RE: Application of Bloom Energy for the location and construction of three (3) new ES-5 Bloom Energy Server solid oxide fuel cells to provide 750 Kilowatts of Customer-Side Distributed Resource at 540 Litchfield Street, Torrington, Connecticut

Dear Ladies and Gentlemen:

Pursuant to Section §16-50j-40 of the Connecticut Siting Council's (the "Council") regulations, we are notifying you that Bloom Energy filed, on or about September 20, 2019, a petition for declaratory ruling with the Council. Due to an oversight, the Conservation Commission's notification was not sent prior to the filing. The petition requests the Council's approval of the location and construction of a 750-kilowatt (KW) fuel cell installation and associated equipment. The Facility will be located at Charlotte Hungerford Hospital/Hartford Health Care ("HHC") at 540 Litchfield Street in Torrington, Connecticut (the "Site").

The purpose of the proposed Facility is to replace the average baseload of HHC's operations at that location with a renewable energy source¹ and improve reliability of electrical systems and equipment. Electricity generated by the Facility will be consumed primarily at the Site, and any excess electricity will be exported to the electric grid. The Facility will be fueled by natural gas.

Keeping the lines of communication open is an important part of our work in your community. If you have questions about this work, please contact the undersigned or the Council.

Respectfully,

Justin Adams
