Re: **PETITION NO. 1110 – The United Illuminating Company petition for a declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for the proposed Milford 115-kV transmission line upgrade project consisting of the northern and southern sections of 115-kV lines**

and

**PETITION NO. 1151 – The United Illuminating Company petition for a declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for the proposed removal and replacement of the existing 115-kV transmission line structures in the Connecticut Department of Transportation right-of-way outside of Milvon substation located at 772 Bridgeport Avenue, Milford, Connecticut – Notification of Completion**

Dear Chairman Stein:

The United Illuminating Company ("UI") received acknowledgement from the Connecticut Siting Council ("Council") on August 21, 2014 that the UI proposed Milford 115-kV transmission line upgrade project and associated removal and replacement of the existing 115-kV transmission line structures would not have a substantial adverse environmental effect, and pursuant to Connecticut General Statutes Section 16-50k, would not require a Certificate of Environmental Compatibility and Public Need with the condition that UI file a joint Development & Management Plan for Petition No. 1110 and Petition No. 1151.

UI submits this letter to provide notice that construction for these joint projects was completed on November 6, 2015. Enclosed are this original and two (2) copies of this Notice of Completion.

Thank you for your attention to this matter. If you have any questions or comments, please call me at (203) 499-2586

Sincerely,

Amy Hicks, Analyst  
The United Illuminating Company
