

November 20, 2019

Melanie Bachman, Esq.  
Executive Director  
Connecticut Siting Council  
Ten Franklin Square  
New Britain, CT 06051

Re: Sub-Petition No. 1293-SWEWES-01

Dear Ms. Bachman:

The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") is filing the attached Sub-Petition No. 1293-SWEWES-01 with the Connecticut Siting Council ("Council"), regarding maintenance work within its transmission right-of-way in South Windsor, East Windsor, Ellington and Somers Connecticut. The work includes replacing 35 existing wooden transmission structures with new weathering steel transmission structures.

Eversource notified the officials of the municipalities of South Windsor, East Windsor, Ellington and Somers of Eversource's submission of the Sub-Petition and sent copies of the Sub-Petition to owners of directly abutting properties (see Proof of Notice).

Enclosed please find an original and 3 copies of this filing.

Please contact me at 860-728-4527 if you have any questions regarding the enclosed Sub-Petition.

Sincerely,

Enclosures

Sub-Petition  
CONNECTICUT SITING COUNCIL – PETITION NO. 1293  
TRANSMISSION FACILITY ASSET CONDITION  
MAINTENANCE IMPROVEMENTS TO COMPLY  
WITH THE UPDATED NATIONAL ELECTRIC  
SAFETY CODE CLEARANCE REQUIREMENTS

Town: South Windsor, East Windsor, Ellington and Somers

Sub-Petition: 1293-SWEWES-01

Project: 3419 Transmission Line Structure Replacement Project

Structure Locations: 35 Transmission Line Structures located in South Windsor, East Windsor, Ellington and Somers, Connecticut

I. Introduction:

In accordance with Condition 1 of the March 30, 2017 ruling by the Connecticut Siting Council (the "Council") (as set forth in the Council's March 31, 2017 letter) regarding Petition No. 1293, The Connecticut Light and Power Company doing business as Eversource Energy ("Eversource") submits this Sub-Petition.

II. Description of Transmission Work Activities:

Eversource's 3419 Transmission Line Structure Replacement Project is part of an ongoing maintenance program which evaluates the integrity of its utility structures and implements repair, upgrade or replacement in order to ensure the safe and reliable transmission of power to its customers. Due to asset condition, many structures require replacement on the Connecticut portion of the 3419 Line between Barbour Hill Substation in South Windsor and Stafford Road in Somers. The 3419 Line, in its entirety, is a 345-kilovolt single-circuit line that extends from Barbour Hill Substation to Ludlow Substation in Ludlow Massachusetts. Of the Connecticut structures that will be replaced, 35 structures require a slight increase in structure height to comply with current clearance requirements. These 35 structures to be replaced are a mix of wood H-Frame and monopole structures.

Eversource plans to conduct transmission structure replacement work to remediate wood structure damage caused by structure age, weather, and woodpecker activity. The following work ("Work Activities") will be performed:

- Replace 35 existing wood structures with new weathering steel structures. Each replacement structure will be of the same design as its corresponding existing structure, though slightly taller (10 feet or less) than the existing structure. The replacement structures will be installed within 15 feet of the existing structure locations.

III. No Substantial Adverse Environmental Effect:

Eversource respectfully submits that the proposed modifications would have no "substantial adverse environmental effect" pursuant to Conn. Gen. Stat. § 16-50k, based on the following factors:

- a) All Work Activities would take place in areas within Eversource's property or existing right-of-way ("ROW") utilizing existing and proposed new permanent access roads, as well as some temporary access roads (collectively the "Work Areas"). Some of the existing access roads would be improved. Eversource would access the structure replacement locations utilizing its existing rights and, in some locations, it has secured rights for off-ROW access routes to minimize the amount of proposed access roads that would need to be installed within the ROW and lessen the impacts to wetlands, sensitive habitat and/or agricultural areas.
- b) Collectively, the Work Activities would result in approximately 62,460 square feet ("SF") of temporary wetland impacts, limited to temporary construction matting required for the construction of access roads and work pads for 13 structures as follows:

<b>Wetland Number</b>	<b>Structure Number</b>	<b>Construction Work Pads Temporary Impacts (SF)</b>	<b>Access Roads Temporary Impacts (SF)</b>
W52	8538	0	±4,780
W44	8551	0	±1,780
W44	8552	±10,000	±8,790
W44	8553	±10,000	±1,150
W44	8554	±2,265	±3,230
W39	8567	0	±600
W36	8582	0	±530
W28A	8601	±1,075	0
W25	8607	±9,760	0
W24	8608	±1,750	0
W21	8610	0	±4,730
W19	8612	±1,465	±25
W14	8617	±530	0
<i>Subtotals:</i>		<i>±36,845</i>	<i>±25,615</i>
<b>TOTAL:</b>		<b>±62,460</b>	

Work would be conducted in accordance with Eversource's *Best Management Practices Manual for Massachusetts and Connecticut (Construction and Maintenance Environmental Requirements)*, September 2016 ("BMPs") to avoid impacts to nearby wetland and watercourse resources.

