1 INTRODUCTION

1.1 Purpose

- 1.1.1 The purpose of this training manual is to familiarize the trainee with the policies and procedures of the Controlled Substances (CS) Unit and to prepare the trainee to function as a Forensic Science Examiner within the unit.
 - 1.1.1.1 The term trainee refers to analysts (however titled) that are expected to show technical competency within their given discipline and is separate from the Connecticut Career Trainee title.
 - 1.1.1.2 This training procedure will be used in conjunction with a personal training plan which outlines specific tasks and goals per module.
- 1.1.2 After a trainee's successful completion of each training element, individuals gain confidence in the high standards of testing conducted at the laboratory.
- 1.1.3 Modules below are not all inclusive and additional training may be required at the discretion of the FSE2 or above.
- 1.1.4 Not all modules will be completed and are dependent on the position of the trainee within the unit. A training plan will be established detailing the exact modules to be completed.
- 1.1.5 The sequence in which the training is presented in this manual shall not be considered as the mandatory order of instruction and will be dependent on the needs of the unit.
- 1.1.6 Exposure to legal aspects and testimony will be continuous throughout the individual's training.
- 1.1.7 For the purposes of this procedure, an analyst is defined as a Forensic Science Examiner, Connecticut Career Trainee, Laboratory Assistant, or other applicable position.

1.2 Training and Learning Objectives

Approved by Director: Dr. Guv Vallaro

1.2.1 CS analysts acquire knowledge from many different mediums such as on-thejob training, seminars/lectures, workshops, scientific literature, online learning and professional conferences.

- 1.2.1.1 On-the-job training: There will be various components to the training including theoretical, practical, and competency testing.
- 1.2.1.2 Seminars, lectures, and workshops: Material from lectures, seminars, and workshops will be made available to all CS analysts.
- 1.2.1.3 Scientific literature: The analysts should keep current with advances in the field of controlled substances and new procedures outlined in scientific literature. New reading materials will be made available to all CS analysts.
- 1.2.1.4 Online learning: The analysts will be made aware of online opportunities for training such as webinars or online classes and are encouraged to participate.
- 1.2.1.5 Professional conferences: Each analyst should attempt to attend conferences related to the field of controlled substances when possible.

1.3 Coordination of the Training Program

- 1.3.1 The training mentor will be a FSE2 or above.
- 1.3.2 The training mentor will be responsible for the overall training of the analyst, but may delegate specific training responsibilities.

1.4 Training Documentation

- 1.4.1 During the employee's training, the trainee is responsible for maintaining all documentation regarding the analyst's progress.
- 1.4.2 At the successful conclusion of each training module, the training records (to include but not limited to training checklist, practical exam, written exam, training log and authorization documents) shall be scanned into the QMS.

	Revision: 1

Effective Date: 03/18/2024

Status: Published Page **3** of **10**

1.4.3 Analysts may not perform casework on a specific module until an authorization notification has been received.

1.5 Training Period

Approved by Director: Dr. Guy Vallaro

1.5.1 It is expected that the training period (including modules 1-7) of an analyst should not exceed one year.

2 COMPETENCY EVALUATION

- 2.1 Observations of Laboratory Exercises and Activities
 - 2.1.1 Trainees are required to observe authorized analysts, at minimum twice, completing applicable tasks.
 - 2.1.1.1 It is preferred that the trainee observes the training mentor at least once.

2.2 Practical Competency Tests

- 2.2.1 Practical exercises shall contain spiked samples (of known identity to the training mentor) and will be administered toward the end of each applicable module.
- 2.2.2 Practical competency tests are deemed successful when the analyte of interest is correctly identified.
 - 2.2.2.1 For quality control practical exercises, the achieved result shall demonstrate conformance with the quality control acceptability criteria as stated in applicable unit protocol.
- 2.2.3 Unsuccessful practical competency tests shall be reviewed by the training mentor or above to determine if additional training or if a review of subject material by the trainee is warranted.
- 2.2.4 If the review of the practical competency test warrants additional training, the Unit Manager(s) will be notified and additional training shall be administered. The trainee shall successfully complete another practical exercise to demonstrate their ability to perform the task.
- 2.2.5 If the expected result is not achieved on the second practical competency

test, the Unit Manager(s) will be notified.

2.3 Written Practical Examinations

- 2.3.1 A written practical examination is completed as part of the competency evaluation for all modules.
- 2.3.2 Examinations shall be distributed at the time of evaluation and shall be completed at the laboratory.
- 2.3.3 Written practical examinations administered as part of CS competency will be given in a "closed book" format, unless directed otherwise.
- 2.3.4 Examinations will be graded by the training mentor or above.
 - 2.3.4.1 Written examinations require a grade of 80% or better to qualify as successful completion.
 - 2.3.4.2 If 80% or better is not achieved or if there is demonstrated lack of understanding of key concepts, the trainee will be given the opportunity to expand upon their responses verbally (as documented by the training mentor) or in written form.
 - 2.3.4.3 If the explanation or further written form does not satisfactorily resolve the deficiencies identified in the written exam, the Unit Manager(s) will be notified and additional training will be undertaken.
 - 2.3.4.4 Upon completion of additional training, a supplemental exam will be administered.
 - 2.3.4.5 If a score of 80% or better is not achieved on the second written exam, the Unit Manager(s) will be notified.

