**RESPONSES OF CELLCO PARTNERSHIP D/B/A VERIZON WIRELESS  
TO CONNECTICUT SITING COUNCIL INTERROGATORIES, SET ONE**

On December 14, 2018, the Connecticut Siting Council (“Council”) issued Interrogatories to Cellco Partnership d/b/a Verizon Wireless (“Cellco”), relating to Petition No. 1358, the proposed installation of the Darien SC14 facility. Below are Cellco’s responses.

Question No. 1

Would Cellco Partnership d/b/a Verizon Wireless’ (Cellco) proposed small cell facility provide any additional coverage at 2100 MHz, or is it only intended to address capacity issues?

Response

The proposed Darien SC14 facility will offer capacity relief only to Cellco’s existing Darien CT macro cell off Ledge Road. The Darien CT facility currently provides wire service (coverage) to the area around the proposed facility.

Question No. 2

Is the public right-of-way within which the facility would be located owned by the Town of Darien (Town)?

Response

Yes. The proposed Eversource pole will be located in the public right-of-way owned by the Town.

Question No. 3

What is the Town zoning designation of the area? Describe surrounding land uses.

Response

The Town's zoning designation in this area is R-1 (One Family Residential – 1 acre). The surrounding land use is single family residential.

Question No. 4

Provide a copy of the master pole attachment license agreement. If necessary, file with a Motion for Protective Order.

Response

A copy of the Master License Agreement between Cellco and Eversource is included in Attachment 1.

Question No. 5

Approximately how tall above grade are the existing Eversource poles located adjacent to the proposed facility location?

Response

The existing Eversource poles located on the east side of Goodwives River Road are approximately 30 feet tall.

Question No. 6

Would the proposed wood pole be a similar color to the existing poles?

Response

Yes. Initially, the new wood pole may maintain a slightly different color, but the pole will “weather” following installation and eventually match the color of the existing poles.

Question No. 7

Reference Sheet No. LE-3, RRH Orientation Plan. Would the proposed remote radio head (RRH), power supply and other equipment be located on the south side of the pole? How far out radially or horizontally (max. distance) from the surface of the pole would the equipment extend?

Response

Yes, the RRH and related small cell equipment will be attached to the south side of the new Eversource pole. The RRH will extend approximately 12.2 inches off the face of the pole.

Question No. 8

Reference Sheet No. LE-2. Approximately how high above ground level (agl) is the top of the fiber optical splice closure (FOSC)?

Response

The top of the FOSC is approximately 16 feet above ground level.

Question No. 9

Reference Sheet No. LE-2. Would the proposed centerline height of the RRH be approximately 13-feet 1-inch?

Response

Yes.

Question No. 10

Under Attachment 4 of the Petition, Cellco has an aerial abutters map with the proposed pole location west of Goodwives River Road. Provide an updated aerial abutters map depicting Eversource poles adjacent to the facility and include the utility (electric/telcom) connections from the proposed pole to an adjacent pole, as applicable. Also include the nearest wetland and watercourse on the same map.

Response

The map requested is included in Attachment 2.

Question No. 11

Would the proposed facility have backup power, e.g. battery backup? If yes, for how long could it support the facility during a power outage?

Response

No back-up power, batteries or otherwise, is proposed as a part of the Darien SC14 facility.

Question No. 12

Provide a structural analysis stamped by a Professional Engineer duly licensed in the State of Connecticut to certify that the proposed pole can support the proposed loading.

Response

A Structural Analysis for the proposed wood pole is included in Attachment 3.

Question No. 13

Approximately how deep into the ground would the pole go? Would any impacts to groundwater be anticipated?

Response

Typically, Eversource's installation standards call for poles to be installed a minimum of 10% of the pole height plus 2 feet (approximately 6' in this case) into the ground. Based on the ground elevation at the proposed pole location and the underlying well-drained to excessively well-drained soils, Cellco does not anticipate that groundwater would be encountered by Eversource during the installation of the new pole (e.g., within 6' of the ground surface).

Question No. 14

Is the proposed facility located within a 100-year or 500-year flood zone?

Response

No. See Attachment 2.

Question No. 15

Is the proposed project located within the shaded area of the DEEP Natural Diversity Database?

Response

No. The closest DEEP Natural Diversity Database polygon is approximately 1,475 feet to the northwest of the new pole location.

Question No. 16

Would the proposed facility comply with DEEP Noise Control Standards?

Response

Yes. The proposed small cell facility will not produce any noise.

Question No. 17

Provide the proposed construction hours and days of the week for the proposed project.

Response

Eversource will be responsible for installation of the new pole and typically would perform that work during the day. Once the pole is set, Cellco will be responsible for installation of the small cell antenna and related equipment. Installation of the small cell equipment, including electrical connections, is typically completed in about 8 hours (one day's labor) and will also occur during daytime hours.

THIS AGREEMENT, made as of the date it is signed by Licensor ("Effective Date" or "effective date") by and between The Connecticut Light and Power Company dba Eversource Energy, a specially chartered Connecticut corporation with an office at 107 Selden Street, Berlin, CT 06037 (hereinafter called "Licensor"), and Cellco Partnership d/b/a Verizon Wireless, a general partnership organized and existing under the laws of the State of Delaware, having its principal office located at One Verizon Way, Mail Stop 4AW100 Basking Ridge, New Jersey 07920 (hereinafter called "Licensee"). Collectively Licensor and Licensee are referred to herein as the "Parties" or singularly as a "Party".

**WITNESSETH:**

WHEREAS, Connecticut General Statute Section 16-247a has encouraged the shared use of existing facilities where possible; and

WHEREAS, the Licensee has obtained a certificate of public convenience and necessity from the Connecticut Public Utilities Regulatory Authority which was formerly known as the Connecticut Department of Public Utility Control ("PURA") or has provided CL&P with a legal opinion from Licensee's attorney that Licensee is exempt from PURA's requirement to obtain a certificate of public convenience and necessity; and

WHEREAS, this Agreement governs the terms and conditions under which the Licensor agrees to allow Licensee to attach certain specific Facilities (as said term is defined in Article II) to the Licensor's utility poles located in Connecticut; and

WHEREAS, the Licensor is willing to grant limited and restricted rights to the Licensee pursuant to applicable federal, state and local law and the terms of this Agreement for Licensee to attach its Facilities (as said term is defined in Article II) to such poles provided such attachments will not adversely affect the public service responsibilities or other public utility operations of the Licensor (as said term is defined in Article II), and provided that the Licensor is reimbursed for its costs and protected from liability which may arise there from; and

Capitalized terms used herein have the meaning assigned to such terms in Article II.

NOW THEREFORE, in consideration of the mutual covenants, terms and conditions herein contained, the Parties hereto do hereby covenant and agree as follows:

**ARTICLE I  
SCOPE**

Subject to the provisions of this Agreement, Licensor will issue to Licensee a revocable, nonexclusive license authorizing the attachment of Licensee's wireless Attachments and Facilities to Poles within the (i) public right-of-way and (ii) within those electric distribution easement areas located on private property that have been approved by Licensor, which approval by Licensor will not be unreasonably withheld; and Licensee's proposed installations shall be set forth in more detail in Licensee's application to Licensor for permission to attach to Poles. The Licensee understands that Licensor and Other Owners jointly own certain Poles, and with respect to such Poles that are jointly owned by Licensor and Other Owners, the Licensee shall be responsible for complying with (a) this Agreement and (b) the terms, conditions, policies, procedures and agreements of such Other Owners.

**ARTICLE II  
DEFINITIONS**

0. Affiliate

An entity under common ownership or control with Licensee.

1. Anchor

A facility consisting of an assembly of a rod secured to a fixed object or plate designed to resist the pull of a guy strand or strands.

2. Appurtenance

Any article of equipment attached to a point on a Pole not normally occupied by a strand attachment (i.e., equipment cabinets, terminals, power supplies, etc.).

3. Attachment or Pole Attachment

An Attachment shall consist of the bolts, lags, screws, extension arms (only with specific approval of Licensor on an individual case basis), or other hardware necessary to attach one (1) of Licensee's wireless telecommunications devices to a Pole, all of which must be approved in advance in writing by Licensor pursuant to the terms of this Agreement, including but not limited to Licensor's standards for wireless telecommunications devices in Exhibit F hereto and all supplements and amendments thereto adopted by Licensor from time to time even if copies of such supplements or amendments are not attached to this Agreement..

4. Days

For purposes of this Agreement, all references to Days or days shall be to calendar days.

5. Facilities or Licensee's Facilities

Attachments and all associated equipment, hardware and Appurtenances of Licensee (i) which Licensor has authorized in writing to be attached to one or more Poles pursuant to the terms of this Agreement and (ii) which have been installed for the sole use of the Licensee for any lawful purpose, excluding any wireline cable television or telecommunications facility used to provide backhaul because such wireline facilities are subject to, and governed by, a separate wireline pole attachment agreement between Licensor and Licensee. The singular term for Facilities is "Facility".

6. Guy Strand

A metal cable (Facility) which is attached to a Pole and Anchor (or another Pole) for the purpose of reducing Pole stress.

7. Law

Any and all applicable federal, state and local laws, rules and regulations, orders, ordinances of a governmental authority, including but not limited to orders, rules, tariffs, policies, procedures and regulations of the Connecticut Public Utilities Regulatory Authority which was formerly known as the Department of Public Utility Control or its successor(s) (the "PURA"), including but not limited to the September 29, 2010 decision in Docket No. 08-06-19 concerning the pole attachment make-ready process and June 30, 2010 decision in CL&P's rate case in Docket No. 09-12-05. All references herein to said PURA decisions include all amendments, supplements and clarifications thereto resulting from PURA decisions and/or from PURA-monitored working groups.

8. Licensee

The person, corporation or other legal entity authorized by the Licensor under this Agreement to attach its Facilities to Poles and the party responsible for compliance with applicable Law and Licensor's rules, tariffs, policies, procedures and regulations regarding such accommodations.

9. Licensor

The Connecticut Light and Power Company dba Eversource Energy ("CL&P") and its successors and assigns.

10. Make-Ready Work (Initial/Additional)

All work performed by Licensor, the Other Owners and/or Other Licensees permitted to attach to Poles, including but not limited to, rearrangements and/or transfers of existing facilities, replacement of a Pole or any other work required to accommodate the attachment of Licensee's Facilities to a Pole. Similar work required after initial attachment to a Pole solely because of the existence of the Licensee's Facilities shall be referred to as "additional Make-Ready Work."

11. Non-Conforming Construction/Shifting Fee

Has the meaning provided in Article VIII of this Agreement.

12. Other Licensees

Any person, corporation, or other legal entity, other than the Licensee herein, to whom the Licensor and/or Other Owners has or hereafter shall extend an authorization to attach facilities to a Pole.

