Acting Executive Director

Dear Ms. Bachman,

I have recently received notification that a company, identified as Chatfield Solar Fund, LLC, is planning to install a "2.35 megawatt ground mounted solar photovoltaic system, electrical interconnection, and associated equipment". This installation is being planned for a 25 acre parcel of land located on Route 80 in Killingworth. The notice further states that the company will be seeking the Siting Council's approval for this installation. I have found their filing on your web site identified as Petition Number 1354.

I am very concerned about this since my property borders this parcel on two sides and would like to be involved in any discussions or deliberations that you may have regarding this matter. I am further concerned since the owners of the property were previously in the solar installation business, doing business as Befree Solar, but seem to no longer be in business. I would request that the Siting Council research them and their business practices. Further I would request that the Siting Council research the business practices of the parent company of the entity that is proposing to do the installation of this project.
