

DNA WI-14 (Knowns from Personnel)*Approved by Director: Dr. Guy Vallaro*

Document ID: 936

Revision: 2

Effective Date: 04/06/2020

Status: Published

Page 1 of 1

As part of FBI QAS (Does the laboratory have a procedure for monitoring/detecting, cleaning and decontaminating facilities and equipment), individuals present at the time of DNA testing will provide a buccal swab (or other source) for DNA typing if their DNA profile is not already determined. All personnel in the DNA Section will have their DNA profile typed for all systems employed by the laboratory. DNA personnel will be typed for new DNA typing systems prior to the method being implemented for casework. All non-laboratory personnel will provide a known sample prior to observing DNA testing within the laboratory.
