

CC SOP-32 - NCMEC Requirements

Approved by Director: Dr. Guy Vallaro

Document ID: 1079

Revision: 2

Effective Date: 12/30/2015

Status: Published

Page 1 of 2

A. Purpose:

1. To outline the steps taken to submit images/videos to be reviewed for identified children by NCMEC.
2. To outline the steps taken to submit newly identified victim(s) to NCMEC.

B. Responsibility:

CCEEU forensic examiners.

C. Definitions/Abbreviations:

Refer to CC SOP-26 - Definitions and Abbreviations.

D. Procedure:

1. Burn an optical disk (CD/DVD) containing the images/videos to be sent to NCMEC or copy files to an alternate type of media if a greater capacity is required- ie. Thumb drive, hard drive.
2. Label the optical disk or alternate storage media with the appropriate NCMEC CD label template that has been filled in with the proper identifying information or manually record the proper identifying information on the alternate storage media to include Investigating Agency, Agency Case#, Laboratory Case#, Date and Content description.
3. Verify the information on the optical disk or alternate storage media and initial the "Verified:" area of the label to indicate the appropriate information is on the media.
4. Depending on the request(s), fill out the appropriate NCMEC paperwork that will accompany the optical disk or alternate storage media. This will be either one or both: "USPIS Template Letter-CRIS Reviews" (QR-CC-18) and/or "USPIS Template - Letter Identified Victim Submission" (QR-CC-19).
5. Place the optical disk or alternate media, as well as, the above paperwork in a CD mailer or other suitable container.
6. Create a sub-item barcode label following the steps outlined in JusticeTrax's help file under "Itemizing Evidence". Affix the label on the optical disk container or media container. Follow these criteria to generate the subitem:
 - a. Create the sub-item (child) within the first CCEEU submission (parent) in the case.
 - b. Use the sub-item numbering convention as outlined in SOP GL4 to generate the sub-item number. The sub-item syntax will be as follows: 001-C1, 001-C2, 001-C3, etc.
 - c. Give a general description of the sub-item in the "Description" field (i.e. - optical disk/alternate media - external hard drive containing images/videos for NCMEC). Do not reference child pornography in the description.
7. Seal the CD mailer or container securely with evidence tape.
8. Obtain a shipping envelope / container, a USPS Certified Mail Receipt and a Return Receipt and follow the steps outlined below:

- a. Fill out the required information on the postal shipping receipts and apply them to the shipping envelope/container.
- b. Record the Laboratory Case Number at the bottom of the postal Return Receipt.
- c. Transfer the barcoded optical disk container or media container to Evidence Receiving for mail transport to complete the chain of custody update.
- d. Place the optical disk/paperwork package in a shipping envelope and seal the envelope.