13. Other Owners

Telephone companies that have joint ownership of Poles with Licensor and/or those telephone companies that have authorized CL&P to license attachment of Facilities and Appurtenances on such telephone companies' Poles or jointly owned Poles.

14. Periodic Inspection

Inspections conducted by Licensor on portions of Licensee's Facilities, to determine that Attachments and Facilities are authorized and that Attachments and Facilities are maintained in conformance with this Agreement.

15. Pole or Utility Pole

A pole solely owned or jointly owned by the Licensor and/or by an Other Owner and used to support Licensor's facilities, as well as the facilities of an Other Owner, Licensee and/or Other Licensees.

16. Post-Construction Inspection

The work operations and functions performed by Licensor to measure and/or visually observe Licensee's Attachments and/or Facilities within forty-five days after completion of the construction of such Attachments and/or Facilities, to determine that all Attachments and/or Facilities have been authorized and constructed in conformance with the standards required by this Agreement.

17. Pre-Construction Survey

The work operations and functions performed by Licensor to process Licensee's application for Pole Attachments to the point just prior to performing any necessary Make-Ready Work. There are two elements of the Pre-Construction Survey: (1) field inspection of the existing facilities, and (2) administrative effort required to process the Licensee's application and prepare the Make-Ready Work.

18. Unit Cost

A dollar amount subject to periodic revision, applicable to specified work operations and functions, including materials and labor costs.

19. Unauthorized or Non-Conforming Charges

Has the meaning provided in Article VIII of this Agreement.

**ARTICLE III  
PERMITS AND CONSENTS**

1. Permits and Consents

a. The Poles covered by this Agreement shall be only such Poles that fall within the scope of this Agreement (as said scope if defined in Article I) with respect to which Licensor has the power and privilege of granting licenses. Licensee shall be responsible for obtaining from Other Owners, private and/or public authority any necessary easement, right of way, license, permit, permission, certification or franchise to construct, operate and/or maintain its facilities on private and public property at the location of the Pole to which Licensee seeks to attach its Facilities. Licensee shall furnish proof of any such easement, right of way, license, permit, permission, certification, or franchise within thirty (30) days of request by Licensor. The Licensor does not warrant the validity or apportionability of any rights it may hold to place facilities in the public right-of-way and on private property. The license granted to Licensee under this Agreement is granted on an "AS IS" basis, subject to applicable Law and existing and future rights of third parties; Licensor makes no representation, covenant or warranty as the quality of, scope of, and title to, the rights granted to Licensee under this Agreement.

b. The Licensee expressly recognizes that Poles are used and are to continue to be used primarily for the Licensor's electric utility-related purposes. Additionally, any licenses for Attachments and/or Facilities under this Agreement are personal to Licensee and are not for use by any entity other than Licensee for its own business purposes unless otherwise agreed to in writing by Licensor. Except as otherwise provided in this Agreement, the Licensee agrees that it will pay, as additional charges under this Agreement, all the costs incurred by the Licensor in connection with any work performed by the Licensor in order to provide or maintain space on any Pole for the Licensee's Attachments and/or Facilities, and any other costs incurred by the Licensor arising out of this Agreement, as hereinafter provided.

2. Requirement to Construct and Maintain a Pole and Anchor

Nothing contained herein shall be construed to compel the Licensor to construct, reconstruct, retain, extend, repair, place, replace or maintain any Pole or Anchor or other facility not needed for the Licensor's own service requirements. In the event that Licensor abandons any Pole to which Licensee's Facilities are attached, Licensor shall provide Licensee notice of such abandonment.

**ARTICLE IV  
PROCEDURES**

1. Application for Authorization

a. In General. Licensor grants Licensee a non-exclusive right on an "AS IS" basis to attach its Facilities to any Poles for which Licensor has the power and privilege of granting licenses within Licensor's operating territory in the State of Connecticut in accordance with all applicable Law and the terms of this Agreement.

b. Application for Authorization for Proposed Third-Party Overlashings by Sub Licensee(s). Third Party Overlapping will be allowed under the following conditions: Intentionally blank.

c. Application for Authorization for Licensee's Proposed Attachments.

(i) Whenever the Licensee wishes a license to attach its Attachments and Facilities to any Poles, it shall make an application therefore on the forms, copies of which are appended to this Agreement as **Exhibits A and B** and Internet access to such forms is intended to be made available on a Licensor's Web Site; *provided, however*, Licensor currently utilizes pole management software system called "NOTIFY" to facilitate pole management practices, and therefore, Licensee shall be required to submit at Licensee's expense appropriate data (in the format and content as directed by Licensor) concerning Licensee's Attachments and Facilities into the NOTIFY system or such other replacement electronic pole data management system that Licensor elects to utilize. The Licensee shall specify the location of the Pole or Poles involved and shall specify what Attachments and Facilities it wishes to attach to each Pole. Licensee must receive authorization from Licensor prior to commencing any attachment work. Licensee shall furnish Licensor with such engineering data as requested by Licensor including whether services charged at the telecommunications rate under Connecticut law are being carried. Each application shall include the Application Fee as set forth in Article VIII, Rates and Charges. Licensee shall file each application for such authorizations in blocks of five (5) Poles or fewer per application and all of the Poles in a single application must be located within the geographic boundary of a single municipality. If multiple applications are filed at one time, Licensee shall designate a desired priority.

(ii) Licensor shall process applications, perform any required engineering and surveys, perform any Make-Ready Work, and perform any other required functions on a first come first serve basis and in accordance with the PURA's September 29, 2010 decision in Docket No. 08-06-19 and applicable Law. Licensor shall be under no obligation to grant any license, or if a license has already been granted, may cancel any such license on sixty (60) days' written notice, if in Licensor's judgment reasonably exercised the grant (i) would be or is in non-compliance with applicable Law or the requirements and specifications as denoted in Article IV, Section 2, or (ii) in instances of insufficient capacity, or for reasons of safety, reliability, or generally applicable engineering standards.

(iii) Licensor shall be under no obligation to grant or continue any license for an Attachment or Facility if Licensee has any outstanding and overdue payments owing to Licensor under this Agreement or any agreement with Licensor for the provision of Pole Attachments and/or installation of other facilities.

(iv) In accordance with the September 29, 2010 decision in Docket No. 08-06-19, Licensor shall have forty-five (45) days from (i) Licensor's receipt of a completed Pole Attachment application and all required application fees from Licensee and (ii) Licensee's satisfaction of the applicable provisions in this Agreement to prepare an estimate of the Make-Ready Work that is necessary to process Licensee's Pole Attachment application or issue a permit.

d. Process Governing Proposed Overlashing by Licensee. Intentionally blank.

2. Standards & Specifications for Attachments and Facilities.

a. Technical Standards Governing Licensee's Attachments and Facilities.

i. Licensee's Attachments and Facilities shall be placed, maintained, relocated or removed in accordance with the requirements and specifications of applicable Law, the current editions of the Bell Operating Companies Manual of Construction Procedures (Blue Book), the National Electrical Code (NEC), the National Electrical Safety Code (NESC), the rules and regulations of the Occupational Safety and Health Act (OSHA), the Environmental Protection Agency (EPA), PURA and the Department of Energy and Environmental Protection (DEEP), any town ordinances, and the rules and regulation of any other governing authority having jurisdiction. Licensee's activities and Licensee's Attachments and Facilities shall also comply with Licensor's standards, polices, practices and procedures governing pole attachments, including the standards in **Exhibit F** hereto, and Licensor's safety, reliability, construction and engineering requirements, each as may be updated from time to time which are included by reference herein and which shall be applied on a non-discriminatory

basis. Where a difference in specification may exist, the more stringent shall apply. Licensee's Attachments and Facilities shall not physically, electronically, inductively, or otherwise interfere with the facilities of Licensor, Other Owners and Other Licensees. Licensee shall always maintain a twelve (12) inch (30.48cm) separation from any existing communications facilities.

ii. The Licensee's Attachments and Facilities must also contain a manual shut-off device that is deemed to be acceptable by Licensor. When necessary, as determined by Licensor in its sole discretion, the Licensor, its employees or agents may turn-off Licensee's Attachments and Facilities in order to safely perform work. Neither Licensor, its employees or agents shall be liable to Licensee or any third party for any damages whatsoever whenever Licensee's Attachments and Facilities are turned-off in order to safely perform work or when Licensor is performing work on or near Poles in response to emergency situations or restoring electric service following storms and other weather events.

b. Additional Standards Governing Licensee's Attachments and Facilities.

i. Licensee shall exercise all necessary precautions to avoid damage to facilities of Licensor, Other Owners, Other Licensees and of others occupying space on said Poles, and hereby assumes all responsibility for any and all loss from damage caused by Licensee. The Licensee shall make an immediate report to Licensor of the occurrence of any damage and, within 60 days of Licensee's receipt of a request for reimbursement, Licensee hereby agrees to reimburse Licensor, Other Owners and/or Other Licensees, as applicable, for any damage caused by Licensee.

ii. Except in cases of emergency, Licensee shall not at any time make any additions to, or changes in, the location of its Attachments and/or Facilities covered by this Agreement without the prior written consent of Licensor. Where additions or changes are made without prior written consent and consent is otherwise required by this Agreement, permission shall be subsequently requested and confirmed in writing.

iii. Licensee shall place a color coded (as determined by Licensor) label designating its ownership of any Facilities at each Pole. Such label must be recognizable by Licensor from ground level. If Licensee had existing licensed Facilities pursuant to a former agreement with Licensor and/or any Other Owner, Licensee shall label such existing Facilities. For all Facilities made or installed by Licensee after the Effective Date of this Agreement, the placement of such labels shall be made by Licensee at the time each such post-Effective Date attachment or installation is made by Licensee; and with respect to those Facilities installed by Licensee prior to the Effective Date of this Agreement, the placement of such labels shall be made by Licensee in the ordinary course of work by Licensee on Poles containing such pre-Effective Date installations.

