Lat: 41-24-56.99 (41.41583056)
Long. 73-24-05.28 (-73.40146667)

Dear Ms. Bachman:

AT&T Wireless currently maintains a wireless telecommunications facility located on an existing utility transmission tower at 7 Stoney Hill Road in Bethel, CT. The tower is owned by the Eversource. The property is owned by the Target Corporation. A fenced equipment compound is situated on grade on the southwestern side of the utility pole. AT&T Wireless now seeks to install new fiber optic cable at this site, which requires placing new 4" conduit 200 feet from a utility pole on the northeastern area of the northern lot line to the existing hand hole, then placing innerduct from the hand hole to the Hoffman Box, and then running new 2" PVC conduit 60 feet from the Hoffman Box to the proposed new Purcell cabinet, and running Maxell Tape 10 feet from the power to the Purcell cabinet. A new Purcell FLX16WS cabinet is proposed to be located on a new 4-foot by 4-foot concrete pad in the equipment compound. A 4-foot by 4-foot section of the existing cement sidewalk near the utility pole will be replaced to accommodate the proposed new conduit.

No work or alterations will be performed on the tower or on any equipment attached thereto. Empire Telecommunications USA LLC has been tasked with laying the infrastructure for the new fiber optic cable; actual installation of the new fiber optic cable will be performed by a cable provider at a later date.

As shown on page C-2 of the enclosed drawings, the Purcell cabinet has dimensions of 30' tall by 25" wide by 27.12" deep. A proposed plinth for the cabinet will raise the height to 44" on-grade.

The facility was approved by the Connecticut Siting Council in EM-CING-009-160322 on April 11, 2016. Six (6) conditions were enumerated in the Council's decision: 1) Any deviation from the proposed modification as specified in this notice and supporting materials with the Council shall render this acknowledgement invalid; 2) Any material changes to the modification as proposed shall require the filing of a new notice with the Council; 3) Within 45 days after the completion of construction the Council shall be notified in writing that the construction has been completed; 4) Any nonfunctioning antenna and associated antenna mounting equipment on this facility owned and operated by New Cingular Wireless, PCS, LLC shall be removed within 60 days of the date the antenna ceased to function; 5) the validity of the action shall expire one year from the date of the letter; 6) The applicant may file a request an extension of time beyond the one year deadline provided that such a request is submitted to the Council not less than 60 days prior to the expiration.

Please accept this letter as notification pursuant to Regulations of Connecticut State Agencies section 16-50j-73 for construction that constitutes an exempt modification pursuant to RCSA section 16-50j-72(b)(2). In accordance with RCSA section 16-50j-73, a copy of this letter and attachments is being sent to the Honorable Matt Knickerbocker, First Selectman of Bethel; Beth Cavagna, the Director and Town Planner of the Bethel Land Use Department; to Eversource, the tower owner, and to the Target Corporation, the property owner.

The planned modifications to the facility fall squarely within those activities expressly provided for in RCSA section 50j-72(b)(2).

1. The proposed modifications will not result in an increase in height of the existing structure.
2. The proposed modifications will not require an extension of the site boundary.
3. The proposed modifications will not increase noise levels at the facility by six decibels or more, or to levels that will exceed state and local limits.
4. The operation of the replacement antennas will not increase radio frequency emissions at the facility to a level at or above the Federal Communications Commission safety standard.
5. The proposed modifications will not cause a change or alteration in the physical or environmental characteristics of the site.
6. The existing structure and its foundation can support the proposed loading.

For the foregoing reasons, AT&T Wireless respectfully submits that the proposed modifications to the above referenced telecommunications facility constitute an exempt modification under RCSA section 16-50j-72(b)(2).
