Net Weight Worksheet   Case #:_____

                        Analyst**:** _____ Date: _____

Analytical Balances:
_____#9 Mettler AT261 _____#13 Mettler-Toledo AG _____#5 _____#11 DI TR-603d
_____#14 _____#15 Mettler-Toledo XS203S
_____ **The daily check weight was within acceptable limits.**

Item #	Weight of _____ (material) in grams	WE	Weight of Packages in grams (Package Type: _____)	WE	Elastic Weight (g)	WE

Gross weight of items (Wt. of Substance and packages) =	_____ grams , WE _____
Total weight of packages = average weight of packages x number of packages =_____ x _____	_____ grams
Total elastic weight number of elastics x average weight =	_____ grams
Net weight of items = (Total weight of items - total packaging weight = _____ = _____-_____	_____ grams

Weight Uncertainty for this item:
Number of relevant WE: _____ X laboratory calculated balance uncertainty _____ = _____
Reportable weight range:_____ to _____
☐ Calculation of uncertainty is not required for this item.

WE = Weighing Event