3. Pre-Construction Surveys and Make-Ready Work.

a. A Pre-Construction Survey will be required for each Pole for which attachment is requested to determine the adequacy of the Pole to accommodate Licensee's Facilities. The field inspection will be performed by representatives of the Licensor with optional participation by Other Owner(s), Other Licensees and the Licensee. Licensor shall use commercially reasonable efforts to provide advance notice to allow such optional participation.

b. (i) In the event the Licensor determines that a Pole to which Licensee desires to make attachments likely cannot accommodate Licensee's proposed Attachment(s) and/or Facility(ies) or needs rearrangement of the existing facilities thereon to accommodate Licensee's proposed Attachment(s) and/or Facility(ies), the Licensor will inform Licensee in writing of the cost of the required Make-Ready Work; (ii) charges for Make-Ready Work shall be as specified in Article VIII, Rates and Charges; and (iii) any costs directly related to the construction and installation of the new Pole, and the removal and disposal of the prior Pole, shall be considered Make-Ready Work charges; *provided, however*, notwithstanding the foregoing, if a Pole was not compliant with applicable Law or the standards set forth in Section IV(2)(a) of this Agreement prior to Licensee's request and if Licensee was not responsible in any way for such non-compliance, then any costs associated with changes required to bring such Pole into compliance shall not be charged to Licensee, and *provided further*, that this paragraph shall not constitute a release or waiver by Licensor of any claim that Licensor has

or may have to recover the cost of correcting any non-compliance caused by Licensee.

c. Licensor shall specify the point of attachment on each of the Poles to be occupied by Licensee's Attachments and Facilities.

d. Licensee shall have forty-five (45) days from the receipt of written notification from the Licensor of the costs of Make-Ready Work to accept and pay all Make-Ready Work costs; *provided, however*, that if the Licensor receives a request from an Other Licensee for an authorization to attach to a Pole for which a written notification of Make-Ready Work costs has been sent to Licensee, then Licensee must accept the Make-Ready Work costs, within fifteen (15) days after receipt of notification from the Licensor of the other attachment request or by the end of the forty-five (45) day period, whichever period of time is shorter.

e. In accordance with the September 29, 2010 decision in Docket No. 08-06-19, Licensor shall have forty-five (45) days from (A) Licensor's receipt of full payment of the charges for Make-Ready Work and (B) Licensee's satisfaction of the applicable provisions in this Agreement to complete the Licensor's Make-Ready Work that is necessary to process Licensee's Pole Attachment application; *provided, however*, that (X) if any Other Owner or any third party must perform make-ready work in order to accommodate Licensee's proposed Pole Attachment, then (i) Licensor shall use commercially reasonable efforts to coordinate Licensor's Make-Ready Work with the make-ready work of such other entities so that such other entities have sufficient time within said 45-day period to perform their respective make-ready work and (ii) Licensor is not responsible for any delays in the performance of Licensor's Make-Ready Work if such delays are attributable to the failure of Other Owner(s) and/or any third party to timely perform shift or perform make-ready work on the facilities of such Other Owner(s) and/or third party(ies); (Y) the April 30, 2008 decision in Docket No. 07-02-13, which was incorporated into the September 29, 2010 decision in Docket No. 08-06-19, extend such 45-day period by an additional 35 days if any Pole replacement is required to facilitate Licensee's proposed Pole Attachment; and (Z) Page 19 of the April 30, 2008 decision in Docket No. 07-02-13, which was incorporated into the September 29, 2010 decision in Docket No. 08-06-19, further extends such 45-day period (or 80-day period pursuant to subsection (Y) above) in the event "special situations . . . (e.g., inclement weather and emergency situations)" exist.

f. If the Licensor requires modifications to its facilities including, but not limited to, the replacement of a Pole, and if such modifications are necessary or appropriate for Licensor's electric utility-related purposes, and if such modifications would not be necessary except for the Licensee's Attachment to the Pole and/or Facilities, Licensee shall perform any such required modifications of its Attachments or Facilities at its sole cost and expense.

g. Upon notice from the Licensor, Licensee shall promptly perform (within the time period specified by Licensor) any make-ready work necessary on Licensee's Attachments and/or Facilities to accommodate an Other Licensee's attachment to a Pole and each such Other Licensee shall pay all costs for such make-ready work, *provided, however*, that Licensee is responsible for invoicing each such Other Licensee and collecting from each such Other Licensee payment for the costs incurred by Licensee to perform said make-ready work. The Licensor shall not be liable for any such expense. If Licensee fails to perform such make-ready work within the time period specified by Licensor, then the Licensor shall have (i) the right to assess the Non-Conforming Construction/Shifting Fee in accordance with Article VIII, Rates and Charges or (ii) the right, but not the obligation, to perform the make-ready work and charge Other Licensee the cost of performing such work.

h. Licensee shall reimburse Licensor for all traffic control costs incurred by Licensor to accommodate Licensee's Facilities and/or Attachments to Poles. When traffic control is necessary for Licensee during the performance of Licensee's make-ready work to accommodate attachments from Other Licensees to Poles, then such traffic control shall be arranged for by Licensee.

i. Licensee shall notify the Licensor in writing before adding to, relocating, replacing, adjusting or otherwise modifying its Attachments and/or Facilities on a Pole.

j. All tree trimming made necessary, by Licensee's proposed Attachments and/or Facilities shall be performed by Licensee or its contractors at the sole cost and expense of Licensee. Costs incurred by Licensor

for tree trimming associated with emergency and storm conditions shall be shared fully among all parties on a Pole, including Licensee; and costs for the performance of tree trimming associated with emergency and storm conditions are currently not recovered from Licensee in Licensor's semi-annual pole attachment rental charge in Exhibit E hereto.

k. All costs incurred by Licensor to accommodate Licensee's proposed Attachments and/or Facilities to Poles shall be reimbursed by Licensee to Licensor within 45 days of Licensor's request therefore. Such costs shall include, but are not limited to (i) costs directly related to the purchase, construction, removal and/or environmental disposal of Poles, and (ii) costs incurred in complying with applicable Law and/or town ordinances, decisions, directions, permitting requirements or ordinances of the EPA, DEEP, PURA or other governmental body having jurisdiction.

4. Inspections of Licensee's Facilities

a. Licensee shall provide written notice to the Licensor, at least twenty (20) days in advance of starting work, of the exact Pole locations where Licensee proposes to place its Attachments and Facilities. Licensee shall also notify the Licensor in writing within five (5) days of the date(s) of attachment of Licensee's Attachments and/or Facilities to the Poles.

b. The Licensor reserves the right to make Post-Construction and Periodic Inspections (of any part or all) of Licensee's Facilities and/or Attachments attached to Poles.

c. Intentionally blank.

d. The making of Post-Construction and/or Periodic Inspections or the failure to do so shall not operate to relieve Licensee of any responsibility, obligation or liability specified in this Agreement.

e. The costs of inspection made during construction and/or the initial Post-Construction Inspection are included in the Make-Ready Work charges. The costs of Periodic Inspections or any inspections found necessary due to the existence or potential existence of substandard, non-conforming or unauthorized Attachments and/or Facilities are the responsibility of the Licensee. Costs attributable to Periodic Inspections for unauthorized Attachments and/or Facilities, or non-conforming conditions, will be charged to the party responsible for the unauthorized Attachments and/or Facilities, or non-conforming condition in addition to Unauthorized or Non-Conforming Charges provided that no such costs can be collected from Licensee if any such cost is already recovered in the semi-annual Pole attachment rental rate that Licensor charges to Licensee pursuant to Exhibit E hereto.

5. Non-Conforming Conditions

a. (i) Any Attachment or Facility of Licensee that does not comply with the requirements of Article IV, Section 2(a) shall be deemed to be "non-conforming". Licensee shall be obligated to correct any non-conforming conditions within thirty (30) days of the date of the written notice from the Licensor and shall perform such correction itself or designate an Other Licensee to perform such correction (but no such designation of an Other Licensee to perform such work shall relieve Licensee of its obligations hereunder); *provided, however*, that: (A) the Licensee shall remedy each such non-conforming condition within the accelerated time period specified by Licensor if the Licensor determines that the non-conforming condition (i) constitutes a material threat to the public safety or the safety of the Licensor's employees, Other Owner's employees or Other Licensees, (ii) interferes with the performance of the Licensor's or Other Owner's service obligations, (iii) poses an immediate threat to the physical integrity of the Pole plant or (iv) must be corrected sooner than 30 days per applicable Law, including the April 30, 2008 decision in Docket No. 07-02-13 and September 29, 2010 decision in Docket No. 08-06-19, then Licensee shall remedy each such non-conforming condition within the accelerated time period specified by Licensor; and (B) if any non-conforming condition is deemed by Licensor to not to be "material", then Licensee shall have a total of 180 days to correct such non-conformance. Notwithstanding the foregoing, where correction cannot reasonably be completed within the applicable time period, Licensee shall be obligated to commence correction within thirty (30) days and to work diligently to complete correction as promptly as possible.

(ii) If the Licensee fails to correct any such non-conforming condition within the applicable time period then: (A) the Licensee's permission to attach its Attachments and/or Facilities to the Poles in question shall be revoked forthwith, and/or

(B) Licensor shall have the right, but not the obligation, to correct said conditions and Licensee shall pay to the Licensor the cost of performing such work.

b. When such non-conforming conditions pose a material threat to the public safety or the safety of the Licensor's employees, Other Owner's employees or Other Licensees, interfere with the performance of the Licensor's or Other Owner's service obligations, or pose an immediate threat to the physical integrity of the Pole plant, the Licensor may perform such work and/or take such action that the Licensor deems necessary upon notice when practicable to Licensee and without any liability to Licensee or its customers, other than for Licensor's willful misconduct or gross negligence. If prior notice is not practicable, Licensor shall notify Licensee as soon as reasonably practicable after taking any such action. The cost of said work and/or actions shall be borne by Licensee.

c. Licensee shall be liable to Licensor for the Non-Conforming Construction/Shifting Fee set forth in Article VIII, Rates and Charges, for each Attachment and Facility for each day beyond the applicable time period described in Article IV, Section 5(a) above that the non-conforming condition remains uncorrected subject to the cap established herein.

#### 6. Unauthorized Attachments

a. Licensee must receive prior written authorization from Licensor for any of the following:

(i) attachment of any Appurtenances, Attachment and/or Facilities to Poles;

(ii) Sublicense or assignment of authorization as provided in Article IX, Section 5.

b. Pre-Effective Date unauthorized Attachments Facilities. Intentionally blank.

c. Unauthorized Attachments Facilities and/or Third Party Overlapping. The following terms and conditions apply to unauthorized Attachments and Facilities. The Licensor, without prejudice to its other rights or remedies under this Agreement, including revocation or otherwise, may charge an Unauthorized Attachment Fee per Pole for each unauthorized Attachment and/or Facility, as specified in Article VIII, Section (4). Licensor will require the Licensee to submit in writing, a Pole Attachment application for all unauthorized Attachments and Facilities. If such application or notice, as appropriate, is not received by the Licensor within thirty (30) days after receipt of written notice by the Licensor of the unauthorized condition, Licensor may, in its sole discretion, require Licensee to remove its unauthorized Attachment and/or Facility within ten (10) days of the final date for submitting the required application, or the Licensor may remove each such unauthorized Licensee's Attachment and/or Facility without liability, and the cost of such removal shall be borne by the Licensee.

d. No act or failure to act by the Licensor with regard to any unauthorized Attachment and/or Facility shall be deemed as the authorization of such unauthorized Attachment and/or Facility; and, if any authorization should be subsequently issued, said authorization shall not operate retroactively or constitute a waiver by the Licensor of any of its rights or privileges under this Agreement, or otherwise, *provided, however*, that Licensee shall be subject to all liabilities, obligations and responsibilities of this Agreement in regard to said unauthorized Attachment and Facility from its inception.

