SECTION 1

CT 2014 MOTORCYCLE SAFETY OVERVIEW

Motorcycle Safety

The general goal of Connecticut's Motorcycle Safety Program is to reduce the number of injuries and deaths among motorcycle operators and passengers. Performance goals set during the previous planning period included:

- To decrease the number of un-helmeted fatalities below the three year (2009-2011) moving average of 29 in 2011 by 5 percent to a three year (2013-2015) projected moving average of 28 in 2015.
- To decrease the number of fatalities below the three year (2009-2011) moving average of 44 in 2011 by 5 percent to a three year (2013-2015) projected moving average of 42 in 2015.
- To decrease the percentage of fatally injured motorcycle operators with BACs greater than 0.00 below the three year (2009-2011) moving average of 42 percent in 2010 by 5 percent to a three year (2013-2015) projected moving average of 40 percent in 2015.

The latest available data from 2013 indicates that the three year moving average of un-helmeted fatalities is 24 (graph 8). During the same time period, the three year moving average for fatalities was 48 (graph 8). Un-helmeted fatalities over the last three years have shown a small decline while overall motorcycle fatalities have shown a slight increase in relation to total fatalities at 19 percent (48 out of 258).

This data also indicates that in 2013, 11 percent of the fatalities tested had a BAC greater than 0.00. (Graph 9) *The preliminary value of 11% is under-reporting the number of motorcycle operators killed with a BAC greater than zero. This number is expected to increase as FARS cases are finalized. The 2012 value of 29% is likely to increase as well.

During Fiscal Year 2014, DOT's Connecticut Rider Education Program (CONREP) continued motorcycle rider safety training at 15 site locations throughout the State. Each location offered the Basic Rider Course (beginner), Intermediate Rider Course, and Experienced Rider Course. In 2014 CONREP continued a pilot program offering an additional course targeting advanced and sport bike riders who are over represented in State crash data.

To assure quality control, CONREP Instructors monitored the program under the supervision of three chief instructors. Preliminary data for 2014 indicates 5,055 students were enrolled in 505 Connecticut Rider Education Program courses. Student tuition and motorcycle registration fees collected from Connecticut motorcyclists provided the majority of funding for the training program.

CONREP Instructors attended an annual curriculum update in February to address issues found during the years' quality assurance visits. New Motorcycle Safety Foundation Curriculum, classroom techniques and an open question and answer session were covered. 150 CONREP Instructors attended the update which was held at Central Connecticut State University in New Britain, Connecticut.

CONREP Instructors attended an annual curriculum update in March to address issues found during the years' quality assurance visits. New Motorcycle Safety Foundation Curriculum, classroom techniques including self assessment and traction control were covered. 150 CONREP Instructors attended the update which was held at Central Connecticut State University in New Britain, Connecticut.

In January 2011, newly enacted state law required motorcycle operator safety training for all new license applicants. CONREP saw a 10% dip in Basic Rider Course participation in 2014 training 4922 students, or 97% of total students trained. The remaining 3% were IRC, ERC and ARC students.

Providing public information and education materials that promote safety is an important component of the motorcycle safety program. Motorcycle organizations and several Connecticut motorcycle dealerships helped in this effort by distributing the materials. The materials included information on training course availability, safe riding gear, alcohol and/or drug impairment, safe riding tips, and motorist awareness of motorcycles. One popular item was the State motorcycle-specific map that incorporates NHTSA motorcycle safety educational information. CONREP was also represented and promoted at several grassroots events. Preliminary estimates indicate that over 10,000 Connecticut motorcyclists received NHTSA and State motorcycle safety education and rider impairment informational materials during this reporting period.

CONREP previously used NHTSA funding to purchase two Safe Motorcyclist Awareness and Recognition Trainers (SMARTrainer). The SMARTrainer is an advanced, interactive instructional tool with standard motorcycle controls and realistic traffic situations. The SMARTrainer leads a rider through a computer simulated ride designed to develop and apply risk-management and crash avoidance strategies.

Instructors received training on SMARTrainer procedures and instructional applications. This team conducted successful presentations at numerous grassroots events throughout the State. Approximately 30 events took place over the course of the year, where over 1,200 people participated in the SMARTrainer exercises.

A successful statewide campaign, "None for the Road," continued to address motorcycle rider impairment and the impact of alcohol, drugs, and fatigue on riding ability. Funded by a NHTSA grant, the campaign was developed to increase awareness of the dangers of riding impaired, with a focus on fatal injuries, and to encourage safe motorcycle riding practices. The campaign web site (www.ride4ever.org) contains impaired riding messages and includes downloadable ride maps, digital postcards, and articles. The site showed 25,000+ visits over the course of the year, with the bulk of them coming in the spring and summer. Partners in this Program include the American Motorcyclists Association, and the Connecticut Motorcycle Riders Association. The campaign continued throughout the year with public service announcements and campaign message events at motorcycle gatherings.

CONREP received second year 405(f) motorcycle safety funding from NHTSA. These funds were programmed to support the expansion of motorcycle rider training courses during 2014. This includes the addition of new motorcycles and other training equipment necessary to allow the program to offer more safety classes for novice riders. Additional funding will also be reserved to support our efforts to reduce rider impairment fatalities.

