

# Chapter 8 - Minimum Schedule for Acceptance Testing

Legend	
<b>Section</b>	Standard Specification Section.
<b>Item</b>	The Contract Item number where the first four digits contain the parent Standard Specification Section number.
<b>Item Description</b>	Generally the overall subject of the Standard Specification Section and the Contract Item.
<b>Item Unit</b>	Generally the pay unit of the Contract Item.
<b>Material Code</b>	Code used in AASHTOWare to identify component materials used in Contract Items.
<b>Material Description</b>	Definition of the Material Code.
<b>Material Unit</b>	Unit of Material that defines a quantity.
<b>Acceptance Method</b>	Required documentation, sampling, inspection or test. See Acceptance Method table below.

<b>Document Type</b>	<b>Daily Work Report (DWR)</b>	A record is created in the acceptance action tab on a DWR. Project Staff is responsible for recording and processing DWR materials.
	<b>Sample Record</b>	MESU is responsible for processing Sample Record materials in AASHTOWare
<b>Frequency (minimum)</b>	Quantity	1 per quantity indicates that all quantity of each type (size/shape/composition) of material from a single Source of Supply (defined in Section 1.06.01) must be represented on a single or multiple Sample Records. Sample Record(s) total represented quantity must match total quantity installed.
	Project	1 per project indicates 1 DWR acceptance record is required per Source of Supply (defined in Section 1.06.01). The entire quantity of material for the Project needs to be accounted for on a single or multiple DWR acceptance records when a Materials Certificate and/or Certified Test Report is required for that material.
<b>Sample Size</b>	Size of required physical sample.	
<b>Notes</b>	Additional requirements per material. See Notes table below	

Acceptance Method	
<b>FLABT</b>	Field and Laboratory Testing
<b>FLDT</b>	Test performed in the field
<b>INSMCT*</b>	Project Visual, MESU Fabrication Shop inspection, MCCTR
<b>LABT</b>	Laboratory Test (Physical Sample Required)
<b>LMCT*</b>	Laboratory Test, Materials Certificate and Certified Test Report
<b>MC*</b>	Materials Certificate
<b>MCCTR*</b>	Materials Certificate and Certified Test Report
<b>NEPCOAT</b>	North East Protective Coating Committee QPL
<b>PC-1</b>	Self Certification from producer supplied per shipment
<b>QPL/MC*</b>	Qualified Product List and/or Materials Certificate
<b>VISUAL</b>	Project Inspector must visually inspect upon delivery/installation. Visual inspection by MESU staff denotes witnessing fabrication of material where it is being fabricated. Documentation of visual inspection by project staff is in accordance with District/Office of Construction policies.

\*Materials Certificates and Certified Test Reports must comply with Standard Specification Section 1.06.07. Note: Materials Certificates for items composed of, or containing, steel or cast iron must also indicate where the steel and cast iron was produced and fabricated.

Notes	
1	Chemical test is required
2	Contractor in-place density testing at a sufficient frequency determined by Project
3	No. 3 Stone only
4	Project staff must register paving operations 24 hours prior to paving using PaveTrack. 1 random physical sample per 500 ton sub-lot (M.04.03-2c). Vendor in Place (VIP) DAS contracts: Sample Record submitted at completion of termini. All other projects: Sample Record submitted monthly when quantity is greater than zero and to cover quantity determined by 4.06.04-1.
5	Total Bid Quantity >=1,000 gallons: For each construction season, 1 random physical sample needed for every 10,000 gallons. Submit Sample Record w/ attached Bill of Lading, Materials Certificate, & Certified Test Report Total Bid Quantity <1,000 gallons: No physical sample required, submit Sample Record w/ attached Bill of Lading, Materials Certificate & Certified Test Report (for each construction season)
6	Item is Labor only if reusing materials within Project limits. If new materials are needed, follow the material requirements for the corresponding item.
7	Notify MESU (DOT.Steel@ct.gov or DOT.Precastconcrete@ct.gov) prior to fabrication to schedule plant inspection. Submit Sample Record after items are inspected and cast dates for precast items are verified by project staff upon delivery. Record precast structure cast dates in "remarks" section of Sample Record.
8	PC1 for item will cover frames and grates if incorporated into precast items. Material Certification applies when material is not integral with a precast item.
9	Materials Certificate must indicate conformance for entire assembly including, but not limited to, base, shaft, bracket arm, galvanized coating and deflection testing (if required).
10	Check specifications for strength requirements and if cubes or prisms are needed. Mortar must meet C1714 or C387; Grout must meet C1107.
11	Include all hardware. For sign posts, if using a breakaway sign base submit the QPL and/or Materials Certificate with the Sign Post Sample Record.
12	Source testing of material is the responsibility of the Contractor and testing documentation may be requested by the Project
13	Materials Certificate must indicate conformance for precast unit. Certified Test Report must indicate conformance for steel pieces.
14	Plastic single-use molds (preferably 6"x12") to be pre-cut with two opposing vertical slits, keeping the base intact. Prior to sampling, mold shall be reassembled using strong adhesive tape on the slits. After sampling, place a labeled, tight-fitting cap on mold. Store sample in accordance with ASTM C31.
15	The Federal Aid Eligibility letter issued to the Manufacturer, documenting that the device complies with the requirements of the NCHRP Report 350 (TL-3) or the AASHTO MASH (TL-3) shall be kept in project files.

**SPECIAL NOTE:** This schedule is preliminary and for reference only. The minimum schedule of acceptance testing will be determined by comparing this list to the Contract requirements. At the time of project initiation, the project Inspector must review the project requirements and coordinate with the Project Engineer and MESU to determine the Project minimum schedule of acceptance testing based on the standard and special provision items. The list established at the initiation of the project will be the minimum acceptance testing for original contract items. As the project progresses the District is responsible to coordinate with the MESU for original item material codes that are not to be used (as approved by the project engineer) and for each change order item added to address required acceptance testing to be included in the CMRS.

**MINIMUM SCHEDULE FOR ACCEPTANCE TESTING  
STANDARD ITEMS**

Section	Item (all Items may not be listed)	Description	Item Unit	Material Code	Material Description	Material Unit	Document Type	Acceptance Method	BABA Requirement	Frequency (Min. 1 per) [See Legend]	Sample Size	Contact	Notes
