Dear CVP providers,

Based on feedback from COVID-19 vaccine manufacturers, the CVP and the Centers for Disease Control and Prevention (CDC) anticipate that COVID-19 vaccines for all age groups will continue to be available for order until the end of the 2023–2024 season. However, as manufacturers prepare for the 2024–2025 season, the availability of specific products and brands through the CVP may be limited.

Specifically, product availability is expected as follows:

- **Novavax:** Latest 2023–2024 expiry is May 31, 2024. This vaccine is unavailable to be ordered at this time.
- **Pfizer:** The inventory of the 6 months through 4 years of age formulation has been depleted. CDC estimates supply will run out during May to June for the 5 through 11 years of age and 12 and older formulations. The CVP will continue to provide orders until Pfizer's inventory is depleted.
- **Moderna:** 6 months through 11 years of age and 12 and older formulations can continue to be ordered.