- c) No vernal pools are located in proximity to the Work Areas.
- d) As a result of Eversource's review of the Connecticut Department of Energy and Environmental Protection's ("CTDEEP") Natural Diversity Database ("NDDB"), only the Work Activities associated with the access and work pads for Structures 8617 and 8618 are proposed within a NDDB buffered area and wetland jurisdictional area and/or CTDEEP owned property and therefore would be subject to a NDDB review request. Eversource is currently in consultation with CTDEEP regarding Eversource's proposed work in these areas and will adhere to any state-listed species protection

measures recommended by CTDEEP, as necessary. Any recommended measures will be incorporated into Eversource's BMPs during construction. With these protection measures, no adverse impacts to state-listed rare species are anticipated.

- e) The Work Activities will not require any tree clearing. However, Eversource may need to undertake tree trimming and/or vegetation removal/mowing within the managed ROW corridor to improve access to portions of the Work Areas.
- f) A Phase IA assessment review of previously recorded cultural resources on file with the Connecticut State Historic Preservation Office, conducted by Heritage Consultants, LLC ("Heritage"), did not identify any National Register of Historic Places properties/districts located within 500 feet of the Work Areas; however, one State Register of Historic Places property (130-37) identified at 398 Ninth District Road in Somers is situated 127 feet north of the entrance to the existing off-ROW access road to Structure 8601. A Greek Revival house constructed circa 1850 is located on this property. The house is located approximately 1,500 feet to the southeast of Structure 8601. Based on existing conditions, the like-for-like design of the replacement structure, distance from Work Activities and the modest average height increase of five feet, the proposed Work Activities would not directly impact this historic resource or substantially change views of the ROW.

Based on a review of historic maps, aerial photographs, available soil profiles and a pedestrian survey of the Work Areas, twelve of the proposed work pad locations and ten of the access road locations were identified to possess a potential for moderate to high archaeological sensitivity. Phase 1B cultural reconnaissance surveys (shovel pit testing) at these locations found one historic cultural resources locus and two prehistoric cultural resources loci. These findings were not found to be of archaeological significance; therefore, no further investigation was recommended or warranted, and no protective measures are required.

- g) Increases in the heights of the 35 replacement structures will average approximately 5 feet and none will exceed 10 feet.
- h) Replacement structures would be located within 15 feet of existing structures.
- i) Work Activities associated with Structure 8608 are located partially within the mapped 100-year flood zone associated with Abbey Brook. Work Activities associated with Structure 8617 are located partially within the mapped 100-year flood zone associated with the Scantic River. Work Activities associated with Structure 8618 are located partially within the mapped floodway and 100-year flood zone associated with the Scantic River. Eversource would utilize its BMPs to minimize any impacts to these flood zones and the floodway by utilizing temporary construction matting and/or by not placing fill that would increase the elevations of the existing or proposed road surfaces or work pads to ensure that the floodway and floodplain hydrology would not be adversely affected. With these protective measures and the use of BMPs, no adverse impact to the 100-year flood zones and the floodway would result from the proposed Work Activities.
- j) No change in noise levels would result from the installation of the new structures and the applicable line would continue to comply with the State of Connecticut noise regulations.
- k) Any changes in electric and magnetic field levels outside the ROW would be negligible.

#### IV. Mitigation:

Temporary environmental effects from construction will be mitigated as follows:

- Erosion and sediment controls ("E&S") will be employed and maintained, as needed, for the duration of the Work Activities in accordance with the 2002 Connecticut Guidelines for Soil Erosion and Sediment Control and the BMPs.
- Potential impacts to wetlands and watercourses will be mitigated with the use of temporary construction matting and adherence to the BMPs.
- Any NDDDB recommended rare species protective measures will be incorporated into Eversource's BMPs during construction.
- Potential impacts to the 100-year flood zones and floodway would be avoided with adherence to the BMPs and the use of temporary construction matting.
- Eversource's contractor will perform construction sequencing such that any earth materials are exposed for a minimum of time before they are covered, seeded, or otherwise stabilized to prevent erosion.
- During construction, when necessary, anti-tracking mats would be installed at construction entrances onto public roads to prevent tracking of soil onto local streets.
- Upon completion of the Work Activities, all disturbed/exposed areas would be stabilized and revegetated as needed. After the establishment of permanent ground cover, Eversource's contractor would remove the temporary E&S controls and remove/dispose of any accumulated sediments and debris from areas where such measures were used.

#### V. Access:

Some new permanent access roads would be constructed to facilitate access to structures within the ROW and existing access roads in upland areas may be hardened and temporarily widened at turning areas to facilitate the safe passage of construction vehicles. Construction matting would be used as temporary access roads in wetlands as well as in agricultural/maintained lawn upland areas. The matting will be removed upon completion of the Work Activities and the areas restored, as necessary.

