Subject: Td Vaccine Update & RSV Ordering Reminder

January 3, 2025

This communication is being sent to all key contacts at provider organizations enrolled in the pediatric CT Vaccine Program (CVP) – please read this message in its entirety. Please feel free to share it with others in your organization who may benefit from the update. Note that all our communications are archived on our web site [here](#).

Dear CVP providers,

The purpose of this communication is to inform you of the status of the supply of Tetanus diphtheria (Td) vaccine and the upcoming change for ordering RSV (Beyfortus).

Td Vaccine

Following MassBiologics' Td vaccine discontinuation, CDC put ordering controls into place for all Td vaccines beginning in February 2024. Sanofi has notified CDC that they have increased their supply of Td vaccine and are now able to support historical demand for the full Td market.

As of January 1, 2025, only Sanofi's Td vaccine brand name Tenivac (NDC# 49281-0215-15) is available for ordering through the CVP.

RSV Ordering

All RSV can now be placed directly in CT WiZ. Please refer to the [communication](#) previously sent which includes all allocation dates. If you have any questions regarding RSV ordering or supply, please submit a [help desk ticket](#).

Thank you for your continued support and cooperation.
