Re: **PE1133-VER-20150327 – Cellco Partnership d/b/a Verizon Wireless
426 River Road, Willington, Connecticut**

Dear Ms. Bachman:

On May 11, 2015, the Siting Council approved Cellco's request to install antennas and associated equipment at the existing telecommunications facility at 426 River Road in Willington, Connecticut. As a condition of that approval, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report included as a part of the filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that Cellco has complied with this condition.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Willington West
426 River Road, Willington, CT

Tower Owner: Crown Castle USA
3530 Toringdon Way, Charlotte, NC

Engineer: Aero Solutions LLC
5500 Flatiron Parkway, Suite 100, Boulder, CO

Centek Project No.: 16003.001

CSC Exempt Mod Reference No.: PE1133-VER-20150327

Dear Mr. Parks,

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by Aero Solutions (Aero Project Number: 003-15-0074):

- Review of Aero Solutions Structural Analysis dated 01/30/2015.
- Review of FDH Modification Inspection Report dated 08/05/2015.
- Field observations by Centek Engineering personnel on 01/21/2016 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by Aero Solutions on 01/30/2015 and/or approvals by the EOR.

The modification design prepared by Aero Solutions demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