#### 7. Rearrangements and Shifting

a. (i) Licensor may elect to perform all rearrangements and shifting of Licensee's Attachments and/or Facilities as required in emergency or storm restoration conditions, vehicular accidents, threat to general public, public work projects and/or in order to comply with applicable Law, to accommodate Licensor, Other

Owners, or Other Licensees, and during normal Pole moves, maintenance, and replacements provided that, to the extent practicable under the circumstances (as determined by Licensor), prior notice and an opportunity to perform the rearrangement and shifting is provided to Licensee. With respect to any damage to Licensee's Attachments and/or Facilities caused by Licensor during or arising out of an emergency or storm restoration conditions, vehicular accidents, threat to general public, public work projects, Licensor shall not be liable therefore unless such damage was caused by Licensor's gross negligence or willful misconduct.

(ii) Licensor may rearrange and reattach Licensee's Attachments and/or Facilities as needed under emergency conditions, but is under no obligation to do so. If Licensor is unable to perform the rearrangement or shifting at its sole determination, in non-emergency conditions, for reasons including but not limited to technical concerns, safety concerns or risk of damage or interference with Licensees' Attachments and/or Facilities, Licensor shall contact Licensee and Licensee shall (A) perform any such rearrangement or shifting within the time period required by applicable Law (and if no time period is required by applicable Law then the time period shall be established by Licensor) and provide notice to Licensor of completion of such rearrangement or shifting or (B) authorize an Other Licensee to perform such rearrangement or shifting (but no such designation of an Other Licensee to perform such work shall relieve Licensee of its obligations hereunder). If Licensee fails to perform such rearrangement or shifting and provide notice to Licensor of completion within the applicable time period, the Non-Conforming Construction/Shifting Fee as set forth in Article VIII, Rates and Charges, will apply on a daily basis per rearrangement or shift location until notification from the Licensee that the work has been completed.

b. The costs of rearrangements and shifting, including the cost of traffic control, performed by Licensor on behalf of the Licensee will be borne by the Licensee as set forth in Article VIII, Rates and Charges.

c. Licensee shall arrange and pay the cost of any rearrangement or shifting, including traffic control, during rearrangements or shifting for which Licensee is responsible.

#### 8. Extraordinary Events

In the event or circumstances beyond the control of either Party, including but not limited to severe storms, natural disasters, or other extraordinary events, which cause damage to Licensee's Attachments and/or Facilities, Licensor's facilities, Other Owner's facilities, Other Licensee's facilities and/or to Poles, or require replacement of Poles, Licensee shall be responsible for removing and/or reattaching its Attachments and Facilities to the Pole(s).

### ARTICLE V OTHER OBLIGATIONS OF LICENSEES

#### 1. Insurance

a. Licensee shall carry insurance policies issued by an insurance carrier licensed to operate in the State of Connecticut to protect the Licensor, as named or additional insured, from and against any and all claims, demands, actions, judgments, costs, and/or expenses, including attorney's fees, and liabilities which may arise or result, directly or indirectly, from or by reason of such loss, injury or damage for the amounts specified as follows:

b. The amounts of such insurance:

(i) against liability due to injury or to death of persons shall be not less than \$1,000,000 as to any one person and \$1,000,000 as to any one occurrence, and

(ii) against liability due to damage to property shall be not less than \$1,000,000 as to any one occurrence.

c. Licensee shall also carry such insurance as will protect Licensee from all claims under any Worker's Compensation Law in effect that may be applicable.

d. All insurance must be effective before the Licensor shall issue authorizations for attachment of Licensee's Attachments, Overlashings and Facilities to any Pole, and shall remain in force as long as Licensee's Attachments, Overlashings and Facilities remain attached to any Pole. In the event that Licensee shall fail to maintain the required insurance coverage, the Licensor may pay any premiums thereon falling due and the Licensee shall reimburse the Licensor for any such payments made.

e. At the time the Licensee submits its payment to Licensor for the most recent semi-annual rental charges/rates owed by Licensee to Licensor, the Licensee shall submit to the Licensor certificate(s) by each company insuring Licensee for all liabilities of Licensee referred to hereunder. Licensee shall ensure that its insurance policies provide that they will not cancel each such policy of insurance issued to Licensee except after thirty (30) days' prior written notice to the named insured parties. Licensor shall be named as additional insureds on such policy(ies) of insurance.

f. Licensee shall promptly advise the Licensor of all claims relating to damage to property or injury to or death of persons, arising or alleged to have arisen in any manner, directly or indirectly, by the erection, maintenance, repair, replacement, presence, use or removal of the Licensee's Facilities on Poles by Licensee or its assigns, agents and/or employees. Copies of all accident reports and statements related to such claims made to the insurer by the Licensee, or others, shall be maintained and made available to the Licensor upon request.

g. Licensee shall be entitled to satisfy all or any portion of the insurance requirements set forth in this Article V through a valid self-insurance program, as long as Licensee provides Licensor with written proof of such self-insurance and such self-insurance complies with the requirements of this Article V.

## 2. Collateral (Surety Bond, etc.)

a. Licensee shall furnish a bond from a surety licensed to do business in the state of Connecticut or other evidence of financial security deemed acceptable to Licensor in an amount specified as follows, to guarantee the payment of any sums which may become due to the Licensor hereunder and any other charges for work performed for Licensee, by the Licensor, for which Licensee is responsible, including the removal of Licensee's Attachments and Facilities upon termination of any authorization issued hereunder, and any such amounts remain unpaid for more than thirty (30) days. Such bond or other satisfactory evidence of financial security provided by Licensee shall remain in effect until twenty-four (24) months after the end of this Agreement.

(i). Licensee shall furnish a bond, irrevocable letter of credit or other security satisfactory to the Licensor in the following amounts: Security in the amount of \$25,000, shall be required for each authorized Attachment. The total amount of security required hereunder shall not exceed \$300,000 or be less than \$25,000.

(ii). If the financial security is in the form of a bond or irrevocable letter of credit, such instrument shall be issued by a surety company or bank licensed to do business in the state of Connecticut. The instrument shall contain a provision that the surety company or bank will pay the Licensor within the dollar limits of the instrument any sum demanded by the Licensor as due under this Agreement, whether or not the Licensor exercises or has exercised any option it may have to terminate. If any such amounts are paid by surety company or bank, the Licensee shall restore the surety bond or letter of credit to the full amount required under this Article V, within thirty (30) days after notice of such payment is sent to the Licensee.

(iii). The amount of the bond or the financial security shall not operate as a limitation upon the obligations of the Licensee.

(iv) If Licensee provides Licensor with either (A) a copy of a written pole attachment

agreement between Licensee and SNET d.b.a. AT&T Connecticut, Inc. and its successors and permitted assigns ("AT&T"), which was executed by both parties prior to June 30, 2010 and in which AT&T has explicitly stated that Licensee is not required to provide AT&T with a surety bond or any other form of collateral as security for the performance of Licensee's contractual obligations to AT&T under such pole attachment agreement, or (B) a notarized statement signed by an officer of Licensee that Licensee has an agreement with AT&T and that AT&T has not required Licensee to furnish a bond for at least five (5) years prior to the date of this Agreement, then Licensee shall be exempt from the requirement in this Article V, Section 2 to provide Licensor with a surety bond or other form of collateral, provided that such exemption for Licensee shall automatically expire if at any time in the future AT&T requires Licensee to provide, or Licensee agrees to provide AT&T with, a surety bond or other form of collateral under a pole attachment agreement with AT&T.

#### **ARTICLE VI LIABILITY AND DAMAGES**

1. Licensee (each an "Indemnifying Party") shall indemnify, hold harmless and defend Licensor and its officers, directors, employees, attorneys, agents and affiliates (collectively, the "Indemnified Party") from and against any and all claims, demands, causes of action and costs (including reasonable attorney's fees) ("Claims") for any damages to property or persons caused by the acts or omissions of the Indemnifying Party, its agents, contractors, employees or sublicensees; provided, however, that the indemnification obligations set forth in this Section VI(1) are limited to Claims arising out of, or associated with, the subject matter governed by this Agreement. An Indemnified Party shall notify the Indemnifying Party of any such claims, demands, causes of action and costs as soon as is reasonably practicable and shall cooperate in the defense of such matters.

2. In the event Licensee or Licensee's Attachments and/or Facilities physically or electronically damage or interfere with Licensor's, Other Licensee's or Other Owner's facilities, (i) Licensee shall promptly repair such damage and eliminate such interference at Licensee's expense and (ii) Licensee shall reimburse Licensor (within 30 days of Licensor's request for reimbursement) for all actual, consequential, indirect and special damages, costs, fees and expenses, including lost business profits and business interruption damages, sustained by Licensor, its employees, agents and/or Licensor's electric customers.

3. Should the Licensor remove Licensee's Attachments and/or Facilities from a Pole under Article VII, Revocation of Authorizations, the Licensor will deliver to the Licensee the Attachments and/or Facilities so removed upon payment by Licensee of the cost of removal, storage and delivery, and all other amounts due the Licensor. In the event that Licensee does not reimburse Licensor for the cost of removal, Licensor shall have the right to sell such removed Licensee Attachments and/or Facilities, with a power of public or private sale, to cover any amounts due the Licensor. Such remedy shall not operate to prevent the Licensor from pursuing, at its option, any other remedy in Law, equity or otherwise.

4. Licensor assumes no liability for failure to inspect any of Licensee's Attachments and/or Facilities.

#### **ARTICLE VII REVOCAION OF AUTHORIZATIONS; DISPUTE RESOLUTION**

1. In addition to rights of termination provided to the Licensor under other provisions of this Agreement, the Licensor shall have the right to revoke authorizations for the attachment of Attachment(s) or Facility(ies) previously granted to Licensee (but not the right to terminate this Agreement) where:

a. the Licensee's Attachment(s) and/or Facility(ies) are maintained or used in violation of any Law, regulation or in aid of any unlawful act or undertaking; or

b. the Licensee ceases to have authority to construct and operate its Attachment(s), and/or Facility(ies) on public or private property at the location of the particular Pole covered by the authorization; or

c. the Licensee fails to comply with any of the terms and conditions of this Agreement or defaults in any of its obligations hereunder and the applicable cure period, if any, has expired; or

d. the Licensee attaches to a Pole without having first been issued written authorization therefore; or

e. the Licensee, subject to the provisions specified in Article IX (5), Assignment of Rights, should cease to provide its services; or

f. the Licensees' Attachment(s) and/or Facility(ies) are used by others not a party to this Agreement and who have not been authorized by Licensor as specified in Article IV, Section 6, Unauthorized Attachments or Article IX, Section 5, Assignment of Rights; or

g. the Licensee sublicenses a portion of a licensed Attachment(s), and/or Facility(ies) to an entity not a party to this Agreement without permission from Licensor.