During 2014, approximately \$237,754 of federal funds Section 402, \$1,438 of federal funds section 405(f), \$168,468 in federal carry forward funds 2010 and a combined \$1,146,242 from both Connecticut's Motorcycle Safety fund and CONREP course fees were spent to accomplish these activities.

Graph 8

Graph 8 shows Connecticut's motorcyclist fatalities. Both the number of fatalities as well as unhelmeted fatalities are shown. There were 58 motorcyclist fatalities in 2013, 22 of which were unhelmeted. The graph data has been updated to reflect current numbers and may not correspond with some previously reported data.

2014 HSP Goal(s):

To decrease the number of motorcyclist fatalities below the three year (2009-2011) moving average of 44 in 2011 by 5 percent to a three year (2013-2015) projected moving average of 42 in 2015.

Outcome:

Both measures have fluctuated, but show a slight decrease in their three-year moving averages over the reporting period. The three-year moving average for motorcycle fatalities for 2010-2013 is 48 and the three-year moving average for unhelmeted fatalities for the same period is 24.

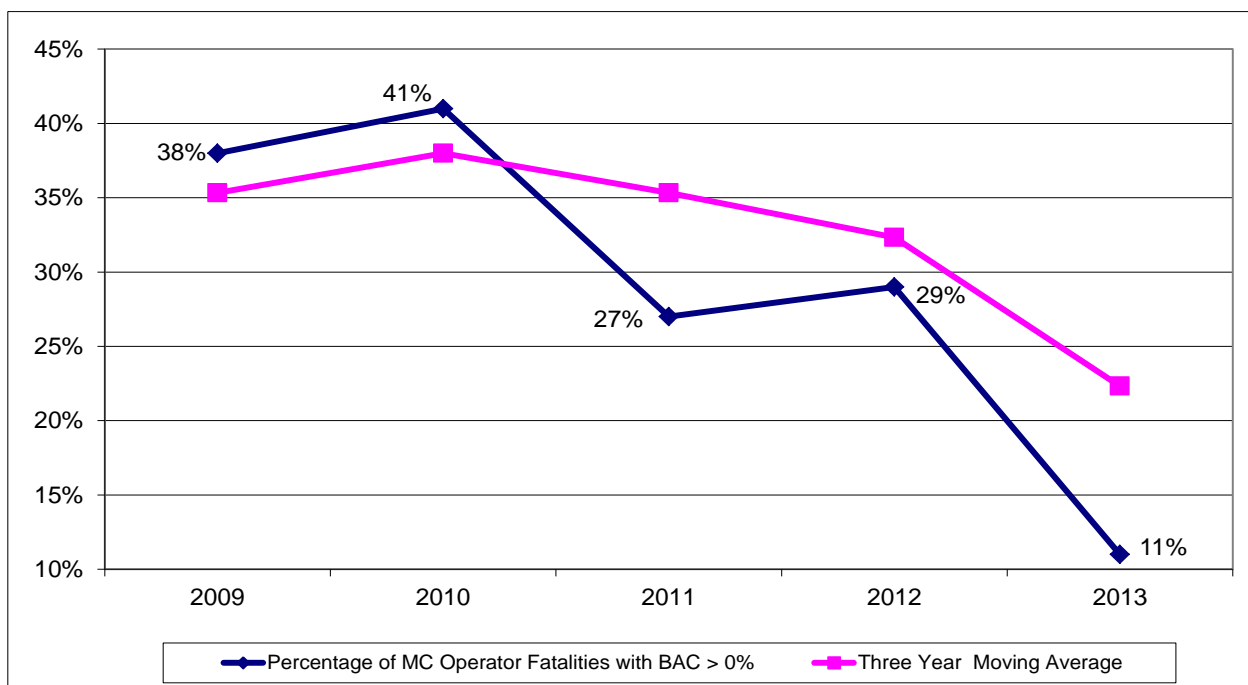

Please note that data in this Report is sourced from the preliminary 2013 Connecticut FARS Annual Report file. The data will be updated again in accordance with NHTSA-FARS standards and changes may be reflected during this update.

Graph 9

Graph X shows Connecticut's motorcyclist fatalities with a Blood Alcohol Content (BAC) greater than zero; 11* percent of all fatally injured motorcyclists had a positive BAC in 2013*. The graph data has been updated to reflect current numbers and may not correspond with some previously reported data.

2014 HSP Goal(s):

To decrease the percentage of fatally injured motorcycle operators with BACs greater than 0.00 below the three year (2009-2011) moving average of 42 percent in 2010 by 5 percent to a three year (2013-2015) projected moving average of 40 percent in 2015.

Outcome:

*The preliminary value of 11% is under-reporting the number of motorcycle operators killed with a BAC greater than zero. This number is expected to increase as FARS cases are finalized. The 2012 value of 29% is likely to increase as well.

Please note that data in this Report is sourced from the preliminary 2013 Connecticut FARS Annual Report file. The data will be updated again in accordance with NHTSA-FARS standards and changes may be reflected during this update.
