CC Appendix A - FTK Imager Naming Conventions Document ID: 16831 Revision: 1 Effective Date: 08/11/2020 Status: Published Page 1 of 2

1) During the process of imaging using FTK Imager 3.x, the following dialogue box will appear:

Evidence Item Information	on	X
Case Number:		
Evidence Number:		
Unique Description:		
Examiner:		
Notes:		
	Back Next > Cancel He	elp
_		

- 2) Use the following conventions to fill in each field:
 - a) Case Number This will be the unique identifier for the case. It consists <u>only</u> of the Laboratory Case Number of the evidence being acquired.

For example: DSS-16-001234

- b) Evidence Number This will be the unique identifier for that particular piece of media. It can be the Laboratory Submission Number (for example: "001") or a sub-item number of the Laboratory Submission Number (for example: "001-1A").
- c) Unique Description This field should contain information about the particular piece of media. For example: Make, Model and Serial Number.
- d) Examiner This will be the name of the analyst acquiring the specific piece of media.

For example: "Jim Jackson", "Jane Smith" or "Johnson"

If two or more examiners share the same name they must be uniquely indentified.

For example: "Jim Jackson" and "James Jackson"

e) Notes - This filed is optional and may contain any information the examiner feels is relevant to the case.

CC Appendix A - FTK Imager Naming Conventions

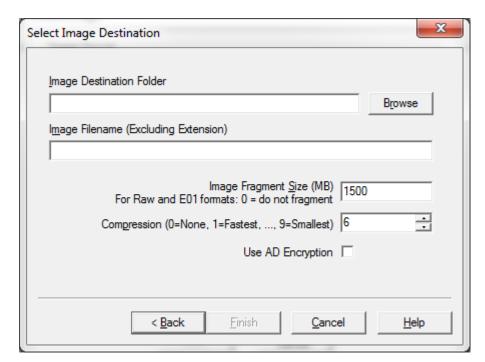

Approved by Director: Dr. Guy Vallaro

Document ID: 16831

Revision: 1

Effective Date: 08/11/2020

Status: Published Page 2 of 2

Referring to the screenshot to the left, the following naming conventions are used when acquiring digital media with FTK Imager 3.x:

- 1. In the Image Destination Folder field change the destination path to the established staging drive.
- 2. In the Image Filename (Excluding Extension) field, the naming convention will reflect the Submission # along with the media number based on how many pieces of the particular media type* there are. For example, if a computer is submitted as Submission #003 and it contains two (2) hard drives, the naming convention would be: S3 HD1 and S3 HD2. Meaning;
 - S3 equals Submission #003
 - HD1 equals Hard Drive 1
 - HD2 equals Hard Drive 2
- 3. All other fields may be defined based upon the examiner's requirements.
- * A complete list of abbreviations for the various types of media can be found in SOP-CC-31 Sub-item Labeling Standards.
