignment and tracking	Veoci Software to utilize Veoci's crisis event tracking platform to build a customized Mobile Crisis Team (MCT) clinician assignment and tracking solution.
DMHAS	Power BI	Develop a process for requesting data to publishing reports
DMHAS	Provider Suite of Apps Modernization	Redesign Provider Suite of Apps CI, PATS, CS, DDaP with new architecture, technology, and security measure to compliance with REL and HIPAA Remediation
DMHAS	Replacing 19" monitors	Replace all 19" monitors with 24" in support of the EHR
DMHAS	RSA migration to MFA for Private non Profit users	Move Private Non Profit users from RSA username/ password to MFA for VPN connection
DMHAS	Update Pharmacy Software	Update the pharmacy software and install medication dispensing machines and software at 4 DMHAS facilities
DMHAS	Windows 11	Upgrade Windows 10 to Windows 11
DOAG	DOAG Web Mod Project Plan	Web Modernization of the DOAG site. Scope includes optimization of key high touch pages into the new component design system, moving the site into the new instance of SiteCore and scripting the rest of the site into the new instance. Project also includes launch support and training the agency on operationalizing their new site within the new design system and instance of SiteCore.
DOC	iBOSS	Troubleshooting iBoss application (web filtering), new BITS application is not configured correctly for DOC and many facilities are experiencing slowness or unreachable sites, i.e. Methasoft for HSU
DOC	Naphcare replacement project App	Replace existing Naphcare app (vendor based) with inhouse App - Dan's Request System and Scheduler.
DOC	Network Configs	Changing network configuration as we are running out of network addresses for devices at CO
DOC	Server moves to GDC	Move all DOC's servers and VMS to GDC.
DOC	Wireless Network	Expanding wireless network to be able to except more devices.
DOH	Storyhub dashboard reporting system	Storyhub is a reporting system that generates dashboards for each department in DOH
DOI	Consumer Insurance Risk Mapping Tool	Agency looking to leverage First Street for insurance risk mapping as a complimentary offering to all CT properties (resident or business).
DOI	Consumer Insurance Risk Website Updates	BITS Agency Webmaster, Anh Huynh, working closely with agency Communications staff to redesign and update Consumer Insurance Risk portions of Sitecore site.
DOI	Equipment Refresh (bringing DOI to 3 year cycle)	Personal computing equipment refresh (bringing DOI to 3 year computer refresh cycle)
DOI	Medical Malpractice Reporting System Rewrite	Redevelopment of an in-house application which facilitates industry reporting of medical malpractice information required by statute and making data available for annual agency reports.
DOL	Agency Avaya Extension Changes	Correct DOL agency 911 calls
DOL	DHCP Migration	Move DOL DHCP to GDC DAS DHCP
DOL	Enhanced RESEA	Develop RESEA functionality in RECT.

