Re: PETITION NO. 1312 - Candlewood Solar LLC declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for the proposed construction, maintenance and operation of a 20 megawatt AC (26.5 megawatt DC) solar photovoltaic electric generating facility located on a 163 acre parcel at 197 Candlewood Mountain Road and associated electrical Interconnection to Eversource Energy's Rocky River Substation on Kent Road in New Milford, Connecticut. **Development And Management Plan.**

Dear Attorney Bachman:

On March 7, 2019, the Connecticut Siting Council ("Council") presented Candlewood Solar, LLC ("Candlewood Solar") with Interrogatories (Set Two) due no later than March 21, 2019. On or about March 14, 2019, the Bureau of Materials Management and Compliance Assurance at the Department of Energy and Environmental Protection ("DEEP") issued a Notice of Rejection (without prejudice) in connection with Candlewood Solar's General Permit Registration No. 201816062.

Pursuant to §16-50j-22a of the Regulations of Connecticut State Agencies, Candlewood Solar respectfully requests a two-week extension of time to submit its responses to the Council's Interrogatories – Set Two. This extension will give Candlewood Solar the appropriate time needed to complete its responses to the interrogatories in light of DEEP's Notice of Rejection.

Enclosed are the original and fifteen (15) hard copies of this request for extension. Copies are also being provided to the parties on the service list.

Sincerely,

Paul R. Michaud
