Re: Citrine Power LLC's Petition for Solar photovoltaic electric generating facilities in
Middletown and Middlefield (Off Route 66 and Higby Road)

Dear Attorney Bachman:

I am writing this letter to support Citrine Power LLC's ("Citrine Power") petition for the installation of two solar photovoltaic electric generating facilities, that will be situated in Middletown and Middlefield. We have met with the Citrine Power team to understand and review the proposed facilities.

The proposed facilities are set back from the road, have minimal impacts and disturbance on the land and make a very productive use of otherwise unused property.

The Town of Middlefield is a supporter of renewable energy and I am happy that our Town will co-host these solar facilities with the City of Middletown that will, if approved, contribute to the State's robust RPS standards.

Accordingly, the Town is in support of the solar facilities in general pending Connecticut Siting Council's review and approval.

If you have any questions or concerns please feel free to call me.

Thank you very much.

Cordially,

Edward Bailey
First Selectman
Town of Middlefield, Connecticut

Re: Citrine Power LLC's Petition for Solar Arrays in Middletown and Middlefield (Off Route 66 and Higby Road)

Dear Director Bachman:

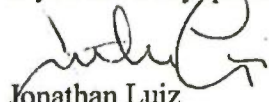

We are writing this letter to support Citrine Power LLC's ("Citrine Power") petition for building the two solar arrays residing in Middletown and Middlefield.

Town of Weston is the Host Customer of one of the solar arrays and together with Weston Board of Education and the Town of Wilton will be the beneficiary of the Virtual Net Metering Credits from one of the solar arrays.

Town of Weston is a supporter of renewable energy. We already are benefiting from Virtual Net Metering Credits from 2 MWs of solar arrays operational in Lebanon, CT. In addition, we have solar arrays on some of our Town buildings. Our Town residents have also widely participated in our Solarize Weston campaigns over the years. We are glad to be supporting another solar array in Connecticut to help reach the State's aggressive RPS goals.

Accordingly, we are in support of the solar systems in general pending Connecticut Siting Council's review and approval.

If you have any questions or concerns please feel free to call me.

Jonathan Luiz
Weston Town Administrator

Re: Citrine Power LLC's Petition for Solar Arrays in Middletown and Middlefield (Off Route 66 and Higby Road)

Dear Director Bachman:

We are writing this letter to support Citrine Power LLC's ("Citrine Power") petition for building the two solar arrays residing in Middletown and Middlefield.

Town of Wilton together with the Town of Weston and Weston Board of Education will be the beneficiary of the Virtual Net Metering Credits from one of the solar arrays. In addition, the Town of Wilton is hoping to be the Host Customer of the second array and is on the waitlist with Eversource, in the event Virtual Net Metering Capacity becomes available.

Town of Wilton is a supporter of renewable energy. Over the years we have participated successfully in the ZREC auctions that benefit our operational solar arrays on the roofs of our High School and Middle School. Our Town residents have also widely participated in our Solarize Wilton campaigns over the years. We are glad to be supporting these solar arrays that Citrine Power is intending to build to help reach the State's aggressive RPS goals.

Accordingly, we are in support of the solar systems in general pending Connecticut Siting Council's review and approval.

If you have any questions or concerns please feel free to call me.

Lynne Vanderslice
First Selectwoman
Town of Wilton