State of CT
FY26 4d-15 Projects

DOL	Enterprise Mileage Reimbursement Implementation	Implement DOL use of Enterprise Mileage Reimbursement app to improve efficiency and to ensure compliance with GL115 requirements that includes tracking mileage and associated costs.
DOL	Everbridge	
DOL	EWIB Montville Transition Off CT DOL Network	Transition Eastern CT Workforce Investment Board off CT DOL network
DOL	FY26 PC Refresh	Refresh older PCs that are out of warranty
DOL	Implement Amazon Connect Callback Contact Center	Replace Mindful with Amazon Connect Callback in contact center.
DOL	Implement ISE/TEAP 3.2	Upgrade from ISE 2.7 to 3.2
DOL	Implement SSO For Salesforce	
DOL	Intranet Migration to SharePoint Online	Audit & migrate all unit intranet sites to SharePoint Online. Decommission the legacy technology old DOL intranet sites reside on.
DOL	Move Research Internet To SiteCore	Move Research's internet sites to SiteCore, where possible.
DOL	Network Equipment Upgrade FY25	Replace out of warranty network switches, routers & UPSs to improve reliability
DOL	Network Equipment Upgrade FY26	Replace core switches, switches and routers to improve reliability
DOL	New Haven IT Requirements	Provide DOL IT services to New Haven AJC
DOL	New Hire Legacy FTP Error Notifications	Legacy FTP process sends emails to vendors if errors in their file: At times these emails get misplaced. This project will provide secondary email capabilities.
DOL	New Hire Legacy FTP Error Notifications	Provide New Hire Reporting admins the ability to resend FTP error notifications to vendors.
DOL	Power Automate Implementations	
DOL	Public Document Library Phase 3	Post CSBLR prod additions and enhancements.
DOL	SIDES	The project involves adding additional "exchanges" to our current capabilities (we only use SIDES Separation Information at this time). There are a total of 6 exchanges. Each exchange supports a specific step in the life cycle of an unemployment insurance claim to ensure speed, accuracy, and reliability through the entire process.
DOL	TAX Migration To CORE-CT	Move TAX off its XLS system to CORE-CT
DOL	Waterbury IT Upgrade	IT upgrades in support of Waterbury office renovations
DOL	Windows 2008r2 Server Retirements	Retire DOL's unsupported Windows 2008 servers
DPH	Clinical LIMS	Replace existing clinical (infectious diseases) laboratory information management system (LIMS) with a more modern platform, capable of implementing Electronic Test Orders and Results (ETOR). Also, utilize Connie (the state Health Information Exchange) for data transport between providers and the State Laboratory.
DPH	DPH Web Mod Project Plan	Web Modernization of the DPH site. Scope includes optimization of key high touch pages into the new component design system, moving the site into the new instance of SiteCore and scripting the rest of the site into the new instance. Project also includes launch support and training the agency on operationalizing their new site within the new design system and instance of SiteCore.
DPH	DPH Website Migration	Migration to new State Portal

State of CT
FY26 4d-15 Projects

DPH	Newborn Screening LIMS	Replace existing newborn screening laboratory information management system (LIMS) with a more modern platform, capable of implementing Electronic Test Orders and Results (ETOR). Also, utilize Connie (the state Health Information Exchange) for data transport between providers and the State Laboratory.
DPH	Pilotfish-to-Rhapsody Migration	Migrate Existing Pilotfish solutions for Electronic Laboratory Reporting and Electronic Case Reporting to Rhapsody
DPH	State Lab Fiber Optics Network	Provide fiber optics network (Connecticut Education Network) to the lab to improve data transfer speed for uses like Genomics.
DRS	Network upgrade at regional offices	Upgrade switches and enable WiFi at Waterbury and Norwich offices
DRS	Windows 11 Upgrade	Replace laptops that are not Win 11 compatible and upgrade Win 10 to Win 11
DSS	CEAP 2.0	Any enhancements to CEAP requested by Legislative Manadate - POGA to modify CEAP application - if someone in household receiving benefit, need to capture entire household income.- the receiptate will still get something a a benefit
DSS	CT Pathways Phase 2	Integrated Employment (CTPIE) is an initiative in Connecticut that helps eligible youth and adults with intellectual and developmental disabilities find employment, working side-by-side with people of all abilities and earning competitive wages and benefits.
DSS	CTMETS Program	A program to modernize, streamline, and align current information systems and business processes for the HUSKY Health Program.
DSS	Home Care Registry Project	A solution needed to meet the requirements under House Bill No. 5001 where DSS is required to create and maintain a Home Care Worker Registry. The requirements include a series of web pages, reports, hosting and security.
DSS	ImpaCT EOM Release and Minor Mods	A collection of continual work related to the ImpaCT and ConneCT applications related to fix defects, make enhancements and new work through releases.hancements
DSS	IT Infrastucture	IT Infrastructure Roadmap consisting of infrastructure upgrades, performance security vulnerability and compliance, AWS enhancement and automation and process improvement activities.
DSS	Opportunity Centers	Governor Imperative to stand up locations where CT residents could interact with multiple agencies at one location. DSS is driving this effort.
DSS	PWA Mobile (MyDSS) Phase 5 SSA	MyDSS mobile is a progressive web application that has multiple phases.
DSS	Tool Replacement	Migration of tools that are outdated and unsupported.
DVA	ARPA Building 51-1 - 51-6 Housing Project	CAN/LAN Expansion, CAN/LAN Expansion, Wi-Fi, telephones, cameras
DVA	ARPA Levitow Lane Housing Project	CAN/LAN Expansion, Wi-Fi, telephones, cameras
DVA	Audio Visual Carts	Add two new AV carts
DVA	LAN Switch Upgrade (Asset Transfer from OPM)	Upgrade LAN and Wireless with Extreme- asset transfer from OPM.
DVA	MatrixCare EHR	Deploy MatrixCare EHR (cloud based)
MIL	Win 11	Replace all devices with new equipment for Win 11
OEC	Care4Kids Parent Portal	The Parent Portal provides parents the ability to prescreen for and apply to the Care 4 Kids subsidy online
OEC	Early Start Enhancements	Publicly-funded early care and education (ECE) programs use ECE Reporter to share data with the Connecticut Office of Early Childhood (OEC).