3 MODULE 1: INTRODUCTION

- 3.1 Upon completion of this unit, the trainee shall be familiar with:
 - 3.1.1 The purpose of the training program including the proposed timeline of training and defined expectations

3.3.3 SWGDRUG Guidelines

4 MODULE 2: HISTORICAL OVERVIEW/UNIT OVERVIEW

- 4.1 Training Objectives:
 - 4.1.1 Upon completion of this unit, a trainee shall:
 - 4.1.1.1 Know the evolution of modern Forensic Science. This shall include an introduction to general forensic science through a web-based module, assigned reading, or a presentation by a supervisor.

NOTE: This training is to be provided if the trainee has not previously received this introduction during his/her undergraduate or graduate curriculum.

- 4.1.1.2 Understand the role of the analyst in a criminal case or investigation.
- 4.1.1.3 Be introduced to the application of ethical practices in forensic science court room testimony, and criminal and civil law
- 4.1.1.4 Be able to describe the functions and responsibilities of the CS Unit within the laboratory.
- 4.1.1.5 Be familiar with literature references available to the CS Unit.

5 MODULE 3: QUALITY CONTROL / EVIDENCE HANDLING

- 5.1 Training Objectives
 - 5.1.1 To familiarize the trainee with the following:
 - 5.1.1.1 Inventory and Ordering Supplies

CS 15 Training Manual Approved by Director: Dr. Guy Vallaro			Document ID: 37444 Revision: 1 Effective Date: 03/18/2024 Status: Published Page 7 of 10		
	5.	1.1.2 Refrigerators and Freezers (temp	erature logs)		
	5.	1.1.3 Balances (to include different type	pe of weighing events)		
	5.	1.1.4 Reference Standards			
	5.	1.1.5 Preparation and Verification of s	tandards, controls and reagents		
	5.	1.1.6 Measurement Uncertainty			
	5.	1.1.7 Procedure for obtaining CS evide	ence and key system

6.2 Readings

- 6.2.1 CS- 4 Sample Matrices
- 6.2.2 CS- 7 GCMS

Approved by Director: Dr. Guy Vallaro

7 MODULE 5: GAS CHROMATOGRAPHY/MASS SPECTROMETRY (GC/MS)

- 7.1 Training Objectives
 - 7.1.1 To familiarize the trainee with the following:
 - 7.1.1.1 Types of GC/MS used in the CS unit and how they are used
 - 7.1.1.2 Make and Model of the instrumentation used in the CS unit
 - 7.1.1.3 Use and operation of the instrumentation that is used in the CS unit
 - 7.1.2 Upon completion of this unit the trainee shall have an understanding of the following:
 - 7.1.2.1 The theory and operation of the GC/MS
 - 7.1.2.2 The basic components of an GC instrument and the function of each, including:
 - Injection port (split vs splitless for capillary GC)
 - Columns (packed and capillary columns, general properties and type of stationary phases)
 - Carrier gas consideration (helium vs hydrogen vs nitrogen)
 - 7.1.2.3 The function and theory of operation of the following components of the MS instrument:
 - Interfaces

- Ionization methods
- Mass analyzers
- Detector
- Vacuum systems
- Data system
- 7.1.2.4 How and when QC procedures should be performed.
- 7.1.2.5 Basic Maintenance/Troubleshooting (trainee shall also observe routine maintenance whenever possible)
- 7.2 Readings
 - 7.2.1 Required Readings
 - 7.2.1.1 CS-7 GCMS
 - 7.2.1.2 CAS-05 Procedures for Mass Spectral Comparisons
 - 7.2.2 Optional Readings
 - 7.2.2.1 Instrument operating manuals
 - 7.2.2.2 Troubleshooting and maintenance instructional videos provided by the manufacturer

8 MODULE 6: FOURIER TRANSFORM INFRARED SPECTROSCOPY (FTIR)

- 8.1 Training Objectives
 - 8.1.1 For the trainee to understand the fundamentals and operation of the FTIR.
 - 8.1.1.1 Know what the QC procedures are and when they should be performed.
 - 8.1.1.2 Know how to and be able to perform QC.

8.1.1.3 Basic Maintenance/Troubleshooting (trainee shall also observe routine maintenance whenever possible)

8.2 Readings

- 8.2.1 Required Readings
 - 8.2.1.1 CS-8
- 8.2.2 Optional Readings
 - 8.2.2.1 Instrument operating manuals
 - 8.2.2.2 Troubleshooting and maintenance instructional videos provided by the manufacturer (if available)

9 MODULE 7: MOOT COURT

- 9.1 Training Objectives
 - 9.1.1 Analysts will train to provide testimony and will understand the standard of care when expressing and conveying opinions and conclusions.
 - 9.1.2 To understand the role of the expert witness if court testimony is needed.
- 9.2 Case Testimony
 - 9.2.1 Provide moot-court experience, using a CS case to prepare for case testimony.
 - 9.2.2 Laboratory personnel may serve as both prosecution and defense attorneys.
 - 9.2.3 Experience may include voir dire, direct testimony, cross, re-direct and re-cross.
 - 9.2.4 Review and documentation of outcome by Unit Section Supervisor with analyst.

10 MODULE 9: EXAMPLE TRAINING PLAN
