Re: **PE1133-VER-20160209 – Celco Partnership d/b/a Verizon Wireless**
10 Sylvia Street, Branford, Connecticut

Dear Ms. Bachman:

On March 28, 2016, the Siting Council approved Celco's Sub-Petition for a Declaratory Ruling for modifications to the existing telecommunications facility located at 10 Sylvia Street in Branford, Connecticut. Celco's modifications involved the installation of antennas and remote radio heads on the tower and associated equipment installed within the facility compound.

As a condition of the Council's approval, Celco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to the Sub-Petition. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Kenneth C. Baldwin".

RE: Tower Modification Certification

Project: Verizon Branford 4 CT
10 Sylvia Street Branford, CT 06405

Tower Owner: Crown Castle; Site #822765

Engineer: Centek Engineering

APT Project No.: CT141NB9830 Branford 4

CSC Exempt Mod Reference No.: PE1133-VER-20160209

Dear Mr. Parks,

All-Points Technology Corporation, P.C. (APT) is providing this 'Tower Modification Certification' with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by B+T Group:

- Review of B+T Group's Structural Analysis (B+T project #101126.001.01) dated 10/27/15;
- Review of Construction Drawings by Centek Engineering (Job #15152.000 Rev 2) dated 3/4/16;
- Review of B+T Group's AWS Site Modification drawing (B+T project #101126.001.01) dated 10/27/15; and
- Field Observations by APT personnel on 5/4/17 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the aforementioned structural analysis.

The structural analysis prepared by B+T Group demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,
All-Points Technology Corporation, P.C.

Robert E. Adair, P.E.
Principal
