**To:** Bachman, Melanie

**Subject:** PET 1337: 1508 Line Modification

Dear Melanie Bachman:

Eversource is requesting approval from Council staff to modify its access to structure 5955. In order to improve the safety and constructability of the work area, the Project is proposing to access structure 5955 via temporary matting across a wetland from adjacent structure 5954. It has been determined that the original proposed access off of Durham Road (Route 79) will create an unacceptable safety risk, due to the close proximity of the construction, and construction access, to the busy state road. The modified access will result in approximately 8,225 square feet of temporary impacts to wetland W23. Please see the attached revised mapsheet 8.

As the proposed modified access is across state land, Eversource has secured state approval for this change. The municipality and abutters have been notified.

Please let me know if you have any questions or concerns.

Kate Shanley
