Robert Stein
Chairman
Connecticut Siting Council
Ten Franklin Square
New Britain, CT 06051

Re: Bridgeport 115-kV transmission line upgrade project
The United Illuminating Company
Environmental Inspection Report on Behalf of the Connecticut Siting Council

Dear Chairman Stein:

Pursuant to the Connecticut Siting Council's ("CSC") approval of Petition 1176, please find outlined below and attached, The United Illuminating Company's ("UI") bi-weekly compliance summary for the construction of the Bridgeport 115-kV transmission lines and the replacement of the existing 115-kV transmission line structures from Baird Substation in Stratford to Congress Street Substation in Bridgeport.

- Management of soil and groundwater pursuant to UI's Soil & Groundwater Management Plan
- Weekly inspections of sediment and erosion controls on work areas and structures pursuant of the UI – Baird - Congress Stormwater Pollution Control Plan and Registration with CT DEEP (Reg. # GSN003025)

As also required by the CSC, a copy of our Environmental Inspection Report(s) must be provided to the Mayors of Bridgeport and Stratford (submitted separately). At the request of UI representatives, a copy of the report also is being provided to you. Accordingly, the enclosed report documents the environmental inspections during construction activities along the Metro-North Railroad corridor between UI's Baird Substation and Congress Street Substation.

Should you have any questions regarding the report, please do not hesitate to call me at 203.926.4792.

Sincerely,

Chris Hughes, Project Manager

Enclosure

cc: The Honorable, Mayor Joseph P. Ganim, City of Bridgeport
The Honorable, Mayor John A. Harkins, Town of Stratford

Bridgeport 115-kV Transmission Line Upgrade Project
CSC Bi-Weekly Construction Report
3/1/17 to 3/15/17

OVERHEAD

The contractor finished building access roads and work pads. Structure foundations from 805S to 813S were all drilled and poured.

Finished pad at 788N and drilling 810AS

SUBSTATIONS

Congress Substation

No construction activity at the Congress Substation.

Baird Substation

No construction activity at the Baird Substation.

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**791S:**

- Silt fencing has been installed along the northern side of the site; 5' x 40' disturbance area associated with silt fence installation
- Stake has been set in existing gravel parking lot to identify drill location; No disturbance associated with work pad
- No activity / No issues noted

792S:

- 15' x 15' work area has been created by removing the existing asphalt
- Asphalt debris is stockpiled on-site for future removal
- Existing pavement and chain link fence is adjacent to the work site
- Silt fencing has been installed along the north side of the work area
- No activity / No issues noted

793S:

- 20' x 20' work area has been established
- 10' x 10' soil stockpile area has been established adjacent to work area
- Silt fence has been installed around the work area and soil stockpile area
- Existing pavement and chain link fence is adjacent to the work site
- No activity / No issues noted

794S:

- Work has not begun at this site

795S:

- Work has not begun at this site

Approximate Areas of Disturbance:

791S

- 5' x 40' disturbance for silt fence installation (200 sf)
- No New Disturbance

792S

- 15' x 15' work area/drill site (225 sf)
- No New Disturbance

793S

- 20' x 20' work area/drill site (400 sf)
- 10' x 10' stockpile area (100 sf)
- No New Disturbance

794S

- Work has not begun at this site
- Work has not begun at this site

Total Current Approximate Disturbance = 925 sf (0.02 acres)

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**Shared Access off of Stratford Avenue for 816S, 817S, & 818S:**

- Crushed stone construction entrance is in place; Entrance is stable
- Area contained by chain link fence and protected by hay bales
- No activity / No issues noted

816S:

- Crushed stone construction entrance is in place for site access; Entrance is stable
- Earthen slope has been graded out near the base of the stone entrance along the RR ROW
- Work pad is established along the RR ROW
- Temporary concrete block retaining wall is in place along the south side of the work pad to protect adjacent building
- Silt fencing is in place along the south side of the site behind the retaining wall
- Silt fencing is in place in the southwest corner of the work pad
- No activity / No issues noted

817S:

- Work pad has not been established yet
- Small soil stockpile area is in place
- Silt fencing is in place around the east and south sides of the stockpile area
- Minor grading activities appear to have taken place around the site area
- No activity / No issues noted

818S:

- Minor brush clearing has been done along the south side of the site _____
- Silt fencing is in place along the south side of the site downgradient of the cleared area
- Work pad is established along the RR ROW
- No activity / No issues noted

Approximate Areas of Disturbance:**Shared Access for 816S-817S-818S:**

- No New Disturbance
- 816S
 - No New Disturbance
- 817S
 - No New Disturbance
- 818S
 - No New Disturbance

Total Current Approximate Disturbance = 3,700 sf (0.08 acres)

ITEMS NOTED IN THIS INSPECTION:

List specific items relating to erosion & sediment controls, implementation of the plan, description of stormwater discharges, and any water quality monitoring performed during the inspection.

| ITEM # | ITEM NOTED | DESCRIPTION OF DEFICIENCY | REMEDIAL ACTIONS REQUIRED | IN COMPLIANCE | DATE NOTED | CURRENT STATUS |
|--------|---|---|---|---------------|------------|---|
| 1 | Lack of anti-tracking pad at entrance to 820N | There is no crushed stone construction entrance provided at the site entry point. The site access consists of earth that extends to the edge of road and there are no measures in place to prevent off-site sediment tracking | Install crushed stone construction entrance at site access point from Seymour Street prior to the commencement of active on-site work | YES | 2/2/2017 | Work in Progress; Anti-tracking pad is recommended to be installed before active work resumes |

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**819N:**

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing is in place along the north side of the work area along the edge of road
- Chain link gate is in place across the work area to prevent access to the RR ROW
- No activity / No issues noted

820N:

- Work pad / access road is established
- Temporary concrete block retaining wall is in place along the north side of the site along the edge of road
- Temporary chain link fencing is in place on the top of the wall and across the site entry
- Silt fencing is in place along the east and north sides of the site
- Crushed stone construction entrance is still recommended at the site entry point off of Seymour Street; See note #1 above
- Snow Plow has disturbed the entry
- No activity

Approximate Areas of Disturbance:

819N

- No new disturbance

820N

- No new disturbance

Total Current Approximate Disturbance = 3,625 sf (0.08 acres)

ITEMS NOTED IN THIS INSPECTION:

List specific items relating to erosion & sediment controls, implementation of the plan, description of stormwater discharges, and any water quality monitoring performed during the inspection.

| ITEM # | ITEM NOTED | DESCRIPTION OF DEFICIENCY | REMEDIAL ACTIONS REQUIRED | IN COMPLIANCE | DATE NOTED | CURRENT STATUS |
|--------|---|---|--|---------------|------------|--|
| 1 | Silt fencing at 821N needs to be repaired | As a result of snow plowing, the silt fence along the edge of the road has been knocked down after snow bank melted | Replacement or resetting of the silt fence is recommended before active work resumes on-site | YES | 2/22/17 | Work in Progress, Fence toed in and site is stable |
| | | | | | | |

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**821N:**

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing has been knocked down as a result of recent snow plowing; See note #1 above
- No activity

822N:

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing is in place along the north side of the work area along the edge of road
- Chain link gate is in place across the work area to prevent access to the RR ROW
- No activity / No issues noted

823N:

- Crushed stone construction entrance is in place; Entrance stable
- Work pad is established
- Access road is in place for access between 823N & 824N
- Silt fencing is in place along the south & south sides of the access road
- No activity / No issues noted

824N:

- Work pad is established
- Access road is in place for access between 823N & 824N
- Temporary concrete block retaining wall is in place along the south side of the work pad and access road
- Silt fencing is in place behind the wall and along the south side of the work area
- No activity / No issues noted

825N:

- Work area is supported by concrete retaining wall; site is adjacent to road and protected with concrete barriers
- Access path is in place around base of retaining wall
- Entire work area surrounded with temporary chain link fence and protected by silt fence barrier
- Plastic tubs have been placed on-site and appear to have been used as concrete washout facilities; concrete contained
- 2 concrete bases are in place; 1 has been uncovered and 1 is still curing
- Storage area at the end of the road adjacent to site
- No activity / No issues noted

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**821S:**

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- 15' x 300' access road has been established along the RR ROW
- Silt fencing has been installed along the south side of the work area
- No activity / No issues noted

822S:

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Construction entrance is in place at site access point; Entry is stable
- Work pad is established along the RR ROW
- Access road is established along the RR ROW; 15' x 30' of additional access road has been established
- Silt fencing has been installed along the south side of the work area
- No activity / No issues noted