2. The Licensor will promptly notify the Licensee in writing of any instances cited in Article VII(1) preceding, upon its determination of the same. The Licensee shall take corrective action as necessary to eliminate the non-compliance with Article VII(1) and shall confirm in writing to the Licensor within thirty (30) days following such written notice that the non-compliance has ceased or been corrected. If Licensee fails to discontinue such non-compliance or to correct same and fails to give the required written confirmation to the Licensor within the time stated above, in addition to any other rights of Licensor under this Agreement, the Licensor may elect to (i) revoke the authorizations granted hereunder for Poles as to which such non-compliance continues to occur, or (ii) cure Licensee's non-compliance, in which case Licensee shall reimburse Licensor (within 30 days of Licensor's request for reimbursement) for all costs incurred by Licensor to cure Licensee's non-compliance with Article VII(1), and Licensee shall indemnify Licensor from any damage caused to Licensee's Attachment(s) and/or Facilities and/or other property resulting from Licensor's curative actions except that such indemnification shall not extend to any damage directly resulting from Licensor's willful misconduct or gross negligence.

3. This entire Agreement and all authorizations and rights granted under this Agreement may be immediately terminated by the Licensor if:

a. The Licensee's insurance carrier shall at any time notify the Licensor that the policy or policies of insurance as required in Article V, Other Obligations of Licensee, will be or have been canceled or amended so that those requirements will no longer be satisfied.

b. The Licensee shall fail to pay any sum due or to deposit any sum required under this Agreement, or shall fail to maintain satisfactory security as required in Article V, Other Obligations of Licensee, Section 2.

c. Any authorization which may be required by any Law, governmental or private authority for the construction, operation and maintenance of the Licensee's Attachment(s) and/or Facility(ies) on a Pole is denied, revoked, or canceled in a final, non-appealable order.

d. Upon evidence from the Licensor to the Licensee that the use of any Pole or Poles is forbidden by Law and/or federal or state authorities, permission to attach to such Pole or Poles shall be immediately revoked and the Attachment(s) and/or Facility(ies) of the Licensee shall be removed at once from the affected Pole or Poles by the Licensee.

e. The Licensor determines that any Attachment or Facility of Licensee does not contain the safety shut-off device(s) required by Licensor.

4. Licensee may at any time remove its Attachment(s) and/or Facility(ies) from a Pole after first giving the Licensor written notice of Licensee's intention to so remove. Before any Attachment(s) and/or Facility(ies) can be removed from a Pole, Licensee shall provide Licensor with completed copies of the forms in

**Exhibits C and D** hereto which identify each Pole affected by Licensee's request to remove; *provided, however*, Licenser currently utilizes pole management software system called "NOTIFY" to facilitate pole management practices, and therefore, Licensee shall be required to submit at Licensee's expense appropriate data (in the format and content as directed by Licenser) concerning Licensee's Attachments and Facilities into the NOTIFY system or such other replacement electronic pole data management system that Licenser elects to utilize.

5. In the event of termination of any of the Licensee's authorizations hereunder, the Licensee will remove its Attachment(s) and/or Facility(ies) from the Poles within a reasonable period in light of the number of attachments (and if a reasonable period of time cannot be mutually approved by Licenser and Licensee, then Licensee shall have one year from the date of termination of this Agreement to perform such removal work); *provided, however*, that Licensee shall be liable for and pay all fees and charges pursuant to provisions of this Agreement to the Licenser until Licensee's Attachment(s) and/or Facility(ies) are actually removed from the Poles. If the Licensee fails to remove its Attachment(s) and/or Facility(ies) within the specified period, the Licenser shall have the right, but not the obligation, to remove such Attachment(s) and/or Facility(ies) at the Licensee's expense and without any liability on the part of the Licenser for damage or injury to such facilities or interruption of Licensee's services. In the event Licenser removes any of Licensee's equipment from Poles pursuant to this Section, Licenser may hold such equipment as security for the payment of any sums due under this Agreement or may sell such equipment at a public or private sale without notice to the Licensee or may turn such equipment over to the Licensee, or may do any combination of these things. In the event that Licenser sells any of the Licensee's equipment, Licenser shall apply the proceeds to the payment of sums due under this Agreement and shall turn the balance, if any, over to the Licensee.

6. When Licensee's Attachment(s) and/or Facility(ies) are removed from a Pole, no Attachment to the same Pole shall be made until the Licensee has first complied with all of the provisions of this Agreement as though no such Pole attachment had been previously made and all outstanding charges due to the Licenser for such Pole attachment have been paid in full.

7. Dispute Resolution.

Either Party may, at any time, submit a dispute for resolution by PURA. If PURA (i) declines to exercise jurisdiction over the dispute or (ii) fails to issue a decision or order within 180 days of the submission of the dispute to PURA, then at any time thereafter either Party can seek relief from a court located in the State of Connecticut or agency of competent jurisdiction located in Connecticut. Nothing herein shall prevent Licensee or Licenser from filing a complaint with PURA or another agency located in Connecticut or court of competent jurisdiction located in Connecticut at any time.

## ARTICLE VIII RATES AND CHARGES

The Licensee is responsible for payment of all rates and charges as specified elsewhere in this Agreement and as set forth below. Licensee shall be responsible for payment of the Application Fee and all charges for Make-Ready Work, in advance for work performed or expenses incurred by the Licenser regardless of whether Licensee subsequently withdraws its application for Attachment authorizations for the Poles on which such work was performed.

Licensee agrees that, in the event Licensee fails to pay an amount due and payable within the period of time set forth for payment in this Agreement, interest shall accrue on the unpaid balance thereof at the rate of 1 and 1/2% per month for each month from the expiration of such period until payment is received by Licenser or the maximum interest rate permitted by Law, whichever is the lesser amount.

1. Agreement Establishment Fee

The Agreement Establishment Fee as specified in **Exhibit E** shall be due and payable upon the execution of this Agreement. Licenser shall be under no obligation to process Pole attachment applications prior to receipt of payment of this fee.

2. Application Fee

The Application Fee shall be included with each application submitted by Licensee to Licensor. The Application Fee includes Licensor's provision of engineering and Pre-Construction Survey. The Application Fee is comprised of two rate elements, a non-recurring charge per application and a per Pole charge. Licensor shall be under no obligation to accept any application without the Application Fee as specified in Exhibit E.

3. Pole Attachment License Fee

a. The Pole Attachment License Fee will be assessed on a per Attachment basis as set forth in the current schedule of rates in Exhibit E.

b. Intentionally omitted.

c. (i) If applicable Law requires Licensee to obtain and maintain a certificate of public convenience and necessity from the PURA, then each of Licensee's Pole Attachment applications shall attach a copy of its certificate of public convenience and necessity from the PURA and (ii) if applicable Law does not require Licensee to obtain and maintain a certificate of public convenience and necessity from the PURA, then each of Licensee's Pole Attachment applications shall attach a copy of an opinion from Licensee's attorney which explains why Licensee is exempt from PURA's requirement for a certificate of public convenience and necessity.

4. Unauthorized Attachment

The Unauthorized Attachment Fee specified in Exhibit E will be charged on a per Pole basis for any post-Effective Date (i) unauthorized Attachment and/or unauthorized Facility, or (ii) unauthorized use of a Pole Attachment or Facility; *provided, however*, the Licensee's total Unauthorized Attachment Fee for an individual Attachment or Facility attached to a Pole shall not exceed the cap established by PURA in Exhibit G hereto, as it may be amended by the PURA or pursuant to applicable Law.

5. Charges for Make-Ready Work, Rearrangement/Shifting, Post-Construction Inspection and Periodic Inspection

Make-Ready Work charges shall be billed and shall be payable up to forty-five (45) days prior to the commencement of work on individual Poles, according to the current Schedule of Rates in Exhibit E. Make-Ready Work Charges for proposed Attachments will reflect Licensor's provision of Post-Construction Inspections. Rearrangement/Shifting charges and Periodic Inspection charges incurred by Licensor for Attachments will be billed according to the current Schedule of Rates in Exhibit E.

6. Bill Detail

Bills shall include sufficient detail of the fees and charges set forth therein.

7. Non-Conforming Construction/Shifting Fee

The Non-Conforming Construction/Shifting Fee specified in Exhibit E, will be charged on a per day and per Pole basis for (a) any non-conforming construction performed by the Licensee which is not brought into conformance within the applicable time period identified in Article IV, Section 5 or (b) for any failure to timely perform rearrangements and shifting as set forth in Article IV, Section 7 or (c) pursuant to Article IV, Section 3(g) for Licensee's failure to timely shift or perform make-ready work on Licensee Attachment(s) and/or Facility(ies) in order to accommodate a request to attach to Pole(s) by any third party in accordance with the make-ready work and pole shifting time periods set forth in applicable Law, including in the April 30, 2008 decision in Docket No. 07-02-13 and September 29, 2010 decision in Docket No. 08-06-19, as amended; *provided, however*, notwithstanding the foregoing, (y) Licensee's total Non-Conforming Construction/Shifting Fee for an individual Attachment and/or Facility to a Pole shall not exceed the cap

established by the PURA in **Exhibit G** hereto, as it may be amended by the PURA or pursuant to applicable Law; and (z) Licensee will not be assessed a Non-Conforming Construction/Shifting Fee for each day during which (i) it is impossible for Licensee to timely shift or perform make-ready work on Licensee Attachment(s) and/or Facility(ies) due to the attachments of Licensor or a third party who is unaffiliated with Licensee and over whom Licensee has no control and (ii) during the period in which Licensee claims it was unable to perform such shifting and/or make-ready work and Licensee has used commercially reasonable efforts to notify Licensor or the third party of the impediment caused by Licensor or such third party.

8. Payment of Rates and Charges

Unless otherwise provided elsewhere in this Agreement, Licensee shall pay all rates and charges, as specified in the Agreement, within thirty (30) days from the dates of billing thereof. If Licensee disputes any amount invoiced by Licensor, Licensee shall make payment of the invoice in full and shall notify Licensor in writing of the disputed amount. Licensee may dispute any amount within ninety (90) days after the date that payment has been made. Licensee shall include any documentation supporting its position in such written notification. The Parties shall work together to resolve the dispute in an expeditious manner. In the event the dispute is resolved in the favor of the Licensee, or Licensor, then the other Party shall include interest calculated at the rate set forth above in Article VIII, Rates and Charges.

9. Amounts Due to Other Owners

Any references in this Agreement to payment, compensation, or reimbursement due to an Other Owner are separate from the rates and charges set forth in this Article VIII and **Exhibit E**, and shall remain payable by Licensee regardless of the rates and charges described herein.

