Subject: Line 1620/1975 Replacement Project  
Haddam, Connecticut

Dear Mr. Deptula:

The State Historic Preservation Office (SHPO) has reviewed the Phase IB Cultural Resources Survey report prepared by Heritage Consultants (Heritage), dated October 2016. This office understands that Eversource Energy (Eversource) initiated a maintenance project that identified emergency structure replacement needs along the referenced corridors. After a field meeting, SHPO requested a post-impact investigation of areas that previously had been identified as archeologically sensitive. The completed archeological investigation examined access roads and work pads associated with 24 of the structure replacements. The submitted report is comprehensive and meets the standards set forth in the *Environmental Review Primer for Connecticut's Archaeological Resources*.

During the archeological reconnaissance survey, 122 shovel tests were excavated adjacent to the work pads and access roads to determine if archeological resources had been impacted. Subsurface testing failed to identify any artifacts or evidence of cultural features. As a result, SHPO concurs with the findings of the report that additional archeological investigations of the project areas are not warranted and that no historic properties will be affected by the proposed activities.

This office appreciates the opportunity to review and comment upon this project. For additional information, please contact me at (860) 256-2764 or [catherine.labadia@ct.gov](mailto:catherine.labadia@ct.gov).
