Re: **PE1133-VER-20151006 – Cellco Partnership d/b/a Verizon Wireless
Interstate 84, Middlebury, Connecticut**

Dear Ms. Bachman:

On November 15, 2015, the Siting Council approved Cellco's Sub-Petition for a Declaratory Ruling for modifications to the existing State Police telecommunications facility located along Interstate 84 in Middlebury, Connecticut. Cellco's modifications involved the installation of antennas and remote radio heads on the tower and associated equipment installed with the facility compound.

As a condition of the Council's approval, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to the Sub-Petition. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

**Project: Verizon Middlebury
I-84, Middlebury, CT**

AECOM Project No.: 60404004 (VZ5-190)

CSC Reference No.: PE1133-VER-20151006

Dear Mr. Parks:

AECOM, contracting as URS Corporation AES, is pleased to provide this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by AECOM, contracting as URS Corporation AES:

- Review of the Structural Reinforcement Design by URS Corporation, dated July 10, 2015

The modification design demonstrates that the tower will not exceed 100 percent of the post construction structural rating. The work under this contract has been reviewed and found, to the Engineer's best knowledge, information and belief to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

AECOM, Contracting as URS Corporation AES

Richard A. Sambor, PE
Structural Engineer