10. Amendment of Rates and Charges

With respect to the rates and charges set forth in this Agreement, including but not limited to those rates and charges set forth in this Article VIII and in **Exhibit E** hereto, the Licensor may elect to amend such rates and charges using either of the following two different approaches: (i) if Licensor determines that it is unnecessary to obtain approval from any governmental authority, including the PURA, to amend such rates or changes, then Licensor may elect to amend such rates or charges upon providing thirty (30) days prior written notice thereof to Licensee and each such amended rate or charge shall automatically take effect upon the 30<sup>th</sup> day after Licensee receives such notice; or (ii) if Licensor determines that it is necessary to obtain approval from any governmental authority, including the PURA, to amend such rates or charges, then such rates or charges shall automatically take effect on the date that the appropriate governmental authority has approved the Licensor's request to amend such rates or charges. In the event of any conflict between the terms of this paragraph and the other provisions or Exhibits in this Agreement, then the terms of this paragraph shall control.

11. Electric Service Fee.

Electric service to Attachments and Facilities (or any other Licensee equipment whether or not such equipment was authorized under this Agreement) shall be paid by the Licensee to Licensor on a monthly basis in accordance with the Licensor's terms and conditions, rates and riders approved by PURA and as may be amended from time to time and also in accordance with the then most applicable tariff rate of Licensor. As of the Effective Date, the current most applicable tariff rate is the Licensor's "Rate 115" on file with PURA. Licensee acknowledges and agrees (i) that this electric service fee is a fee separate and distinct from the semi-annual Pole rental charges, application fees and make-ready expenses described in **Exhibit E** hereto and (ii) that a separate security deposit relating to the electric service fee and calculated (and, if applicable, refundable) in accordance with the applicable state regulations shall be due and payable by the Licensee and that deposit shall be in addition to the security required under any other provision of this Agreement.

**ARTICLE IX**  
**GENERAL TERMS AND CONDITION**

1. Compliance with Applicable Laws

The Licensee and the Licensor shall at all times observe and comply with, and the provisions of this Agreement are subject to all applicable Laws, which in any manner affect the rights and obligations of the Parties; any such applicable Law shall automatically supersede any conflicting provisions in this Agreement; and should any term of this Agreement be determined by a court or other entity with competent jurisdiction to be unenforceable, all other terms of this Agreement shall remain in full force and effect.

Each Party shall also comply with applicable provisions of the Fair Labor Standards Act of 1938, as amended, and the Federal Occupational Safety and Health Act of 1970 (OSHA), as amended, and with any rules and regulation under such Acts as well as other applicable Laws.

Licensee shall be responsible for obtaining from the appropriate authority any required authorizations to operate and/or maintain its Attachments and/or Facilities on public and/or private property before it attaches, rearranges, or removes any Attachments and/or Facilities to any Pole(s). Licensee shall supply to such authorities any information pertaining to their installation as shall be legally required.

2. Rights in Poles

No use, however extended, of a Pole or payment of any fee or charge required hereunder shall create or vest in the Licensee any ownership or property right in such a Pole, but the Licensee's rights herein shall be and remain a revocable license. Licensor and the Other Owners, as applicable, are and shall remain the owners of all Poles, Anchors and Guy Strands covered by this Agreement.

3. Other Agreements

Nothing contained herein shall be construed as a limitation, restriction, or prohibition against the Licensor with respect to any agreement(s) and arrangement(s) which the Licensor has entered into, or may in the future enter into, with others not covered by this Agreement, except that authorizations for Attachments existing at the time of such future agreements or arrangements shall not be diminished. The rights of Licensee shall at all times be subject to such existing and future agreement(s) or arrangement(s).

4. License Not Exclusive

Nothing herein contained or elsewhere shall be construed as a grant of any exclusive license, right or privilege to Licensee. Licensor shall have the right to grant, renew and extend rights and privileges to others not parties to this Agreement, by contract or otherwise, to use any Poles covered by this Agreement.

5. Assignment of Rights

Licensee shall not assign or transfer any authorization granted herein without the prior written consent of the Licensor except that Licensee may assign all of its rights and obligations granted herein to an Affiliate without prior consent in which case: (i) Licensee shall notify Licensor of such assignment or transfer to an Affiliate within thirty (30) days of the assignment, (ii) said assignment to an Affiliate shall not become valid until the assignee has provided Licensor with a written assignment & assumption agreement in which the assignee has contractually agreed to assume all of Licensee's rights and obligations hereunder and (iii) said assignment to an Affiliate shall not release Licensee of its obligations hereunder unless Licensor agrees in writing to release Licensee from its obligations hereunder.

6. Waiver of Terms and Conditions

Failure to enforce or insist upon compliance with any of the terms or conditions of this Agreement

or failure to give notice or declare this Agreement to be in breach, to be in default or to be revoked or failure to declare any authorization granted hereunder to be revoked shall not constitute a waiver or relinquishment of any such term, condition or act but the same shall be and remain at all times in full force and effect.

7. Term of Revocable License.

The initial term of this Agreement shall be five (5) years and shall commence upon the Effective Date of this Agreement. Following the expiration of said five-year initial term, unless previously revoked pursuant to its terms, this Agreement shall continue in effect thereafter until six (6) months after written notice of termination for convenience is given by either Party to the other Party; provided, however, that the termination of this Agreement by either Party shall not waive or release the contractual obligations of each Party that arose or accrued under this Agreement prior to such termination.

8. Entire Agreement

This Agreement supersedes all previous agreements between the Parties for maintenance and placement of Attachments and Facilities by the Licensee and constitutes the entire agreement between the Parties with respect to the specific subject matter hereof. It may not be modified or amended nor may any obligation of either Party be changed or discharged except in writing signed by the duly authorized officer or agent of the Party to be charged, (a) except to the extent that this Agreement is automatically amended by applicable Law as described in Article IX, Section 1 and (b) except to the extent the Licensor's Wireline Pole Attachment Agreement, which was approved by PURA in January 2011 in Docket No. 09-12-05 and which serves as the basis for numerous provisions in this Agreement, is amended in an existing or future PURA docket and/or PURA working group process in which case Licensor reserves the unilateral right to elect to require that conforming amendments be made to this Agreement to ensure consistency, where applicable, between this Agreement and the above-described PURA-approved Wireline Pole Attachment Agreement and any such amendments shall automatically take effect 30 days after Licensee receives written notice thereof from Licensor. Currently effective licenses, if any, issued pursuant to previous agreements shall remain in effect as if issued pursuant to this Agreement. This Agreement may be executed in counterparts; and for purposes of this Agreement, a photocopy or facsimile copy of a signature page shall be deemed to be an original.

9. Notices

Any notice to be given to either Party under this Agreement shall be sent by (a) certified mail, return receipt requested and such notice shall be effective immediately upon being deposited in the United States mail, (b) overnight mail via a nationally recognized courier service (i.e., UPS or Federal Express) and such notice shall be effective upon delivery by said overnight courier, or (c) facsimile with a confirmation and such notice shall be effective upon confirmation of facsimile; and notices shall be addressed to:

10. Taxes

If the presence of the Licensee's Attachments and/or Facilities on Licensor's Poles causes Licensor to pay any new or additional tax which is attributable to, or results from, Licensee's Attachments and/or Facilities, Licensee shall reimburse Licensor to the full extent of such new or additional tax, as additional charges, within thirty (30) days of receiving a bill therefore from Licensor.

11. Governing Law

This Agreement shall be governed by, and interpreted according to, the laws of the State of Connecticut.

**EXHIBIT A - Structure Access Request – Poles Connecticut**

To: Third Party Administrator – BMN1 Customer Application Number \_\_\_\_\_  
Connecticut Light and Power  
107 Selden Street  
Berlin, Ct 06037

A payment of \$ \_\_\_\_\_ for the application and survey costs, must accompany this application form.

In accordance with the terms and conditions of the Pole Attachment License Agreement between (Company Name) and CL&P, application is hereby made for a License to attach communication facilities to (number) poles as indicated on the Pole Data Sheet in the municipality of \_\_\_\_\_.

Applicant to indicate action below:

- This authorizes CL&P to perform a Field Survey whereby CL&P will determine the availability of pole structure for occupancy, will estimate what Make Ready work would be required to prepare the poles for occupancy, and will provide an estimated cost for that Make Ready work. Enclosed is a deposit of \$ \_\_\_\_\_ to be applied toward the cost for CL&P to perform the Field Survey. The cost for the Field Survey will be:

$$\begin{matrix} \$ \_\_\_\_\_\_ & + & (\$ \_\_\_\_\_\_ & \times & \_\_\_\_\_\_ & \text{Poles} & = & \_\_\_\_\_\_ & = & \$ \_\_\_\_\_\_ \\ \text{(Application Fee)} & & \text{(Unit cost per Pole)} & \text{(No. Poles)} & & & & & & \text{(Total Fixed Charge)} \end{matrix}$$

**It is understood that this will be the total cost for the Field Survey work unless extraordinary expenses are incurred or changes are requested by Applicant that increase the costs.**

By signing this application you agree to follow the terms of the above-cited Pole Attachment License Agreement, all applicable laws, and all applicable CL&P policies, procedures and guidelines.

**EXHIBIT E FOR WIRELESS TELECOM ATTACHERS****SCHEDULE OF RATES<sup>1</sup> FOR STANDARD POLE ATTACHMENTS**

|    |  |  |
|----|--|--|
| 1. | Wireless Pole Attachment License Fee:  |  |
|    | Pole Top Attachment on Solely Owned Pole <sup>1.5</sup>                          | \$200 per Pole per year  |
|    | Pole Top Attachment on Jointly-Owned Pole <sup>1.5</sup>                         | \$100 per Pole per year  |
|    | Attachment in the Communications Gain Space                                      | Current telecom rate <sup>2</sup> multiplied by the total number of feet occupied on the Pole by the Attachment, Appurtenance and related equipment (rounded to the nearest foot) <sup>2.5</sup> |
| 2. | Third Party Overlash Fee   | N/A  |
| 3. | Agreement Establishment Fee:   | \$650 <sup>3</sup>   |
| 4. | Application Fee Per Application:<br>Plus Add'l Fee Per Pole:                     | \$150<br>\$50  |
| 5. | Unauthorized Attachment Fee  | 5 x applicable Wireless Pole Attachment Licensee Fee <sup>4</sup> (per Pole per Day)   |
| 6. | Non-Conforming Construction/Shifting Fee   | 5 x applicable Wireless Pole Attachment Licensee Fee <sup>4</sup> (per Pole per Day))  |
| 7. | Make-Ready Work Charges<br>Rearrangement/Shifting Fee<br>Periodic Inspection Fee | Time & Materials Basis   |

<sup>1</sup> There may be additional costs, fees and/or charges billed to Licensee for Make-Ready work and/or costs incurred by Other Owners and/or Other Licensees. Rates shown above only reflect Licensor's costs, fees and charges. In addition, pursuant to Article VIII(10) of the Agreement to which this Exhibit E is attached, the rates and charges set forth in this Exhibit E are subject to change in accordance with the process described in said Article VIII(10) of the Agreement.