Eversource would access the Work Areas by entering its property and/or the ROW from existing access points on public roads as follows:

##### South Windsor

- Barber Hill Road for Structures 8533 and 8534
- Niederwerfer Road for Structures 8537 and 8538

##### East Windsor

- Niederwewrfer Road for Structures 8542 and 8543

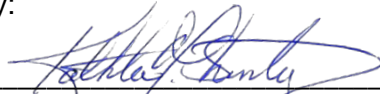

Ellington

- Middle Road for Structures 8551, 8552, 8553, 8554 and 8555
- Frog Hollow Road for Structures 8562, 8567, 8568, 8569 and 8570
- Broad Brook Road for Structures 8571, 8572, 8573, 8574 and 8575
- Sadds Mill Road for Structure 8582
- Green Road for Structures 8587, 8588 and 8590

Somers

- Hitching Post Lane for Structure 8599
- 9<sup>th</sup> District Road for Structures 8601, 8608, 8610 and 8612
- Billings Road for Structure 8607
- Main Street for Structure 8615, 8617 and 8618
- Stafford Road for Structure 8636

**ATTACHMENT D**  
**ABUTTER LETTER AND**  
**PROOF OF NOTICE**

November 20, 2019

Dear Neighbor,

As part of our everyday effort to deliver reliable energy to our customers and communities, we're planning work in your area to replace electric transmission structures. Maintaining the infrastructure that supports the electric lines is one of the ways Eversource ensures the safe, secure transmission of electricity throughout the region.

You're receiving this letter and a copy of the Sub-Petition because the proposed work would be taking place within the right of way on or near your property in South Windsor, East Windsor, Ellington, and Somers. A Sub-Petition is a document with detailed information about the proposed upgrades. Eversource is submitting Sub-Petition No. 1293-SWEWES-01 this week to the Connecticut Siting Council (CSC) for its review and approval.

**About This Electric System Improvement: What You Can Expect**

First, we want you to know that this work will not interrupt electric service to your property.

As part of this project, we are proposing to replace, and slightly increase the height of the existing wood structures. The new, weathering steel structures will increase in height by 9 feet or less, depending on the location.

We are proposing to do the work within the existing rights of way on or near your property. The new structures will provide continued reliability of the transmission system.

**Connecticut Siting Council Process and Timing**

With this letter, Eversource is providing notice to you of its proposed work activity, as described in the enclosed Sub-Petition. If you have any comments or concerns about the project, please send them to the CSC at the following address within 30 days of the date of this letter: Melanie Bachman, Acting Executive Director; Connecticut Siting Council; Ten Franklin Square; New Britain, CT 06051. You may also email them to the [siting.council@ct.gov](mailto:siting.council@ct.gov). If you choose to send comments to the CSC, please reference Sub-Petition No. 1293-SWEWES-01 in your correspondence.

**Our Commitment to You**

We are committed to be a good neighbor and doing our work with respect for you and your property. If you would like more information about this work please call 1-800-793-2202, or send an email to [ProjectInfo@eversource.com](mailto:ProjectInfo@eversource.com). Thank you.

Sincerely,

*Ciara Stage*

Ciara Stage  
Eversource Project Manager – Transmission Maintenance

AFFIDAVIT OF SERVICE OF NOTICE

STATE OF CONNECTICUT     )  
  ) ss. Hartford  
COUNTY OF HARTFORD     )

In accordance with Condition 2 of the Connecticut Siting Council's ("Council") March 31, 2017 declaratory ruling on Petition No. 1293, I hereby certify that on November 20, 2019, I caused notice of the proposed maintenance activities including a copy of the Sub-Petition No.1293-SWEWES-01 of The Connecticut Light and Power Company dba Eversource Energy ("Eversource") to be served on the municipalities listed below and 30 abutters. The notice of the proposed maintenance activities states that comments or concerns regarding the maintenance activities described in the Sub-Petition should be submitted to the Council within 30 days of the date of such notice.

Municipal Official:

Town of South Windsor  
The Honorable Michael Maniscalco, Town Manager  
1540 Sullivan Avenue  
South Windsor, CT 06074

Town of Ellington  
The Honorable Lori Spielman, First Selectwoman  
P.O. Box 187  
Ellington, CT 06029

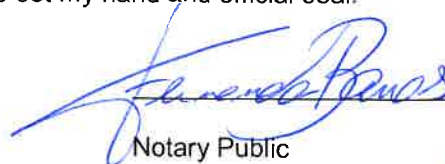

Town of East Windsor  
The Honorable Robert Maynard, First Selectman  
11 Rye Street  
Broad Brook, CT 06016

Town of Somers  
The Honorable C.G. Knorr, Jr., First Selectman  
600 Main Street  
Somers, CT 06016
