## Investing in Connection

### The Metro-North Railroad

Since 2021, **AT&T has invested more than \$6 million** in our communications infrastructure along the Metro-North Railroad route from New Haven to the border of New York.

The project is providing a mix of 4G LTE and 5G service to customers on the Metro-North Railroad route from New Haven to the border of New York. The macro towers are also equipped with Band 14, providing first responders and public safety on FirstNet®, Built with AT&T, the dedicated coverage and capacity they need, when they need it most.

### Connecting the Metro-North

On-air and planned sites along the Metro-North Railroad route from 2021-EOY 2025
