

Connecticut Vaccine for Adults (CVFA) Program Patient Eligibility Screening Record Cheat Sheet

The Department of Public Health (DPH) operates the Connecticut Vaccines for Adults (CVFA) Program, which provides certain adult vaccinations at no cost to healthcare providers for uninsured adults ages 19 years and older. Vaccines purchased and administered through this program are funded using limited federal 317 funds.

- a. Row (H) below is the only CVFA eligible category.

Adult eligibility categories:	Typical EMR/EHR categories:	HL7 code for vaccine funding program eligibility category:	HL7 code for vaccine funding source:
(H) Is uninsured or underinsured	<ul style="list-style-type: none"> • Uninsured - Adult • 317- Adult • Underinsured - Adult 	<p>V23: 317 Adult All of the following are true:</p> <ul style="list-style-type: none"> • Patient does not have health insurance • Patient has insurance but insurance does not cover vaccines, limits the vaccines covered, or caps vaccine coverage at a certain amount • Patient is ≥ 19 years old 	VXC50: Public Blended CVP
Other Adult Patient Eligibility/HL7 Categories			
(I) Is enrolled in Medicare	<ul style="list-style-type: none"> • Medicare • Insured ≥ 65 	<p>V24: Medicare</p> <ul style="list-style-type: none"> • Only for patients ≥ 65 years old 	PHC70: Privately purchased vaccine
(J) Is privately insured, (includes Medicaid insurance but not Medicare)	<ul style="list-style-type: none"> • Not VFC eligible • Private Insurance • Insured 19-64 	<p>V01: Not VFC or VFA eligible</p> <ul style="list-style-type: none"> • Patient has private insurance • AND patient is ≥ 19 years old 	PHC70: Privately purchased vaccine
(K) Insurance status not checked	<ul style="list-style-type: none"> • Unknown 	<p>V00: VFC eligibility not determined/unknown</p> <ul style="list-style-type: none"> • Patients ≥ 19 years old and eligibility is not determined in the EHR. 	PHC70: Privately purchased vaccine

How to use this guidance:

- Your clinic or EHR vendor should use this guidance document to **map the vaccine funding in your Electronic Health Record (EHR) to ensure your clinic is accurately screening and documenting eligibility of the patient at the dose level.**
- If your EHR set a default eligibility category based on your enrollment population (found in CT WiZ under Clinic Tools – Enrollment – click Print – view your Provider/Clinic Population to see which category has the most patients), please be sure to screen every time you administer a vaccination and update the **eligibility at the dose level** as each patient and dose may not fit your default setting.
- If you enter directly in the CT WiZ User Interface, [click here](#) for training to ‘add and administer’ vaccines and **update the eligibility on each dose.**
- If you need assistance, please submit a [Help Desk Ticket](#) – select Immunizations (CT WiZ).

Note: Reporting eligibility is required for all vaccines administered. See FAQ [How do I report Funding Eligibility and Funding Source \(ct.gov\)](#) for ALL ages for ALL vaccines administered.
