A & B. Crane and apprentice crane applications were reviewed by the Crane Board for compliance to the state regulations at this meeting.

5. Accidents – The State Crane Inspector informed the Board of two hoisting equipment accidents which occurred recently in Danbury, Connecticut and Naugatuck, Connecticut. The two hoisting equipment accidents were both fatal accidents involving the use of an excavator having a reach of less than 32 feet; therefore, they appear to not fall under the Crane Board's Authority. Additional information will be presented to the Crane Board for review. The Danbury fatal accident will be further reviewed by the Board since the operator is the holder of a state hoisting license which falls under our authority. The State Crane Inspector began the process of proceeding to a hearing to review the hoisting accident which occurred in Danbury, Connecticut. Chairman Ed St. John suggested to review the steps of conducting a hearing with the department's legal advisors.

Information pertaining to the crane incident/accident on the Dimeo project in New Haven was presented to the Board.
