RE: PETITION NO. 1282 - New Cingular Wireless PCS, LLC (AT&T) petition for a declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required to install a wireless telecommunications facility on the roof of the existing office building located at 208 Harbor Drive, Stamford, Connecticut.

Dear Attorney Laub:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than February 10, 2017. To help expedite the Council's review, please file individual responses as soon as they are available.

Please forward an original and 15 copies to this office, as well as send a copy via electronic mail. In accordance with the State Solid Waste Management Plan and in accordance with Section 16-50j-12 of the Regulations of Connecticut State Agencies the Council is requesting that all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. Fewer copies of bulk material may be provided as appropriate.

Any request for an extension of time to submit responses to interrogatories shall be submitted to the Council in writing pursuant to §16-50j-22a of the Regulations of Connecticut State Agencies.

Yours very truly,

Melanie Bachman
Executive Director

MB/RM

Petition No. 1282

New Cingular Wireless PCS LLC

208 Harbor Drive, Stamford, CT

Interrogatories

1. Were return receipts received for each abutting property owner identified in the petition? If not, list the abutters that did not receive notice and describe any additional effort to serve notice. When was the abutter list compiled?
2. Does the proposed emergency power system only rely on battery power? If not, provide information on additional emergency generation. What would be the run time of the emergency power unit under normal cell site operating conditions?
3. Have any photo-simulations of the proposed facility been prepared? If so, please provide.
4. The radio-frequency report in Petition Attachment 4 dates from December 2013. Have there been any changes to the existing antenna equipment on the roof and/or AT&T's proposed installation since then? If so, please revise the radio frequency report to account for such changes.
5. The radio frequency report lists the *highest composite percent of MPE* value as occurring 611 feet from the building. Is there a direction associated with this value or does the value represent a worst-case assumption with no directional variability?
6. The structural analysis and petition drawings refer to building code EIA/TIA-222-F Steel Antenna Towers and Antenna Supporting Structures. Please note, effective October 1, 2016, the Connecticut State Building Code has adopted EIA/TIA-222-G. Please provide a new structural analysis and site plans that account for this revision.
7. Is the proposed cooling tower noted on Site Plan A-2 part of this proposal? If not, has it been installed?
8. Clarify the top height of the fiberglass panel enclosures. (Structural lists 105 feet agl; Site plans list 82 feet agl). Would the final height affect the result of the structural analysis?
9. Please describe the local review process mentioned on page 2 of the Petition. What was the outcome of this review process?
10. What color are the screen enclosures?
11. Provide propagation modeling that depicts existing and proposed wireless service.