<sup>1.5</sup> Pole top Attachments not allowed on poles on which the Owner has primary electric distribution facilities.

<sup>2</sup> As of the effective date of this Agreement, the current Telecom Rate is Urban \$13.82 per pole per year per 12-inch space on a Pole and Non-Urban \$13.89 per pole per year per 12-inch space on a Pole. The Telecom Rate is subject to change, as described in Article VIII(10) of the Agreement.

<sup>2.5</sup> 100% of this amount for permitted Attachments in the communications gain space on solely owned poles; and 50% of this amount for permitted Attachments in the communications gain space on jointly owned poles.

<sup>3</sup> \$0 for any entity who has at least one or more wireless attachments on a Pole or Poles as of July 1, 2010. The one-time fee will be \$650 for any entity who does not have at least one or more wireless attachments on a Pole or Poles as of July 1, 2010.

<sup>4</sup> These fees/charges are subject to the then-current cap established by the PURA.

**Exhibit F**

See the attached current copies of Licensor's standards governing wireless Attachments and Facilities. The attached standards shall automatically be superseded by, and Licensee shall be subject to, all changes and updates to the attached standards that are approved by Licensor in its sole discretion from time-to-time even though such Licensor-approved updates are not attached to this Agreement.

--NORTHEAST UTILITIES DESIGN & APPLICATION STANDARD, "POLE TOP ANTENNA SYSTEMS", DTR 07.047, APPROVED ON 1/5/12, Pages 1, 2 and 3

--NORTHEAST UTILITIES, Distribution System Engineering Manual, Overhead Design, Section 06.70, Pole Top Antenna Systems 06.701, dated January 2012, Page 1

In addition, Licensee is responsible for complying with the standards of Other Owners, which include The Southern New England Telephone Company d.b.a. AT&T Connecticut and Verizon.

**EXHIBIT G****PURA-Approved Caps on Non-Municipal Unauthorized Attachment Fees and Non-Conforming Construction/Shifting Fees**

For poles that are jointly owned by CL&P and a telephone company, CL&P will charge 50% of its approved rate. DN 09-12-05, CL&P Rate Case Decision, p. 127.

## Unauthorized Attachments

1. The mediators believe that the unauthorized penalty cap should be the current annual pole attachment rate determined on a monthly basis and charged for each month of the unauthorized attachment going back to the last pole audit or up to 60 months, whichever time period is shorter. Another way of stating the penalty cap is: for the purpose of determining the penalty, the unauthorized attachment shall be treated as having existed for a period of five (5) years or since the last audit whichever period shall be the shorter; and the fee for any such period shall be calculated at the current attachment rate.
2. The unauthorized pole attachment penalty applies to a 100% CL&P owned pole. Unauthorized pole attachments on jointly owned poles would be charged 50% of each utilities approved unauthorized pole attachment penalty fee.
3. Examples for 100% CL&P owned poles:

## Example 1

CATV Attachment Rate \$13.15/year

10 Unauthorized Attachments installed for 40 months

Penalty = 10 attachments x \$13.15/12 months x 40 months = \$438.33

## Example 2

CATV Attachment Rate \$13.15/year

10 Unauthorized Attachments installed for 70 months

Penalty capped at 60 months

Penalty = 10 attachments x \$13.15/12 months x 60 months = \$657.50

## Example 3

Telcom Attachment Rate \$16.92/year

10 Unauthorized Attachments installed for 40 months

Penalty = 10 attachments x \$16.92/12 months x 40 months = \$564

## Example 4

Telcom Attachment Rate \$16.92/year

10 Unauthorized Attachments installed for 70 months

Penalty capped at 60 months

Penalty = 10 attachments x \$16.92/12 months x 60 months = \$846

4. For joint owned poles, CL&P would charge 50% of the above penalties

## Failure to Complete Make Ready Work On Time

5. The penalty should be the annual attachment rate divided by 12, charged on a per day basis and capped at 30 days.

6. After 15 days of delay and penalties the pole owner should hire a contractor to construct the make ready work and charge the delaying attacher the penalty and costs of the make ready work.
7. Examples for 100% CL&P owned poles:

Example 5

CATV Attachment Rate \$13.15/year

10 Attachments Delayed for 20 days

Penalty = 10 attachments x \$13.15/12 x 20 days = \$219.17

Example 6

CATV Attachment Rate \$13.15/year

10 Attachments Delayed for 40 days

Penalty capped at 30 days

Penalty = 10 attachments x \$13.15/12 x 30 days = \$328.75

Minimum CATV Cap: Greater of \$110 or total of pole owners' costs.

Example 7

Telcom Attachment Rate \$16.92/year

10 Attachments Delayed for 20 days

Penalty = 10 attachments x \$16.92/12 x 40 months = \$282

Example 8

Telcom Attachment Rate \$16.92/year

10 Attachments Delayed for 40 days

Penalty capped at 30 days

Penalty = 10 attachments x \$16.92/12 x 30 days = \$423

Minimum CATV Cap: Greater of \$140 or total of pole owners' costs.

8. The Mediator believes that the make-ready timeliness penalty should be allocated between the pole owner and the 3<sup>rd</sup> party customer being harmed.
9. The pole owner should be allowed to recover its cost for additional administration and follow-up work and time so utility customers do not subsidize additional costs due to delays.
10. The remainder of the penalty revenue should go to the customer who experienced the delay.
11. The penalty charged to third parties and municipalities should be the same.
12. Pole owner customers will not subsidize 3<sup>rd</sup> party attachment costs.
13. The mediation team is available to assist with any disputes that may rise from this proposal.
14. The results of the cap proposal will be reviewed after 12 months of use.
15. Note: The penalty caps used by AT&T in the past will remain the same and are not affected by this proposal

---

**SCOPE** – The requirements set forth establish the conditions for attachments of distributed antenna systems (DAS) to specific CL&P and WMECO distribution poles. These requirements were agreed to by CL&P, AT&T, and a DAS consortium in 2011 and are intended to allow DAS access without risking system reliability or employee safety.

**GENERAL** – CL&P and WMECO will permit the attachment of distributed antenna systems (DAS) in accordance with the following requirements:

**Pole Attachment Conditions** (Refer to **DTR 07.047** for Design & Application Standard):

1. Attachments above the primary conductors on any pole is not allowed.
2. Poles with secondary conductors or stub poles are the only poles permissible for DAS attachment.
3. DAS may be attached on existing CL&P and WMECO street light brackets (consult engineering for installation on street lights).

*Note: Some street light brackets may be owned by municipalities and permission for such attachments are the responsibility of DAS companies.*

4. Attachments to poles on private property are not allowed.
5. CL&P/WMECO reserves the right to deny attachments to poles under the following conditions:
  - a. The pole is on private property.
  - b. The pole cannot be guyed sufficiently.

**Changes Requested by DAS Companies**

1. Poles shall not be replaced due to age alone. Replacement costs will be at the expense of DAS companies. Upgrades to secondary conductors such as replacement of 120V cable with triplexed 240/120V conductors shall also be at the expense of DAS companies.
2. Clearance to nearby poles with primary conductors shall be of adequate distance to prevent contact of an antenna to primary conductors in the event of falling DAS poles due to storms or vehicle accidents.

**Operational Requirements**

1. Electrical disconnects are required for all antennas.
2. CL&P/WMECO reserves the right to disconnect power to antennas at any time and will not be responsible for interruption to DAS service.
3. Warning signs to indicate exposure to radio frequency signals are the responsibility of DAS companies and shall be installed prior to energizing any antennas.
4. CL&P/WMECO shall be responsible for all connections and under no circumstance will DAS companies be permitted to tap onto existing or new electrical conductors.

**Notes**

1. Refer to **DTR 07.047** for construction guidelines.

|                       |                                 |            |   |              |

| NORTHEAST UTILITIES   | DESIGN & APPLICATION STANDARD   | DTR 07.047 | 2 |              |

**Notes**

1. Pole top antennas shall only be installed with the approval of Northeast Utilities. The existing pole selected to install a pole top antenna must meet the following criteria:
  - There is no primary equipment or conductor already attached on the pole (e.g. transformers, control boxes).
  - There are no scheduled plans to attach primary equipment to the pole.
  - There is no structural damage to the pole (this includes poles with structural repairs).
  - The pole is not a junction pole.
  - There are no communication or power risers on the pole.
  - The pole must not be located underneath primary wires or equipment.
2. Antenna model selection criteria:
  - The antenna must not operate at a frequency that would interfere with local radio equipment such as the Distribution SCADA communications.
  - The maximum allowable antenna height is eight feet when no pole top extension is used.

(Notes continued on **DTR 07.049**)

|                        |                                 |                               |                   |              |
|------------------------|---------------------------------|-------------------------------|-------------------|--------------|
| ORIGINAL               | <b>POLE TOP ANTENNA SYSTEMS</b> |                               |                   | <b>CT/MA</b> |
| 1/5/12                 |                                 |                               |                   |              |
| APPROVED               |                                 |                               |                   |              |
| 4/22/14<br><i>Camp</i> | NORTHEAST UTILITIES             | DESIGN & APPLICATION STANDARD | <b>DTR 07.048</b> | <b>2</b>     |

- When a pole top extension is used, the total height of the antenna and extension must be less than five feet.
  - The antenna RF emission must comply with the current edition of *IEEE C95.1-2005*.
  - Only one antenna assembly may be installed on each approved pole (i.e. one antenna bracket fixture with one or multiple antennas).
3. The distribution antenna systems (DAS) attaching entity must apply to NU for attachment approval and determination of make ready work costs for each pole they wish to attach to. All approved poles will require an attachment agreement with NU prior to any installation work.
  4. A professional engineer licensed in the state where the attachment is proposed must evaluate each antenna model with respect to pole class. Items to be evaluated include, but are not limited to, pole weight loading, wind and ice loading, RF emission compliance, and NESC compliance. The professional engineer must stamp and sign off on the design before construction can begin. The approved designs can be reused for different installations provided that the professional engineer specifications and all other requirements in this standard are met. However, each installation will require a pole inspection and guying evaluation performed by NU and an intermodulation frequency analysis conducted by the DAS attacher. See **DSEM 06.70** for pole attachment conditions.
  5. The DAS attacher shall provide NU with a list of qualified personnel who are authorized to represent the DAS attaching entity. The qualified personnel are responsible for providing NU with a written electrical service release that states the DAS installation has been built as designed in the standard and specified by the professional engineer. They also must ensure that all applicable codes such as the NESC, NEC, and requirements of the state and local municipality have been met. NU will make all final power connections to the DAS equipment once the electrical service release is submitted.
  6. Northeast Utilities or approved NU contractor shall perform all work above the telecommunications zone.
  7. The total above ground height of the pole and the antenna must be less than 60 feet. This total height may be further limited depending on the proximity of poles with primary voltage wires. The pole with the attached antenna must not be long enough to make contact with adjacent primary equipment or wires in the event that the pole is broken at the base.  
Please note that the total height of the antenna and pole will be further limited by the equipment owned by Northeast Utilities distribution. As of 2011, NU distribution is capable of installing poles up to 50 feet tall.
  8. Clearances for DAS equipment in the telecommunications zone must be negotiated with the respective telecommunications company
  9. The customer's DAS control power supply/repeater shall be equipped with a pad-lockable disconnect switch. The power supply cabinet must also be equipped with an external indicator light to provide certainty that the antenna is shut down.
  10. The DAS attaching entity is responsible for placing a warning sign on the power supply communicating the RF emissions in compliance with the current edition of *IEEE C95.2-1999*. This sign must also have a 24 hour contact phone number in case of an emergency. This number must be visible from the ground.
  11. Load characteristics of a given installation will determine if a meter is required. NU will provide the metering device for metered installations. The DAS attacher is responsible for acquiring all other accessories such as the disconnect switch and meter socket and for the meter installation.
  12. Any required vegetation maintenance is the responsibility of the pole attaching entity.
  13. Rules for taking antenna outages for pole maintenance:
    - Northeast Utilities is responsible for giving a 24 hour notice to the pole attaching entity prior to locking and tagging out antennas for scheduled outages.
    - Northeast Utilities may lock and tag out antennas without a 24 hour notice for emergency work.
    - Northeast Utilities must still give notification to the customer at the time of the required outage.
    - NU must contact the pole attachment customer once the work is complete and the antenna is re-energized.