823S:

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- Temporary chain link fencing has been installed between the existing paved parking area and the work site
- 15' x 110' access road has been established along the RR ROW
- 20' x 20' work pad has been established adjacent to the existing paved parking area
- Silt fencing has been installed along the south side of the work area
- No activity / No issues noted

824S:

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- Access road has been established along the RR ROW; Dimensions of access road could not be determined from available vantage points; Disturbance will be determined when site access is available
- Silt fencing has been installed along the south side of the work area
- No activity / No issues noted

825S:

- Crushed stone construction entrance is in place for site access; entrance is stable
- Temporary chain link security fencing is in place around work area
- Silt fence is in place around the work area
- Paved area adjacent to site entry appears to be swept and receiving maintenance
- Potholes in staging area filled and stabilized with crushed stone
- Stockpile is on-site; stockpile is within contained area
- Active excavator working on stockpile management at the time of inspection
- No issues noted

Approximate Areas of Disturbance:

- 821S
 - 15' x 300' access road (4500 sf)
 - No new disturbance
- 822S
 - 15' x 30' expansion of access road (450 sf)
 - No new disturbance
- 823S
 - 15' x 110' access road (1650 sf)
 - 20' x 20' work pad (400 sf)
 - No new disturbance
- 824S
 - Access road of unknown dimension; Disturbance associated with 824S is not included in total disturbance. Area needs to be confirmed.
 - No new disturbance
- 825S
 - Work pad previous disturbance (9,200 sf)
 - No new disturbance

Total Current Approximate Disturbance = 16,200 sf (0.37 acres)

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**800S:**

- Work has not begun at this site

801S:

- Work has not begun at this site

802S:

- Work has not begun at this site

803S:

- Work area is established adjacent to existing MNR access path
- Earthen berm and fence containing the site along the southern side
- Site surrounded by gravel
- 6' diameter concrete base is in place & covered with plastic sheeting for curing
- Haybales have been placed around the concrete base
- Concrete washout is in place, and mostly full with wash: Recommended to empty basin prior to reuse
- Washout currently serving 803S – 808S
- No activity / No issues noted

804S:

- Work area is established adjacent to existing MNR access path, and RR ROW
- Site surrounded by gravel
- 6' diameter concrete base is in place
- Haybales have been placed around the pole base
- No activity / No issues noted

805S:

- Work area is established adjacent to existing MNR access path, and RR ROW
- Site surrounded with cones and concrete blocks
- Partial excavation for base; Timbers have been added to cover new excavations
- Site surrounded by gravel
- No activity / No issues noted

Approximate Areas of Disturbance:

| | |
|------|---|
| 800S | • Work has not begun at this site |
| 801S | • Work has not begun at this site |
| 802S | • Work has not begun at this site |
| 803S | • Previous Disturbance (375 sf) • No New Disturbance |
| 804S | • Previous Disturbance (100 sf) • No New Disturbance |
| 805S | • Previous Disturbance (300 sf) • No New Disturbance |

Total Current Approximate Disturbance = 775 sf (0.02 acres)

ADDITIONAL COMMENTS OR NOTES:**805N – 812N:**

- Limited access with no flagger support
- Inspection conducted from available vantage points at site access and along south side of tracks
- Sites and access appear established along RR ROW
- Shared access near site 811N, Access stable
- Construction entrance is in place at shared access point; Ponding at entrance but no off-site runoff observed
- Approximate Disturbance from plans for full length of work adjacent to ROW: 15'w x 2,200' L; Disturbance to be confirmed when ROW access is available
- Sites contained by chain link fence along the north side
- Silt fence is visible along the north side of 811N and along the south side of 805N
- No activity / No issues noted

Approximate Areas of Disturbance:**805N-812N:**

- Previous Disturbance (33,000 sf)

Total Current Approximate Disturbance = 33,000 sf (0.76 acres)

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**806S:**

- Work area is established adjacent to MNR building
- Existing pavement has been sawcut and removed at drill location
- Site is adjacent to existing paved parking lot; Adjacent pavement appears to have been swept
- 6' diameter concrete base has been poured & is covered for curing _____
- Haybales have been placed around the concrete base
- Washout at 803S serving site
- No activity / No issues noted

807S:

