

**CH SOP-17- Validation of Methods**

*Approved by Director: Dr. Guy Vallaro*

Document ID: 1040

Revision: 1

Effective Date: 8/15/2014

Status: Retired

Page 1 of 1

- A. **Purpose:** To ensure that all standard methods employed in the chemistry/instrumentation sections are suitable for the customer request(s).
- B. **Responsibility:** Section analyst or designee
- C. **Procedure:**
1. All methods used to fulfill customer requests are deemed suitable by the section supervisor. This includes the range and accuracy of the results obtained being relevant to the customer's needs. All methods are based on standard methods described and developed by national organizations – eg. EPA, ASTM.
  2. Any new method must be validated according to the appropriate parameters. All documentation of the new method validation shall be saved in the section QC file. If possible, the reliability of the new method shall be compared to published results and become part of the validation file.
  3. Any changes to an existing method must be validated as above.
- D. **Documentation:** Section QC files
