

**QD SOP-21 Procedure for the Validation of a New  
Method or Technology**

*Approved by Director: Dr. Guy Vallaro*

Document ID: 2201  
Revision: 1  
Effective Date: 1/4/2016  
Status: Published  
Page 1 of 1

**Purpose:** Procedure for the Validation of a New Method or Technology

**Responsibility:**

Forensic Science Examiners assigned to the Questioned Documents Unit or performing casework in the Unit.

**PROCEDURE:**

1. Before a new method or technology is introduced a validation of the method will be performed. A plan of validation will be proposed to the Quality Section and Deputy Director prior to conducting the validation.
2. All methods used to fulfill customer requests deemed suitable by the section supervisor (their designee or technical leader. This includes the range and accuracy of the results obtained being relevant to the customer's needs. All methods are based on standard methods described and developed by national organizations – eg. SWGDOC.

In the case of a slight variation for a current method, the Unit will treat is as a deviation of testing and have the procedure approved by the technical responsibility and Deputy Director.

3. Any new method or technology that is to be added to routine casework must be validated according to the appropriate parameters. All documentation of the new method validation shall be saved in the Unit QC file. If possible, the reliability of the new method shall be compared to published results and become part of the validation file.
4. Any changes to an existing method must be validated as above.

**Sources of Error:** Not applicable
