COVID-19	6 months–18 yrs	YES	YES	YES	YES	91304, 91318, 91319, 91320, 91321, 91322

- VFC eligibility is as follows: (a) Medicaid enrolled; (b) uninsured; (c) American Indian/Alaskan native; or (d) underinsured seen at an FQHC.
- Non-VFC children refers to patients who have private insurance that covers the cost of immunizations, patients that are under-insured for some or all vaccines seen by a private provider; and S-CHIP children (those children enrolled in HUSKY B).
- Td vaccine can be given to children 7-18 years of age to complete their primary series, or to those children 7-18 years of age who need a tetanus containing vaccine and cannot receive Tdap.

As of July 1, 2023, the only childhood vaccine not universally available from the CVP is HPV for privately insured patients 9 & 10, & 15 & 16 years of age. Providers can purchase this vaccine privately and submit billing requests to the appropriate insurer in accordance with normal billing procedures.
