

**Petition No. 1328  
Interrogatories  
Set Three  
December 22, 2017**

**CSC AS 61. The abutter's map provided in response to Council interrogatory #1 shows the project contained within the 20.6 acre property on parcel 28-B-003.00; however, the petition filing refers to the property being 25.1 acres and site plans depict the project and access road extending onto the 4.5 acre property on parcel 28-B-003.04 with the same underlying property owner. Please clarify. If the project encompasses both properties mentioned above, please provide proof of notice of the petition to the abutting property owner of parcel 28-B-003.3 at 515 Mashamoquet Road.**

The proposed projects are located on both parcels. The owner of parcel 28-B-003.3 was erroneously excluded from the notification list, however, this landowner is aware of the proposed projects and the Petition. The listing agent that is involved in the transaction has contacted the landowner directly on our behalf regarding the projects and to discuss a title related matter. A notice was sent to the owner of 515 Mashamoquet Road on January 4<sup>th</sup>, 2018. A copy of the shipping receipt is included with this response as Exhibit "A".

**CSC AS 62. What is the distance of the proposed limits of disturbance of the proposed project from the property line of the nearest abutting residence located at 515 Mashamoquet Road? What is the distance of the proposed limits of disturbance of the proposed project from the nearest portion of the residence on the adjacent property?**

The distance of the proposed limits of disturbance of the proposed projects from the property line to the nearest abutting residence located at 515 Mashamoquet Road is 62 feet. The distance of the proposed limits of disturbance of the proposed projects from the nearest portion of the residence on the adjacent property, which is the southeast corner of the house, is 425 feet.

**CSC AS 63. In reference to WS' response to Council interrogatory #25, the Petitioner states that the project would be located on the customer side of the meter and the energy would "first be used for on-site load..." If the project parcel is vacant, what would the energy generated be used for on-site?**

On-site load would be created by equipment of the solar facility itself, which is generically referred to as parasitic load.

**CSC AS 64. The Connecticut (Connecticut General Statutes Section 16-1) definition of Customer-side distributed resources is "(A) the generation of electricity from a unit with a rating of not more than sixty-five megawatts on the premises of a retail end user within the transmission and distribution system including, but not limited to, fuel cells, photovoltaic systems or small wind turbines, or (B) a reduction in the demand for electricity on the premises of a retail end user in the distribution system through methods of conservation and load management, including, but not limited to, peak reduction systems and demand response systems." As WS has stated that it is a customer-side generation project, please confirm that the property includes a retail end user or otherwise describe how your facility meets the definition of a customer-side distributed resource.**

Windham Solar objects to the question as irrelevant as C.G. S. 16-50k as "customer-side distributed resources" and "grid-side distributed resources" are treated exactly the same.

**CSC AS 65. Would the Petitioner comply with the Department of Energy and Environmental Protection Stormwater Guidelines (attached)?**

Yes.

# Exhibit A

## UPS Internet Shipping: View/Print Label

1. **Ensure there are no other shipping or tracking labels attached to your package.** Select the Print button on the print dialog box that appears. Note: If your browser does not support this function select Print from the File menu to print the label.
2. **Fold the printed label at the solid line below.** Place the label in a UPS Shipping Pouch. If you do not have a pouch, affix the folded label using clear plastic shipping tape over the entire label.
3. **GETTING YOUR SHIPMENT TO UPS**  
**Customers with a Daily Pickup**  
 Your driver will pickup your shipment(s) as usual.

### Customers without a Daily Pickup

Take your package to any location of The UPS Store®, UPS Access Point(TM) location, UPS Drop Box, UPS Customer Center, Staples® or Authorized Shipping Outlet near you. Items sent via UPS Return Services(SM) (including via Ground) are also accepted at Drop Boxes. To find the location nearest you, please visit the 'Find Locations' Quick link at ups.com.

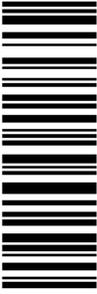

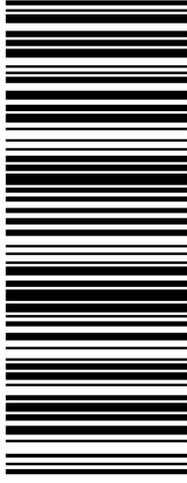

Schedule a same day or future day Pickup to have a UPS driver pickup all of your Internet Shipping packages. Hand the package to any UPS driver in your area.
