

TITLE: Validation of Test Methods

A. PURPOSE:

To define a means by which new methods will be validated.

B. RESPONSIBILITY:

Trace Evidence Examiner

C. SAFETY:

None

D. PROCEDURE:

1. Before a new method is introduced a validation of the method will be performed. See the appropriate validation study.
2. All methods used to fulfill customer requests deemed suitable by the section supervisor (their designee or technical leader. This includes the range and accuracy of the results obtained being relevant to the customer's needs. All methods are based on standard methods described and developed by national organizations – eg. ASTM.
3. Any new method must be validated according to the appropriate parameters. All documentation of the new method validation shall be saved in the section QC file. If possible, the reliability of the new method shall be compared to published results and become part of the validation file.
4. Any changes to an existing method must be validated as above.
