Provider Description

Information provided by the provider describing their agency:

Alternative Services -Connecticut, Inc. (ASI-CT) provides services to children and adults with developmental disabilities and/or serious mental illness. Our areas of expertise include behaviorally and/or medically challenged individuals as well as dual diagnosed individuals. We offer various supports including 24-hour residential support, individualized home support as well as employment and individual day supports. Individualized home supports include in-home family supports, in-home respite, as well as supporting individuals to live in their own apartments/homes. Most of the people we serve have difficulty with the demands of daily living. People we support are taught a variety of skills necessary for increased personal independence, growth, and dignity. Basic self-care skills, social skills, domestic skills, responsibility and self-direction are a few of the possible focus areas. Individuals have various opportunities to participate in community activities, develop friendships, and visit friends and families. The person and his/her family are encouraged to participate in the development of the individual's support services by participating in the development of their individual service plan and attending and participating in plan reviews. Our agency's mission is to support people to experience meaningful lives.

In order to ensure improvement in the provision of individualized support, several surveys have been implemented, including a Consumer Survey, a Family Satisfaction Survey, and a Funder Survey. These surveys offer the individual and the family additional opportunities to become involved in the development of support services and support the agency in providing continuous quality improvement in services. The people we serve, and their loved ones, consistently indicate very high satisfaction with our services. We are grateful for their support....and we work to earn their trust everyday.
