Letters of Support

Town of
North Stonington, Connecticut

November 8, 2017

Coronal Energy, LLC
Attn: Russ Edwards
321 E Main Street, Suite 300
Charlottesville, VA 22902

Subject: Pawcatuck Solar Center, North Stonington, CT

Dear Russ:

As First Selectman of the Town of North Stonington, CT, let me take this opportunity to share with you the Town's support for the Pawcatuck Solar Center after review of the project through the public presentation of June 6, 2017 and our discussions regarding the project in the last year.

Per the North Stonington Board of Selectmen Resolution on August 22, 2017, "...the Town of North Stonington, acting through its Board of Selectmen, has a strong interest in: (a) encouraging the development and establishment of environmentally sound power uses, (b) promoting sound economic development, (c) facilitating the uses to which Pawcatuck Solar will put the Leasehold, (d) attracting Pawcatuck Solar to the Town of North Stonington, and (e) increasing the Town's tax revenue."

For these reasons, I fully support this project as you bring it forward to the Connecticut Siting Council.

Sincerely,

Shawn Murphy
First Selectman,

Mashantucket Pequot Tribal Nation

Connecticut Siting Council
Ten Franklin Square
New Britain, CT 06051

Re: Pawcatuck Solar Center

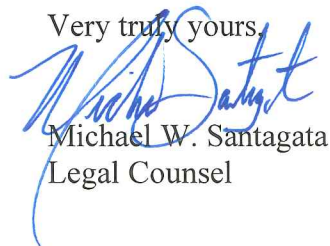

Dear Ms. Bachman:

This letter is in support of the submission by Pawcatuck Solar Center for a Petition for Declaratory Ruling to the Connecticut Siting Council for a solar photovoltaic generation facility on lands owned by the Mashantucket Pequot Tribal Nation (MPTN) in North Stonington, Connecticut after its participation and contract award in the CT DEEP 2016 Clean Energy RFP.

If the Petition is successful, MPTN believes the development will result in a desirable and environmentally sustainable use of our lands. MPTN believes that this project benefits our tribal community and the community at large in a number of ways by stimulating new investment locally and new job growth for construction and installation jobs for MPTN members and the community, developing the land in an environmentally sensitive manner, reducing demand for foreign/fossil fuel resources and substantially increasing the availability of clean, renewable and affordable energy in the State of Connecticut. As a federally recognized Indian tribe, we cannot overstate our pleasure knowing the property will be used a noninvasive and environmentally conscious manner for years to come

The MPTN will continue to lend its support for the project during its development. We look forward to helping this important project come to fruition.

Very truly yours,

Michael W. Santagata
Legal Counsel