|                       |                                 |          |  |  |

**PURPOSE** – The purpose of this standard is to describe the general requirements and show the typical construction and clearances needed for a side-mounted distributed antenna systems (DAS) installed in the communication space of an electric distribution pole.

### **GENERAL REQUIREMENTS**

The antenna attaching entity must apply to the appropriate Eversource Energy office for the attachment approval and determination of make ready work costs for each pole. All approved poles will require an attachment agreement with Eversource Energy prior to any installation work.

Any style of new antenna installations are not allowed on distribution poles that contain any of the following equipment or construction:

- Any primary connected equipment (transformers, switches, regulators, reclosers, capacitors, etc) operating over 600 Volts.
- Any other communications equipment or antenna belonging to Eversource Energy or another entity (i.e. Cable Television Power Packs).
- Any pole with a primary riser, three-phase secondary riser, multiple secondary risers or a single-phase secondary riser with conductors greater than 4/0 in size.
- Locations that cannot be accessed by a standard bucket truck.
- Three and four-way primary junction poles.
- Poles that would require guying and anchoring to be added or upgraded to support wire and equipment loads until rights are subsequently secured and guying and anchoring is installed.
- Poles with existing riser congestion (all utilities) that encircles more than 40% of pole circumference.

#### 1. Applicable codes and other approvals needed:

- a. All installations shall be in compliance with the applicable codes, wiring inspector requirements and the Eversource Energy "Information and Requirements for Electric Service." Installation and maintenance will be performed in compliance with OSHA requirements and Eversource Energy Safety requirements for work in energized areas. NESC minimum requirements shall be met or exceeded in all cases.
- b. The wireless company shall obtain permission from the local municipality and Eversource Energy prior to installation of the equipment.

#### 2. Attacher Requirements

- a. A professional engineer licensed in the state where the attachment is proposed must evaluate each antenna model with respect to pole class. Items to be evaluated include, but are not limited to, pole weight loading, wind and ice loading, RF emission compliance, and NESC compliance. The professional engineer must stamp and sign off on the design before construction can begin. The approved designs can be reused for different installations provided that the professional engineer specifications and all other requirements in this standard are met. However, each installation will require a pole inspection and guying evaluation performed by Eversource Energy and an intermodulation frequency analysis conducted by the attacher. For CT/MA, see **DSEM 06.70** for pole attachment conditions.
- b. At the cost of the attacher, a study of the pole adequacy and integrity with the new equipment installed will be performed.
- c. Attacher pays all costs for the new pole, transfer work and make-ready work before any work is to begin.

|            |  |                               |                   |          |
|------------|--|-------------------------------|-------------------|----------|

| 3/12/15    |  |                               |                   |          |
| APPROVED   |  |                               |                   |          |
| 04/16/15   |  |                               |                   |          |
| <i>Cwp</i> | EVERSOURCE ENERGY  | DESIGN & APPLICATION STANDARD | <b>DTR 07.055</b> | <b>1</b> |

3. Attacher shall provide and install the following – construction notes
- a. Weatherhead in a location suitable to form a drip-loop and to make secondary connections.
  - b. Conduit shall be two inch PVC, heavy wall sunlight resistant (6 percent–7 percent titanium dioxide by weight), Schedule 40 as per ANSI/NEMA TC 2–2003. Conduit riser shall be installed bell end down and extend two inches above the secondary or neutral height. Riser shall be installed on the pole opposite the flow of traffic.
  - c. Disconnect and overcurrent protection sized and designed in compliance with NEC requirements for outdoor installations. This may be located in a separate compartment for CT/MA installations.
  - d. Grounding shall be furnished, installed, and connected using NEC approved ground electrodes.
  - e. All devices are to be mounted over one another on the same side of the pole. Arrange all pole equipment to allow at least one clear third of the pole, dimensions per NESC climbing space.
  - f. Antenna and all mounting brackets shall have galvanized steel mounting bases. These shall be secured to the pole with galvanized hardware of adequate strength for the load.
  - g. Radio Frequency (RF) radiation warning signage as required by OSHA shall be present and visible to persons working near antenna. Requester must submit documents that state the RF output of the antenna for each location.
4. Metering Requirements – CT/MA
- a. Services to power supplies shall be single phase, three wire and shall be metered unless the service meets requirements for unmetered service.
  - b. All pole mounted installations and orientation of the meter socket must be approved by Eversource metering prior to installation.
  - c. Meter shall not be installed on poles unless the control unit itself is also installed on the pole. The meter location for the pole mounted control units should be at least at the 5 foot level.
  - d. An approved lever operated manual bypass is required on sockets. 100 amp sockets may be supplied with non– locking jaws. Sockets greater than 100 amps must be supplied with locking jaws.
  - e. Supply wire for connection to leads from secondary shall be minimum #10 solid copper, 600 V insulated conductors, type RHW–2 or THWN, and made with UL approved connectors.
  - f. Allow enough slack on temporary power and neutral connections so Eversource Energy crews can cut the temporary connections and attach the power and neutral leads to system secondaries/neutrals without additional splicing.
  - g. Each power supply shall be metered, and requires a ring–less meter socket and pole mount bracket. Meter is Form 12S, UL approved, sealable, with safety arc shield and approves single–handle operated bypass. Use of an automatic by–pass is not permitted. The meter socket will be located on the quarter of the pole opposite of traffic flow.
5. Metering Requirements – NH
- a. Attacher shall furnish and install riser with service entrance cable to meter mounting device with disconnect.
  - b. Attacher shall allow enough service entrance cable slack so Eversource Energy crews can attach the power and neutral leads to the system without splicing.

| <i>Cwp</i> | EVERSOURCE ENERGY  | DESIGN & APPLICATION STANDARD | DTR 07.056 | 1 |

- c. Eversource Energy NH will provide the meter. The attachee is responsible for acquiring all other accessories such as the NEMA 3R fused disconnect or circuit breaker. Use of an automatic bypass is not permitted. The meter socket will be located on the quarter of the pole opposite of traffic flow.
6. Minimum clearances from antenna to energized wires:
- a. Antenna and mounting brackets shall maintain a minimum clearance of six (6) feet in any direction from RF emitting surface panel or mast to the nearest or lowest primary conductor. See **DTR 07.059**.
  - b. Reserved primary space requirements shall be identified by Eversource Energy engineering based on the type of primary construction that is anticipated for the pole in question.
  - c. Antenna and mounting brackets shall maintain a minimum clearance of four feet in any direction from an RF emitting surface panel or mast to the secondary main cable. Secondaries may be at the pole top or below a primary. See **DTR 07.058**.
  - d. Antenna shall be mounted on a bracket. See **DTR 07.059**.
7. Any required vegetation management is the responsibility of the pole attaching entity.
8. Rules for taking antenna outages for pole maintenance:
- a. Eversource Energy is responsible for giving a 24 hour notice to the pole attaching entity prior to locking and tagging out antennas for scheduled outages.
  - b. Eversource Energy may lock and tag out antennas without a 24 hour notice for emergency work.
  - c. Eversource Energy must contact the pole attachment customer once the work is complete and the antenna is re – energized.

**Non-pole top antenna clearance from pole, primary (or reserved primary space), and secondary conductors**

**Notes**

1. Reserved primary space requirement shall be identified by Eversource engineering based on the type of construction that is expected for the pole.
2. Six feet minimum clearance to nearest energized primary wire or tap.
3. Antenna mast or panel is on opposite side of pole from cable.
4. Bracket mounting height below secondary must allow these two clearances for any antenna design.

**Subject: STRUCTURAL ANALYSIS**

Verizon Wireless Site Reference –Darien SC14 CT  
Pole Number NO STENCIL  
Goodwives River Road  
Darien, CT 06820

To Whom It May Concern:

Tilson has completed a structural analysis of the above referenced utility pole to determine its adequacy for the proposed installation of Verizon Wireless equipment as shown on the following page.

This analysis assumes that the proposed structure and associated components have been properly constructed per original design and have been well maintained. The loads considered in this analysis were determined in accordance with the requirements of the National Electric Safety Code (NESC) 2017 Edition, Rule 250B, Grade C, Heavy Load. The soil surrounding the pole is assumed to be Class 6 (Loose to medium dense fine to coarse sand, firm to stiff clays and silts) per Osmose O-Calc® Pro 5.2 Pole Loading Software.

Our findings show that the proposed utility pole will be adequate to support the Verizon Wireless radio equipment and antenna installation.

This analysis is based solely on information available to us as listed on the following page. This report is considered void if any of the listed information is incorrect.

We appreciate the opportunity to be of service on this project. If you have any questions or concerns regarding this analysis, please do not hesitate to contact us at (207) 591-6427.

Sincerely,

Eric T. Anderson, P.E.

### Notes:

1. Any discrepancies in loading from this listing should be brought to Tilson's attention. Results of this analysis cannot be used if the loading is different.  
(N) = New equipment, (E) = Existing equipment

### Assumptions and Limitations:

1. Current and future wire taps will be back-guyed to minimize tension load imbalances.
2. Current and future wires will be installed as to not induce angular loading on the pole.
3. The subject pole is installed plumb and free of unreasonable defects.
4. All equipment shall be installed as shown on the corresponding construction drawing.
5. This structural analysis was completed based upon the received make-ready determination.
6. All pole information is based on a visual ground inspection.
