RE: EM-AT&T-164-180830 - AT&T Mobility notice of intent to modify an existing telecommunications facility located at 340 Bloomfield Avenue, Windsor, Connecticut.

Dear Ms. Love:

The Connecticut Siting Council (Council) received a notice of intent to modify the above-referenced facility on August 30, 2018.

According to Section 16-50j-71 of the Regulations of Connecticut State Agencies, "...any modification, as defined in Section 16-50j-2a of the Regulations of Connecticut State Agencies, to an existing tower site, except as specified in Sections 16-50j-72 and 16-50j-88 of the Regulations of Connecticut State Agencies, may have a substantial adverse environmental effect."

Staff has reviewed this exempt modification request for completeness and has identified a deficiency in the above request for exempt modification. The cover letter states that the request is for a 20kW natural gas fueled generator. However the generator specification sheet indicates a 20kW diesel fueled generator while the wiring diagram on sheet E-1 of the Site Plan indicates a 30kW generator. The above referenced request for exempt modification contains conflicting information.

Therefore, the exempt modification request is incomplete at this time. The Council recommends that General Dynamics provide clarification on the conflicting information highlighted on or before September 18, 2018. If additional time is needed to gather the requested information, please submit a written request for an extension of time prior to September 18, 2018.

This notice of incompleteness shall have the effect of tolling the Federal Communications Commission (FCC) 60-day timeframe in accordance with Paragraph 217 of the FCC Wireless Infrastructure Report and Order issued on October 21, 2014 (FCC 14-153).

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

[Handwritten signature of Melanie Bachman]
