

Connecticut nursing homes are required by the Connecticut Department of Public Health (DPH) and the Centers for Medicare and Medicaid Services to report on the impact of COVID-19 on their residents and staff through CDC’s National Healthcare Safety Network (NHSN). This reporting is intended to reflect recent COVID-19 activity in nursing homes.

The DPH weekly nursing home report uses data submitted to NHSN, which reflects the number of cases and deaths related with COVID-19 that occurred in the past week among both residents and staff. CT DPH began reporting NHSN data from June 17, 2020. Cumulative data for residents was rebaselined on July 15 and again on July 21 to account for false positives detected that week. Due to differing data collection and processing methods between NHSN and the data sources used previously DPH does not add the data before and after rebaselining due to the possibility of duplication of cases and deaths among prior and current data. Note that the data reported are current for the week of reporting and CT DPH is continuously updating and correcting any reporting errors.

Confirmed is defined as having positive laboratory test for COVID-19. This may include both those with and without symptoms of COVID-19. *COVID-related deaths* are defined as persons with suspected or laboratory positive COVID-19 who died.