State of CT
FY26 4d-15 Projects

OEC	RAIN	RAIN is the new application for the Birth to Three System, operated under the federal Individuals with Disabilities Education Improvement Act, Part C .
OHA	Online Client Form Automation to Legal Files	Automation of online client form input into the agency's case management system, Legal Files.
OHE	OHE ARC Payroll	Rewrite Alternate Route to Certification (ARC) Payroll application to a newer development platform.
OHS	ETL Portal ARPA REL-D	New portal for healthcare facilities to submit inpatient, outpatient, ED encounter data
SDE	Active Directory Migration	Migration of applications out of the SYS domain to the APPS Domain
SDE	Azure Cloud migration and implementation	Cloud-hosted SaaS adult education system, electronic grants management system (eGMS), Regional School Choice Office (RSCO) school choice lottery system, and special education IEP system (CT-SEDS) This effort includes the design of a new cloud-hosted replacement to the CECS teacher certification in-house application and the continued attempts with Microsoft for the cloud migration (Azure) of the entire data collection environment
SDE	Connecticut Cohort Verification System	The CSDE is required to report Cohort Graduation Rates per the No Child Left Behind Act (NCLB) and in compliance reports such as EdFacts and the Consolidated State Performance Report. The cohort graduation rate is also a component of Connecticut's new accountability system described in CSDE's approved NCLB flexibility request (or waiver).
SDE	CSDE Server Migration	migration of CSDE servers from CSDE-managed to BITS-managed environments including transition from Hyper-V to VMWare
SDE	Direct Certification Application	CT SDE Direct Certification Application is a process conducted by states and local educational agencies to certify eligible children for free meals without the need for household applications. It is based on factors such as participation in the SNAP, TANF/TFA), Medicaid and Foster Care.
SDE	ED-159 Data Collection Revisions	Revisions to the data collection to support student address collection needed for Summer EBT
SDE	Enhancements to CT-SEDS	CT-SEDS (CT Special Education Data System) enhancement project includes changes in PSIS, SEDAC, and other systems to make CT-SEDS the authoritative source of student special education status
SDE	Windows 11 upgrade	Upgrading all windows devices to Windows 11
WCC	FRI Sybase-to-SQL Conversion	Convert the agency's First Report of Injury (FRI) system from a Sybase database backend to SQL server.
WCC	FRI System Server 2019 Migration	The agency's aged First Report of Injury (FRI) system currently runs on Server 2003 which is a security vulnerability. This server has been virtualized, but the system needs to be migrated to Server 2019.
WCC	Online Form Submission	The agency would like to enable claimants and their representatives to upload case-related documents via an online portal.
WCC	PARS Replacement	Replace the agency's public-facing case information lookup system with a Power Platform solution developed in-house.

State of CT
FY26 4d-15 Projects

WCC	WCC Website Modernization	Web Modernization of the WCC site. Scope includes optimization of key high touch pages into the new component design system, moving the site into the new instance of SiteCore, and scripting the rest of the site into the new SiteCore. Project also includes launch support and training the agency on operationalizing their new site within the new design system and instance of SiteCore.
