Any program on this list may be counted as continuing medical education by certified EMS personnel seeking renewal of certification. The provider of such program does NOT need to be a certified EMS instructor, but must be certified by the "Program Sponsor" or otherwise qualified to provide such training. When applying hours towards minimum topic requirements, the attendee should use best judgement for category assigment. For example, a Homeland Security course could be applied to Operations or to the flexible CME category.

CT Fire Academy programs listed here represent the maximum number of hours that may be applied to EMS after completing the full program. For example, the Core Rescue Program is 48 hours in length, however only 10 hours may be counted towards EMS certification.
