

**SECTION 8.19**  
**PENETRATING SEALER PROTECTIVE**  
**COMPOUND**

**8.19.01--Description:** This item shall consist of furnishing and applying a protective compound to those surfaces indicated on the plans or where directed by the Engineer.

**8.19.02--Materials:** This item shall conform to M.03.02.

**8.19.03--Construction Methods:** All surfaces to be coated shall be thoroughly cleaned of dust, dirt, oil or other objectionable material prior to application of the protective compound.

Surface preparation, minimum number of days between casting of concrete and application of protective compound, number of coats, rate of coverage, method of application, and other pertinent criteria shall be in strict accordance with the printed instructions supplied by the manufacturer and as directed by the Engineer.

**8.19.04--Method of Measurement:** Penetrating sealer protective compound will be measured by the square meters of actual surface area designated to be coated, except for those items that the specifications or plans designate that the protective compound will be included in the cost of the item to be coated.

**8.19.05--Basis of Payment:** This item will be paid for at the contract unit price per square meter of "Penetrating Sealer Protective Compound" complete in place, which price shall include all materials, equipment, tools and labor incidental thereto.
