## ENGINEERING BULLETIN

\_\_\_\_\_  
Division Chief of Traffic Engineering

### Revised Traffic Engineering Standard Sheets Issued

The following changes have been made to the Department's Traffic Engineering Standard Sheets:

The **TR-1001\_01, Trenching and Backfilling, Electrical Conduit** standard sheet was revised to update details and notes for interconnect, identification posts, and fill & overlay requirements.

The **TR-1002\_01, Traffic Control Foundations** standard sheet was revised to update dimensions for the controller type IV foundation. The concrete class has been replaced with Portland Cement Concrete for the precast foundations. The cast in place controller foundation details were removed.

The **TR-1010\_01, Concrete Handhole** standard sheet was revised to update details and notes for handholes and handhole covers. The concrete class has been replaced with Portland Cement Concrete for all precast handholes.

These Standard sheets are now available online at the Department's [Traffic Engineering Standard Drawings web page](#) and should be used on all projects, effective immediately.