- Work area is established adjacent to MNR building
- Existing pavement has been sawcut and removed to create work area
- Site is adjacent to existing paved parking lot and coned off
- No activity / No issues noted

808S:

- Work area is established adjacent to MNR building
- Existing pavement has been sawcut and removed at drill location
- Aldridge on-site at the time of inspection conducting active drilling operations
- Skid-steer was actively removing drilling spoils from adjacent pavement during the drilling operations
- Rebar cages and concrete forms on-site for future installation
- No issues noted

809S-810S-811S-812S-813S:

- Work has not begun at these sites yet

Approximate Areas of Disturbance:

806S

- Previous Disturbance (400 sf)
- No New Disturbance

807S

- Previous Disturbance (100 sf)
- No New Disturbance

ADDITIONAL COMMENTS OR NOTES:**Shared Access off of Stratford Avenue for 816S, 817S, & 818S:**

- Crushed stone construction entrance is in place; Entrance is stable
- Area contained by chain link fence and protected by hay bales
- No activity / No issues noted

816S:

- Crushed stone construction entrance is in place for site access; Entrance is stable
- Earthen slope has been graded out near the base of the stone entrance along the RR ROW
- Work pad is established along the RR ROW
- Temporary concrete block retaining wall is in place along the south side of the work pad to protect adjacent building
- Silt fencing is in place along the south side of the site behind the retaining wall
- Silt fencing is in place in the southwest corner of the work pad
- No activity / No issues noted

817S:

- Work pad has not been established yet
- Small soil stockpile area is in place
- Silt fencing is in place around the east and south sides of the stockpile area
- Minor grading activities appear to have taken place around the site area
- No activity / No issues noted

818S:

- Minor brush clearing has been done along the south side of the site
- Silt fencing is in place along the south side of the site downgradient of the cleared area
- Work pad is established along the RR ROW
- No activity / No issues noted

ITEMS NOTED IN THIS INSPECTION:

List specific items relating to erosion & sediment controls, implementation of the plan, description of stormwater discharges, and any water quality monitoring performed during the inspection.

| ITEM # | ITEM NOTED | DESCRIPTION OF DEFICIENCY | REMEDIAL ACTIONS REQUIRED | IN COMPLIANCE | DATE NOTED | CURRENT STATUS |
|--------|---|---|---|---------------|------------|---|
| 1 | Lack of anti-tracking pad at entrance to 820N | There is no crushed stone construction entrance provided at the site entry point. The site access consists of earth that extends to the edge of road and there are no measures in place to prevent off-site sediment tracking | Install crushed stone construction entrance at site access point from Seymour Street prior to the commencement of active on-site work | YES | 2/2/2017 | Work in Progress; Anti-tracking pad is recommended to be installed before active work resumes |
| 2 | Sediment accumulation along edge of road near site entrance | Sediment and gravel has accumulated along the edge of road near the site entrance. As a result of snow plowing, this sediment has been pushed out into the roadway | Pavement sweeping is recommended along the edge of road along the site frontage | YES | 3/2/2017 | Work in Progress |

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**819N:**

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing is in place along the north side of the work area along the edge of road
- Chain link gate is in place across the work area to prevent access to the RR ROW
- Haybales have been placed at site entry to reinforce temporary fencing
- No activity / No issues noted

820N:

- Work pad / access road is established
- Temporary concrete block retaining wall is in place along the north side of the site along the edge of road
- Temporary chain link fencing is in place on the top of the wall and across the site entry
- Silt fencing is in place along the east and north sides of the site
- Crushed stone construction entrance is still recommended at the site entry point off of Seymour Street; See note #1 above
- Haybales have been placed at site entry to reinforce temporary fencing
- Pavement sweeping is recommended along the edge of road near the entry point, See note #2 above
- No activity

Approximate Areas of Disturbance:

819N

- No new disturbance

820N

- No new disturbance

Total Current Approximate Disturbance = 3,625 sf (0.08 acres)

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**819S:**

- Access path/ work area is established along the RR ROW
- Temporary chain link fencing is in place along the south side of the site
- Staging area is established adjacent to the work area; Chain link fence is in place around the staging area; vehicles from the 820S work area have been relocated and are now stored within this area
- No activity / No issues noted

820S:

