Document Title: Sexual Assault Evidence Collection Kit Examination

Controlled: Yes, with red stamp present

Controlled By: Quality Manager

Prepared By: _____ Date: _____

Approved By: _____ Date: _____

A. PURPOSE:

To examine Sexual Assault Evidence Collection kits for the presence of semen, blood, saliva, trace materials and/or other body fluids. To collect and preserve samples for further analysis.

B. RESPONSIBILITY:

Forensic Science Examiners from the Connecticut State Forensic Science Laboratory who have been trained in the discipline of Sexual Assault Evidence Collection Kit examination according to SOP-FB-31 (Training Manual) and SOP-GL-4 (LIMS/Justice Trax).

C. SAFETY:

Use appropriate measures for the proper handling of Sexual Assault Evidence Collection Kits according to SOP-GL-2 (Safety Manual).

D. DEFINITIONS:

1. SAEC Kit: Sexual Assault Evidence Collection Kit
2. LIMS: Laboratory Information Management System

E. PROCEDURE:

SAEC kits will be examined and serological tests will be performed based on the examiner's knowledge, training and experience according to the submitting agency requests, case information and the condition of the evidence.

1. Disinfecting Utensils and Laboratory Areas
 - a. Disinfect utensils between each item or sample examined or handled with Conflikt® or 20% bleach followed by ethanol.
 - b. Disinfect other lab equipment, if used, with Conflikt® or 20% bleach. Do not follow with ethanol.
 - c. Disinfect laboratory surfaces between each kit examined as needed with 20% bleach or Conflikt®.
 - d. Replace examination paper between each kit examined.

E. 2. Evidence Retrieval

- a. Examiners will be notified of case assignments by a Forensic Biology Supervisor or the LIMS computer system according to SOP-GL-4 (LIMS/Justice Trax) and the Sexual Assault Evidence Collection Kit rotation.
- b. Examiners will retrieve evidence on a regular basis from the Evidence Receiving Unit through a secure transfer with the LIMS computer system according to SOP-GL-4 (LIMS/Justice Trax).
- c. Label the kit with the Lab ID #, submission # and examiner's initials.

3. Evidence Examination

- a. Document the package and evidence according to the Sexual Assault Evidence Collection Kit Quality Record Worksheet (FBQR-05).
- b. Record and date all written documentation and test results in blue ink on the SAEC Kit Worksheet.
- c. Attach photocopies of the medical report form and label information. Attach additional Quality Record worksheets and photographs/sketches as necessary.
- d. Inventory and label the items in the kit according to the SAEC Kit Worksheet. Include Lab ID #, item # and initials on each envelope/package.
- e. Item(s) that are received wet should be removed from the package and air dried. Once dry, the item may be examined or re-packaged until future examination.
- f. Preserve a sample of the known blood for further analysis according to SOP-FB-06 (Whole Blood Sample Preservation).
- g. Perform serological tests according to SOP-FB-07 through SOP-FB-17 (Forensic Biology Serological Tests) and SOP-FB-03 (Flow Charts).
- h. Sampling is conducted according to the substrate and the type and amount of sample present.

Sampling details will be included on the appropriate Quality Record Worksheet (FBQR-05) according to SOP-GL-1 (Quality Manual). These details will not be included with the results stated in the report.
- i. When appropriate, collect known samples, trace materials and blood and/or body fluid samples from the items based on the submitting agency requests, case information, type of evidence/samples(s) and number, size and quantity of sample(s).

- E. 3. j. Examine additional physical evidence, such as underpants, included in the SAEC kit according to SOP-FB-01 (Physical Evidence Examination).

- k. Designate the samples collected according to the SAEC Kit Worksheet and if necessary using the letter 'S' for the Forensic Biology Section with the corresponding sample number.
 - l. Place envelope(s)/package(s) back in the kit, re-seal and initial the seals. Store kit in a room temperature designated storage area.
 - m. Create samples collected from the items in the LIMS computer system according to SOP-GL-4 (LIMS/Justice Trax) using the designated sub-items.
 - n. Store samples in designated, secure and temperature appropriate areas or transfer to other sections/units of the Laboratory using the LIMS computer system according to SOP-GL-4 (LIMS/Justice Trax). Print the LIMS transfer sheets as needed. Record transfers to other sections/units on the Request for Examination Sheet (FBQR-10).
 - o. A secure and password protected LIMS computer system is used in accordance with SOP-GL-5 (Ethics).
 - p. The transfer of samples from laboratory cases which were opened prior to 1998, will be recorded on the Evidence Transfer Sheet (FBQR-11).
4. For additional information, refer to the Work Instructions described in SOP-FB-31 (Training Manual).
