**Re: Petition 1313 – Petition of DWW Solar II, LLC for a Declaratory Ruling that no Certificate of Environmental Compatibility and Public Need is Required for a 26.4 Megawatt AC Solar Photovoltaic Electric Generating Facility in Simsbury, Connecticut**

Dear Ms. Bachman:

I am writing on behalf of my client, DWW Solar II, LLC (“DWW”), in connection with the above-referenced Petition. On December 9, 2019, DWW notified its off-takers and ISO New England that the Tobacco Valley Solar project has reached its commercial operation date (“COD”). This letter is to provide notice that COD is considered to be achieved as of today, December 10, 2019.

Although the project has achieved COD and will begin generating electricity at this time, there are still certain steps that need to be finalized before the project will be fully completed in accordance with the approvals provided by the Siting Council. These steps, however, are expected to be minor activities that will not fundamentally affect the project. For example, additional plantings are expected to be made in the spring, when the growing season begins.

If you have any questions concerning this submittal, please contact the undersigned at your convenience. I certify that copies of this submittal have been submitted to the Service List for this Petition.

Sincerely,

Lee D. Hoffman
