

*Approved by Director: Dr. Guy Vallaro*

The examiners of the Firearm and Toolmark Section of the laboratory will meet the minimal educational requirements established by standard laboratory guidelines and/or the required specialized core training and experience in the examination and comparison of firearms. To keep examiners abreast of current legal and scientific changes, efforts will be made to provide personnel with appropriate training and continuing education.

The training manual for the Firearm and Toolmark Section will be kept within the section.

The Quality Manager of the Forensic Science Laboratory will keep all of the training records on an individual examiner.
