Water Pollution Control Item Design and Estimating Guidance

This Bulletin provides notification that the Water Pollution Control item is being reinstated as a special provision to eventually become a Standard Item. The new Special Provision for Item #[0210821A - Water Pollution Control](#) has been posted to the [Owned Special Provisions](#) webpage. It will be owned by Andrew Piraneo of the Office of Environmental Planning.

This item, with pay unit of “est.,” is to be used when items for Earth Excavation and Clearing and Grubbing are included in a Project. Designers are to use 2.5% of the combined estimated dollar values of Earth Excavation and Clearing and Grubbing to determine an estimated value for Water Pollution Control. The minimum estimated cost will be \$1,000.00.

Note: The pay unit is “est.” and shall not be included on the Detailed Estimate Sheets.