- Staging area is established for the work site
- Existing chain link fencing is in place around the staging area
- Work pad is established along the RR ROW
- No activity / No issues noted

Approximate Areas of Disturbance:

819S

- No new disturbance

820S

- No new disturbance

Total Current Approximate Disturbance=7,450 sf (0.17 acres)

ITEMS NOTED IN THIS INSPECTION:

List specific items relating to erosion & sediment controls, implementation of the plan, description of stormwater discharges, and any water quality monitoring performed during the inspection.

| ITEM # | ITEM NOTED | DESCRIPTION OF DEFICENCY | REMEDIAL ACTIONS REQUIRED | IN COMPLIANCE | DATE NOTED | CURRENT STATUS |
|--------|---|---|--|---------------|------------|-------------------------|
| 1 | Silt fencing at 821N needs to be repaired | As a result of snow plowing, the silt fence along the edge of the road has been knocked down after snow bank melted | Replacement or resetting of the silt fence is recommended before active work resumes on-site | YES | 2/22/17 | Resolved as of 3/2/2017 |
| | | | | | | |

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**821N:**

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing has been reset; See note #1 above
- No activity/ No issues noted

822N:

- Excavated work area is in place between the RR ROW and the edge of road
- Silt fencing is in place along the north side of the work area along the edge of road
- Chain link gate is in place across the work area to prevent access to the RR ROW
- Haybale has been placed at site entry to reinforce temporary fencing
- No activity / No issues noted

823N:

- Crushed stone construction entrance is in place; Entrance stable
- Haybales have been placed at site entry to reinforce temporary fencing—
- Work pad is established
- Access road is in place for access between 823N & 824N
- Silt fencing is in place along the south & south sides of the access road
- No activity/ No issues noted

824N:

- Work pad is established
- Access road is in place for access between 823N & 824N
- Temporary concrete block retaining wall is in place along the south side of the work pad and access road
- Silt fencing is in place behind the wall and along the south side of the work area
- No activity / No issues noted

825N:

- Work area is supported by concrete retaining wall; site is adjacent to road and protected with concrete barriers
- Access path is in place around base of retaining wall
- Entire work area surrounded with temporary chain link fence and protected by silt fence barrier
- Plastic tubs have been placed on-site and appear to have been used as concrete washout facilities; concrete contained
- 2 concrete bases are in place; 1 has been uncovered and 1 is still curing
- Storage area at the end of the road adjacent to site
- No activity / No issues noted

Approximate Areas of Disturbance:

- 821N
 - No New Disturbance
- 822N
 - No New Disturbance
- 823N
 - No New Disturbance
- 824N
 - No New Disturbance
- 825N
 - No New Disturbance

Total Current Approximate Disturbance = 10,075 sf (0.23 acres)

ITEMS NOTED IN THIS INSPECTION:

**Note: The item numbers listed above correspond to the circled numbering on the attached reference map.

ADDITIONAL COMMENTS OR NOTES:**821S:**

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- Access road is established along the RR ROW
- Silt fencing is in place along the south side of the work area
- No activity / No issues noted

822S:

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Construction entrance is in place at site access point; Entry is stable
- Work pad is established along the RR ROW
- Access road is established along the RR ROW
- Silt fencing is in place along the south side of the work area
- No activity / No issues noted

823S:

- No direct access due to lack of flagger support and locked gates; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- Temporary chain link fencing is in place between the existing paved parking area and the work site
- Access road is established along the RR ROW
- Work pad is established adjacent to the existing paved parking area
- Silt fencing is in place along the south side of the work area
- No activity / No issues noted

824S:

- No direct access due to lack of flagger support and locked gate; Inspection conducted from available vantage points
- Site is accessed from construction entrance at 822S; Entry is stable
- Access road is established along the RR ROW; Dimensions of access road could not be determined from available vantage points; Disturbance will be determined when site access is available
- Silt fencing is in place along the south side of the work area
- No activity / No issues noted

825S:

- Crushed stone construction entrance is in place for site access; entrance is stable
- Temporary chain link security fencing is in place around work area
- Silt fence is in place around the work area
- Paved area adjacent to site entry appears to be swept and receiving maintenance
- Potholes in staging area filled and stabilized with crushed stone
- Stockpile is on-site; stockpile is within contained area
- Bond excavator on-site at the time of inspection working on movement of stockpile
- No issues noted
